Gromyko denies Rostow claim on Geneva missiles agreement BY JAMES BUCHAN IN BONN

despite claims from U.S. officials involved in the talks that informal agreement on medium-range missiles was reached last summer.

Speaking at a press conference in Bonn after talks with Chancellor Helmut Kohl, Mr Gromyko placed the blame for this lack of progress nn reducing strategic and intermediate-range missiles solely on the shoulders of the U.S. Administra-

viet Foreign Minister, said yester—West enjoys nuclear superiority in day that no progress had been Europe—which Nato totally rejects made in nuclear disarmament ne and dismissed as "unserious" gottations with the U.S. in Geneva.

President Reagan's "zero option," which is also backed by Chancellor

> ance would forego deployment of 572 cruise and Pershing-2 missiles due to be sited in Western Europe from this autumn if the Soviet Union dismantles its entire landbased missile arsenal directed at Western Europe. However, Mr Gromyko did con-

firm what had hitherto been only a Mr Gromyko firmly repeated the hint that the Soviet offer to reduce

MR ANDREI GROMYKO, the So-traditional Soviet claim that the viet Foreign Minister, said yester- West enjoys nuclear superiority in implied not only the movement of it its tactical missiles of under 1,000- analysis of the Western threat. some missiles out of range of Euro-pean targets but also the "complete estruction* of others.

Nato holds that the Soviet Union has over 600 land-based, mediumrange missile delivery system with as many as two thirds of them directed at Europe. The 162 systems that Moscow would retain correspond to Soviet claims for the Brit-ish and French nuclear forces, which "must be taken into account," Mr Gromyko said.

In a speech on Monday night, the Soviet Foreign Minister also re-

km range" on a basis of reciprocity.

This seems to refer to the systems known in the West as SS-12, Scud and Frog, now being replaced with SS-22, SS-23 and SS-21 respectively. West German officials said yes-

terday thet, despite tendentious or polemical public utterances, the So viet side had shown itself ready for calm and real discussions behind closed doors, notably in talks with Herr Hans-Dietrich Genscher, the Foreign Minister, on Monday. For the first time in German experi-

The visit had displayed, according to one official, "a predominantly wooing character, at a time when public anxieties about the stationing of 96 cruise and 108 Pershing-2 missiles in Germany have become a powerful issue in the run-up to the

Mr Gromykn's claim that no prog-ress had been made either at the strategic (START) or intermediaterange (INF) talks in Geneva con-trast sharply with statements on Sunday by Mr Eugene Rostow, the former U.S. arms-control adminis-

negotiators had actually produced a joint working paper, which was re-jected in Moscow in September. The paper fell short of the U.S. zero

Mr Gromyko said these reports "correspond nnt at all to reality. There bas been no progress because of the instructions of those at the head of U.S. policy." Mr Gromy-kn urged West Germany to "show its own lace" and ignore "the dic-tates of another side" if they did not correspond to good Soviet-West German relation:

Thatcher pledge on missiles Page 11

Thatcher cleared of Falklands blame by British inquiry

BY DAVID TONGE AND PETER RIDDELL IN LONDON

NO CRITICISM or blame should be attached to Mrs Margaret Thatcher's Conservative Government for the Argentine junta's decision to invade the Falkland Islands, a British committee of inquiry said yesterday in its report on the background to last summer's war between Britain But the 106-page report by the

Franks Committee, which was ap-pointed by the Government, said that Britain had long been sending the: wrong signals to Argentina, causing Buenos Aires to misjudge the strength of British commitment to the protection of the Falklands' FFr 6.6825), SwFr 1.964 (SwFr 1.9325) and Y231.9 (Y229.5), Its Bank of England trade-weighted 1,600 inhabitants. It also found that neither the For-

eign Office nor Britain's intelligence services had paid sufficient attention to the Faklands during the winter of 1981-82 desorte a clear change of mood in Buenos

Interbank lending

up sharply

NEW COMMERCIAL bank lending to developing countries came to an abrupt halt for the first time since 1977 as the Mexican debt crisis exploded in the third quarter of last year, according to latest figures from the Bank for International Settlements (BIS).

Outstanding loans to non-Open developing countries fell by \$800m during the quarter after a strong \$13bn increase in the second quarter, says the BIS which monitors international bank lending flows.

Despite a worldwide slowdown in international lending to non-banks banks were lending more to each other during the third quarter. The BIS records a \$50.5bn increase in international interbank deposits during the period after \$3hn growth in the second quarter.

Foreign currency interbank business within individual banking centres also grew by \$35bn during the period. In the second quarter it had fallen by \$25.5bn.

The BIS attributes the sharp expansion of interbank business to seasonal factors, especially in-creased activity by Japanese banks as their new business year got under way.

But its figures surprised some commercial bankers after the wellpublicised problems in the inter bank market as confidence in some institutions waned when the Mexican problem was at its height in Au gust and Septembe Details, Page 18

Group of Ten agrees to new **IMF** funds

By David Housego and David Marsh in Peris

FINANCE ministers from the leading industrialised nations yesterday agreed to a substantial increase in resources for Inter-national Monetary Fund (IMF) emergency lending and ex-pressed broad support for cooperation to achieve higher levels of growth.

The General Arrangements to Borrow (GAB), the financing mechanism run by the Group of Ten industrial countries to top up the IMF's resources, will be in-creased to SDR 17bn (\$19bn) from SDR 6.4bn.

As part of the move to expand Fund lending to hard pressed de-veloping countries, all IMF members will have access to GAB drawings. Saudi Arabia is to provide an

undetermined additional sum and Switzerland formally declared yesterday that it wanted to become a full member of the scheme as a new participant of the Group of Ten.
Although agreeing the need for

"reinforced cooperation on eco-nomic, financial and trade issues," the Ministers at their Paris meeting yesterday refrained from committing themselves to specific measures to stimulate

M Jacques Delors, the French Finance minister and chairman of the meeting, spoke of an absence of convergence of views. This, in particular, reflects the continuing sharp differences be-tween France and the U.S. over the desirability of reflationary

butter imports until Soviet sales resume

BY JOHN WYLES IN BRUSSELS

MME EDITH CRESSON, France's Minister for Agriculture, rem totally unmoved yesterday by the wrath of her British counterpart, Mr Peter Walker, and undertook to maintain a formal veto on the import of New Zealand butter until the EEC resumes substantial butter sales to the Soviet Union. ...

But Mme Cresson's stand is much more a blow at the integrity of EEC agreements than at New Zealand's butter trade. Its butter is continuing to enter the UK - with French agreement - at the rate of 7.250 tonnes a month in January and February.

This monthly tomage is precisely one twelfth of the 87,000 tonnes of New Zeeland butter which the Council of Ministers agreed last October should be imported into the EEC this year et preferential rates. France then withheld ratification as a counter against Britain's tradi-tional antipathy to subsidising butter exports to Russia.

After raising the matter at yesterday's meeting of EEC Agriculture Ministers, Mme Cresson publicly promised to block the Council agreement until she was satisfied on Soviet butter

The Commission's unsuccessful attempt at a compromise by offering restricted quantities for sale without a guaranteed export sub-sidy was, she said, discriminating against the Soviet Union. West Ger many was selling technology to Moscow and that was far more dangerous than butter, she added. On Monday, Mr Walker claimed that the French stand was "e monstrous and blatant abuse of the of sales to Russia.

Mme Edith Cresson

Council of Ministers But Mme Cresson is now well adapted to ver-bal warfare with Mr Walker and appears to regard the butter row as a limbering-up exercise for the looming annual Anglo-French clash on

the size of the price increases to be given Community farmers. Although New Zealand is not happy at having to ration its shipts to the UK to precise monthly quantities, it recognises that this is preferable to being completely de-nied special access to the EEC. Until the row is settled, however, there is always the risk that France might escalate the conflict and refuse to continue the month-bymonth agreements.

Mr Walker, therefore could come under increasing pressure to take a more benign view on the question

Eta terrorists are closer than ever to making peace, writes Tom Burns in Madrid Jagged Basque jigsaw slowly comes together

SLOWLY, with extreme caution, of Bogside and it was the the jagged pieces of the Basqua largest anti-Eta turnout ever jigsaw puzzle are being put in place. At no stage since the youth, Sr Migual Echeverria, organisation Euskadi ta Aska-21, was released unharmed tasuna (Eta)—Basque Homeland after a week's captivity, and Liberty—took up arms 24 reportedly on payment of a years ago here the prospects for substantial ransom.

Sr Carlos Garaikoetx (right), head of the average on payment of a years ago here the prospects for substantial ransom.

m proposing tripartite talks which aim to involve his own regional executive, the Madrid Government and Herri Batasuna (HB)—the People's Unity Party—the political arm of Eta.

Last week Sr Garaikoetxea dis cussed his conviction at length in a private meeting in Madrid with Prime Minister Felipe Gonzalez. On Sunday, he met two HB leaders, who called on Sr Garaikoetxea for private talks at his official residence in the regional emittal of Vitaria. the regional capital of Vitoria.

Political force

The radical HB coelition. which polled more than 200,000 votes in last October's elections votes in last October's elections to consolidate itself as the third political force in the area behind Sr Garaikoetxea's Partido Nacionalista Vasco (PNV) and the Socialista, systematically boycotts officials functions and institutions and is normally averse to private political broking hroking.

Sr Garaikoetxea believes that the current political climate, in the wake of October's landslide electoral vic-tory for the socialists, presents an opportunity which cannot be ducked. The pecification of the region or an end to Eta violence the different terminology usually marks the dividing line between the Madrid and the Basque politician—is the single most important challenge facing Sr Gonzalez'a Govern-

Radicals

In spite of the habitual dis-missal by HB radicals of all Madrid politicians as essentially Spaniards, the fact is that the Socialist Government's rise to power constitutes the final burial of Francoism, which was the casus belli of the original Eta violence. This changed political frame-

This changed political framework nurtures what some moderate Basque leaders see as a definitive shift in the mood of the radical nationalists. Above all, there is what some perceive to be a palpable sense of exhaustion over the violence. On Sunday, for instance, 12,000 people staged a marcir in San Sebastian to protest at the kidnapping by Eta of the son of a prominent local industrialist. San Sebastian is some trialist. San Sebastian is some-

The lifting of bans on Madrid and the espouse Basque indepenpolitical arm of

region. A new definition of the powers of the locally organised Basque police force.

A reappraisal, on an indivi-dual basis, of imprisoned terrorists who disavow violence.

There is more than a pas There is more than a passing similarity between Sr Garaikoetxes's proposals and what has long been known as Ent's five points—the organisation's own offer for a ceasefire. Each of the points is rephrased, gains added nuances and is served up in e form more acceptable to Madrid.

Opinions

Thus Eta's nebulous demand for "an improvement in the con-ditions of the Basque working class" is turned into a straight halt to shootings and bombings as a gesture of good faith on the part of the terrorists.

The "right of self determina-tion" becomes the acceptance that such opinions are legitimate

adjoining province—loses its acrimony.

Sr Carlos Garaikoetxea a pacinication of the area looked so promising.

Accordingly, Sr Garaikoetxea, peace in the Basque country have never been and HB on five specific points which together form an overall peace plan. These are:

The has taken a major initiative in proposing tripartite ralks.

Accordingly, Sr Garaikoetxea, peace in the Basque country have never been so promising. For this reason, he has proposed talks involving his country have never been

political arm of Eta, the Basque terrorist A commiment to resolve the disputed status of Navarre, which is not part of the Basque autonomous the Basque terrorist organisation. Eta seems willing to negotiate, but the group is far but the group is far from unified.

> The point dealing with the local police seeks the gradual substitution by Basques of the Guardia Civil and the National Police Force in local policing, in place of Eta's blanket demand for a "withdrawal of the occupy-ing forces."

The final point, on imprisoned terrorists, attempts to satisfy the maximalist demand for an immediate amnesty for some 500 ailed Basques.

It is the first time that Sr Garaikoetxea, and by extension his majority PNV party, has proposed such an initiative. The timing is as much dictated by the honeymoon period with the Socialist Government as hy tell-tale signs of splits in the hardline military wing of Eta.

Strategy

Sr Garalkoetxea and his col-The Navarre question—Sr ment have reason to believe that Garaikoetxea was born in this significant veteran members of adjoining province leave Eta, the so-called Historicos, are suing for peace.

This is mirrored by a public debate in the HB leadership on what strategy the radical nationalist coalition should pursue against a Socialist Government in Madrid. Ever since Sr Gonzalez's electoral victory, west France which Eta have traditionally used with virtual victory. prominent HB members have traditionally used with virtual issued less hot-headed state-impunity. The Eta leadership is ments, implying that Eta is understood to be acutely aware willing to negotiate and that of a hardening in the French more importantly, Eta's original authorities' attitude.

admittedly the most important, while the two other groups, the so-called Autonomous Commandos and what is known as the "Eighth Assembly" of the political-military wing, do not problem."

or not, let alone agree on any. Whetever the outcome, the belief in Madrid and in Viloria is that the coming weeks will mark a watershed in the long history of the "Basque problem."

have front organisations of any credibility.

In the military wing, there

is a belief that certain historicos are willing to come in from the cold. But it is by no means clear that these veterans can pull the full weight of the organisation behind them. Meanwhile Sr Gonzalez does

have at least two trump cards have at least two trump cards which the previous centrist administrations in Madrid lacked. In contrast to other national parties, the Socialists have a strong power base in the Basque country, as indicated by the good result they achieved in the area in the October alactions.

This means that tripartite talks can start at the localised level of the PNV, HB and the Basque Socialist representatives
—something Sr Gonzalez is
believed to be certain to insist

New rapport

opening maximum hid.

The problems in getting a serious negotiation off the ground are, of course, formidable. The most daunting involves the many-beaded hydraof Eta itself, as there are three distinct groups of

of Eta itself, as there are three distinct groups of gunmen competing among themselves and long used to violence and clandestine activities.

HB can only claim to speak for the military wing of Eta, admittedly the most important, while the two other groups, the so-called Autonomous Com-

Doubts on shaky team for Lisbon Cabinet

By Diana Smith in Lisbon

PORTUGAL'S POLITICAL crisis is deepening while President Antonin Ramale Eanes tries to decide whether to approve a lack-lustre cabinet to replace that of Sr Francisco Balsemao, who resigned last month.

The President appears to fear that Professor Vitor Crespo, a Social Democrat and one of Portugal's least successful education ministers, and his cabinet of ministers, and his cabinet of less experienced members of the shaky Democratic Alliance, may not be able to cope with the country's serious economic problems. Meanwhite, be has consulted Sr Joao Salgueiro the ontgoing Finance Minister, and the governors of the Bank of Portugal about the gravity of the financiel situation. In the absence of a 1983 budget, Puringal is being run on meagre doses of admini-

on meagre doses of admini-strative funds and whatever short or medium-term loans the central bank can arrange. President Eanes may not settie the fate of Professor Crespo's cabinet until late

this week. Whatever be decides, Portugal's crumbling economy will not be out of Portugal ranks now as

Western Enrope's poorest and least productive nation. Its debt to foreign banks amounts to \$12bn, and further political infighting could prove costly. President Eanes has

apparently been told by the anthorities that, while the country could scrape hy during the administrative biatus caused by a snap general election, it must then hare a government with enough weight to form economic policies that will prevent financial turmoll in

? *5000* i HE OPEN-MIND

NCR 5000 is the system that doesn't turn branches into building sites while it's being installed.

In fact, installations are so simple (and inexpensive) there's no need to disrupt normal working at all.

Designed to give complete control over information at local level, the system consists of compact units rather than bulky cabinets. And it uses simple, low-cost cable so equipment can be moved around to

where it's needed. The NCR 5000 allows Notice to Customers BRANCH **CLOSED FOR ALTERATIONS**

counter clerks to give instant answers to customers (for example, savings and mortgage balances). It makes entries in pass books. Balances each teller's takings. And allows local managers to monitor cash flow and trends.

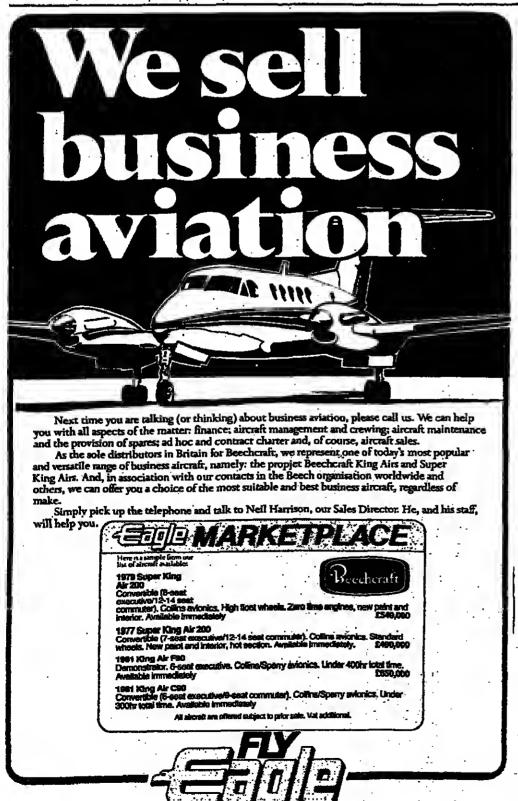

It can also compile individual investment plans without needing specialist staff on hand.

Take a closer look at the NCR 5000. For a system that doesn't only accommodate growth. But actually helps you achieve it.

The full facts are available from Andrew Chard, NCR Limited, St. Alphage House, 2 Fore St., London EC2Y 5DS. Or telephone Andrew on 01-638 6200.

The dollar bad soured to an uncompetitive peak of Y277 about Y210 or Y200 could be before starting a sharp fall in the first week of November.

the first week of November.

This turning point coincided with the election of a new U.S.
Congress, with an enlarged bout y5 of its value. While the consensus among foreign exchange dealers atill favours protecting U.S. industry from Japanese competition. It also is now less talk about a return followed close on the heels of the Y200 level which premarks as the properties of the Y200 level which premarks as the properties of the Y200 level which premarks as the properties of the Y200 level which premarks as the properties of the Y200 level which premarks the Mr Nakasone's appointment as vailed in 1981.

Caribbean countries flock to IMF

as economic gloom deepens

rise in imports, the (current account) deficit is expected to

for the other islands in the re-gion, as a look at the following

selection of examples will show.

Jamaica got SDRs 19.4m in August to compensate for a fall

in earnings, after baving obtained extended credits and compensatory financing of \$698m in 1981.

Haiti, the poor cousin of the Americas, had earlier obtained IMF credits of SDRs 34.5m. The Dominican Republic has

negotiated a three-year ex-tended fund facility of \$466.5m.

Besides the growing moun-tain of debts which have to be

serviced to prevent default and a loss of creditability, regional economies are facing chronic

economies are racing enronce sbortages of hard currency to finance basic imports. Widening trade gaps, current account deficits and increasing unem-

ployment add to their problems.

Efforts by these countries to borrow their way out of trouble are likely to be unsuccessfull, Guyana, for example, won credits of \$130m intended to support the economy to allow the actions of percent real

it to achieve 6 per cent real growth in gross domestic pro-

duct in the year to last June. Instead there was a decline and

CUBA'S recent decision to balt tourism as well as a continued repayments of \$1.3hn (£813m) rise in imports, the (current

started to predict that a far more "realistic" dollar of about Y210 or Y200 could be

ENERGY REVIEW

A new broom at the U.S. Energy Department

By David Fishlock, Science Editor

DONALD PAUL HODEL is an build a new consensus on agreeable lawyer in his late energy policy in the U.S." He 40s who has just been confirmed says he is appalled by the as bead of one of the world's biggest research and development agencies. His boyish pleasure on the day of his confirmation by the U.S. Senate, early last mooth, left no one present in doubt it was the Job he wanted and was yearning to

But Mr Hodel's perception of the task ahead will evoke sur-prise in many quarters and squeals of anguish in others. For be is passionately detarmined that an agency widely believed to be doomed and soon to be dismantled shall survive and thrive under his leadership. "I have expunged the word dismantlement from my vocabulary."

Donaid Hodel is the new U.S. Secretary for Energy. He takes the belm of a team that was badly demoralised by the facts that his predecessor—James Edwards, a dentist by training—had spent nearly two years dismembering the Department of Energy on orders from tha White House and was evidently No less evidently, that work excites and inspires Mr Hodel. His career since the late-1960s

An international perception of energy

as chief executive of one of the biggest U.S. state-owned electricity companies, Bonne-ville Power in the north-west. He has advised the National Science Foundation, belped govern the Electric Power Research Institute—the U.S. elec-tricity industry's big research co-operative—and in 1980 was elected to the board of directors of the U.S. National Com-mittee of the World Energy

Thus be has an international perception of energy—its use more than the same old enthu-and its abuse. He comes to the signs for high-technology solujob "with the hope I could participate in the process of rationalising U.S. energy policy." That means the Department of Energy must be well-managed and properly related to the Departments of Commerce and Industry, the two which expected to pick up the big pieces of a dismembered Energy Department.

"We need to work hard to tions to energy problems. The opposition claims that low-opposition claim

was in the very week last month that Congress was trying to ditch the 380-megawatt Clinch River prototype fast breeder reactor on which about \$500m has already been spent.) An abandoned energy ven-

says he is appalled by the

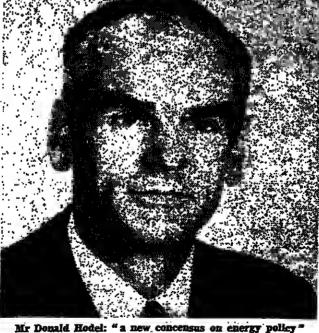

enormous effort wasted on energy R and D projects the U.S. has abandoned. (This

in terms of output, Mr Hodel contends. Projects that start and do not finish leave a political residue. This in turn bas a destabilising effect on sociaty, he says. What are the prospects for

getting consensus on energy policy in a nation which still sees cheap energy as its birth-right and remains widely apprebensive about nuclear power? Mr Hodel says "it is my unproven and improveable conviction" that the opportunity today is better than when the Reagan Administration first came to

His recent record—for which be has received medals—focuses strongly on conservation of energy. But it also confirms a readiness to talk with the opponents of big energy projects—less from the standpoint of trying to change their minds but from the desire to find areas of agreement on the fringes of the more contentious issues of the more contentious issues and to try to tease them to life. has been closely bound up with He already has had and will energy, including some years continue to seek, meetings with the environmental groups which have frustrated so much of tha energies of this department for well over a decade.

The U.S. Department of Energy was originally the U.S. Atomic Energy Commission, which in the early 1970s became the Energy Research and Development Administration. But the acronyn Erda failed to convince the rising tide of oppo-sition to the "energy com-panies"—oil and coal as well as nuclear—that it was anything stasts for high-technology solujob with the hope I could partions to energy problems. The

office workers alone. (For comparison, Britain's Department debate which wrested control of Energy employs 1,100.) It of nuclear weapons from the acquired major regulatory functions. It built up—and is still in the civil sector. Mr Hodel continuing to expand—the pays he has no doubt the U.S. Strategic Petroleum Reserve. Its public wants it to stay civil. He will continue to expand—the bigs and the civil sectors. forecasted budget for 1983 is nearly \$12bp

Under Mr Hodel's predeces-sor, it decontrolled the oil price, shedding more than 200 sections of federal regulation and with them some 3,500 staff (17 per cent). It claims that by "sharply reducing federal in-tervention in energy markets," it has cut its budgets for the of \$10.4bn compared with the forecasts of the Carter Administration. On the other hand, it has doubled the Strategic Petalson Because and plant is roleum Reserve—and plans to triple the present two-month reserve by 1990.

But half of Mr Hodel'a budget is devoted to an activity having no counterpart in Britain's Energy Department. It inherited from the Atomic Energy Commission responsibility for developing and making anchors weerens including ing nuclear weapons, including the fissila materials they need. ing naticear weapons, including the fissila materials they need. be the emphasis placed on interNoone recently has been left national collaboration in any doubt that the Reagan advanced energy projects. That Administration is expanding U.S. Government is aager to Administration is expanding this activity, with major new weapon programmes such as MX and cruise missiles.

wants it to stay civil. He will continue to oversee the big production and assembly operations as well as three major national laboratories — Los Alamos, Lawrence-Livermore and Sandia—specialising in nuclear weapons,

But — Los Alamos, Lawrence-Livermore and Sandia—specialising in nuclear weapons,

But nuclear weapons devel-

opment is the sharp end of what he sees as the dominant future role of his department, namely "long-term, high-risk, high-payoff technologies," In short, it is reverting to the role of Frid in the mid-1970of Erda in the mid-1970s. There will be two crucial differences from the earlier agency, however. One is that it

will concentrate on areas industry itself sees as the energy technologies of the future and eschew dilettante activitles "just to please outselves," as Mr Ken Davis, Hodel's deputy until last week, puts it The second big difference will tributing.

Soon after World War II, the project to "go where the reactor to rival the pressurised and Japan.

monay seems to be," Mr Hodel water reactor (PWR). Mr Ken promises. Davis, doyen of the miclear ex-At the State Department, the Office of Energy Technology Co-operation is charged with forging the links between nations. Its director, Mr Martin Prochule, says the Administrations of Millions of Mil

tion's enthuslasm for - areing budgets is the big incentive. One big U.S. programme for which Mr Prochnik has high hopes is controlled nuclear fusion, the release of energy from the fusion of light atoms. U.S. hasion physicists would like to build a \$50n prototype fusion reactor in the 1990s. What to build it from—to withstand stellar conditions of tempera-ture, pressure and radiation is still unresolved. So it is pro-posed that the U.S., the EEC (Euratom) and Japan might collaborate in a fusion materials research programme, at a cost the U.S. puts at "hundreds of Extraction of oil from shale

Extraction of oil from shale is a technology in which he believes interest is picking up outsida tha U.S., often in smaller countries which import their oil at present. The Synthetic Fuels Corporation, the U.S. agency charged with sponsoring first-of-a-kind industrial plants in this field, is already discussing with West Germany and Japan possible participation in a U.S. project.

despite the participation of Japan and West Germany. Now the State Department is eveing such countries as Britain, with a "hot rocks" project in Corn-wall which has attracted about £10m of government funding. The project which has drawn

can be staged safely. Other nations have already subscribed one-third of the \$90m budget of this programme over the last three years. Mr Prochnik hopes to negotiate a wider collabora-tion for the future. Austria, Finland, West Germany, Italy, Japan, Portugal, Spain. Sweden. Switzerland and the UK have all

The official view of the PWR. however, is that "the basic system seems to be perfectly adequate," Mr. Davis says. The department is neither demanding nor funding any revolutionary changes. The accident to a PWR at Three Mile Island in 1979 is certainly proving an impediment to progress—"an unianced boil," as one muclear industry executive describes it. "But it executive describes it. But it seems to me that even without it we'd be in essentially the same situation as we are today." Mr Davis says. The U.S. electricity supply industry is experiencing a growth rate less than half that of the three decades until the mid-1970s. Westinghouse and Mitsubishi, backed by U.S. and Japanese electricity companies, have just begun to collaborate in a \$150m programme to develop a FWR that will meet both Japanese and U.S. future needs, and fend off German FWR competition in Japan. One hig aim is t get 20-25 per cent better utilisation of the reactor, by stretching to

as much as two years the intervals between refuelling. The Department of Energy also supports R and D on higher-performance PWR fuel.

greatest interest overseas, however, is Loft (Loss-of-finid test), a facility in Idaho where major accidents in nuclear plant can be staged safely. Other teaching the contentious use energy project is undoubtedly the Cliuch River prototype fast treator which has hovered between life and death for six treats. Its unononents see it as years. Its proponents see it as the reactor of the future, far more fuel-efficient than the PWR can hope to be. Its detractors condemn it as a "technological turkey" and argue passionately that its neck

How many hours a day do you spend on your export business?

The life of an exporter can have its worries. Nowadays, it seems the only safe assumption that an exporter can make is that in today's world nowhere is safe.

Companies in stable countries can fail just as easily as governments in shaky ones.

And violent, natural catastrophes can happen anywhere on earth, often bringing financial disasters in their wake.

This could be the reason why last year some 11,000 exporters insured their exports - and ensured

themselves a proper night's sleep-through ECGD. Last year, too, ECGD paid out over £300m

in insurance claims. An ECGD policy not only guarantees you up

to 95% repayment if an overseas company or country should fail to pay for your goods or services. It may also help you to obtain better rates of

interest for export finance from your bank manager. Last year, in fact, banks were lending to ECGD

policy-holders at not more than five-eighths per cent above base rate.

Which not only meant "cash on shipment" but saved them money into the bargain.

Get in touch with us at ECGD soon if you're having sleepless nights over your exporting.

We can't reduce the risks of being in the export business.

But we can reduce the worries of getting paid.

Export with confidence.

political bar to be lifted

By Ann Charters in Seoul

THE BAN on political activities by some former South Korean politicians will be lifted to advance national cohesion and unity, said President Chun Doo Hwan in his New Year policy address to the National Assembly.

Assembly.

About 560 people, including the heads of dismantied political parties, have been barred from engaging in political activity since President Chun assumed power in 1930. This measure, together with the December release of Korca's most prominent dissident, Kim Dae-Jung, for medical treatment in the U.S., appears to signal a slightly more tolerant stance towards opposition.

On the South Korcan eco-

on the South Korean economy, President Chun indicated that through Government fiscal, monetary, and other policies regarding price stability, Korea should be able to obtain better results in 1983, intring present worldwida economic difficulties into an opportunity to eatch up with the industrially advanced nations. Korea achieved 6 per cent growth in GNP in 1982, while bolding inflation to less than 10 per cent.

The last major commercial bank will be denationalised and efforts are to be made to promote the independent operation of the banking system as

Oueensland in river aid call

By Colin Chapman in Sydney FEDERAL Government aid is being sought by Queensland's state premier. Mr Jo Bjelke Petersen, for an A\$1.4bn (2838m) scheme to reverse the flow of three rivers, to bring permanent relief to part of the Australian state's drought-stricken interior. A preliminary study, published this week, said the scheme was "physically

possible."
The scheme is being proposed by engineering consul-tants. Cameron McNamara wbo say that although possible, costs will be high.

Mr Bielke Petersen will meet

Nyerere has had to shelve ambitious plans for motor manufacturing, writes John Kerr, recently in Dar es Salaam

Foreign exchange blow shatters Tanzania's industrial dream

IN THE mid 1970s, Tanzania improvement. IN THE mid 1970s, Tanzania improvement. The future of ages giva Leyland Albion two duction began in January 1982, the only other heavy vehicle headaches. the Prima Minister, Malcolm Fraser, for talks on the plan in Canberra next week. It involves turning the flow from the Tully. Herbert and Burdekin rivers so that their waters move inland instead of into the Pacific ocean.

TECHNOLOGY

THE FUTURE OF THE COMPUTER AIDED DESIGN CENTRE IS ALMOST DECIDED

Cambridge Centre should fetch £10m

BY RAYMOND SNODDY

TALKS have already begun with potential buyers of the Cambridge Computer Aided Design Centre, the Department of Industry-run body which is the leading research organisation of its kind in the UK.

The centre is scheduled to be sold to the private sector Abril. Although it is diffisation whose greatest asset is probably the expertise of its staff, the centre will probebly fetch in the region of £10m.

Mr Kenneth Baker, Minister for Information Technology, said last March that it was time that the centre, set up by the old Ministry of Technology in late 1968, became a fully commercial organisation.

Mr Percy Hammond of the centre said: "There has been widespread interest from computer companies both in this country and the U.S. and from companies in the engineering field which recognise the value of CAD and from British ven-ture capital funds."

The Cambridge CAD centre

specialises in applying computer techniques to industrial design, manufacturing and testing. It is probably best known for software often produced with in-dustrial partners—for mechanical and electrical draughting, to produce tape for numerically controlled machine tools and to design complete process plant.

Mr Hammond, one of six civil servants on the staff of 150, said he believed that the Centre could succeed as a stand-alone operation in the private sector.

Negotiations are still continuing but the Department of Industry believes that the Centre should be controlled by British interests and that its well-defined identity should not be submerged within a single large company.

Ownership

What is likely to emerge is that three, or possibly four groups, will share ownership of research institution which has been becoming more commer-cially orientated over the years. Because of the nature of its products it has always been closely involved with industry.

Mr Percy Hammond, head of the CAD Centre, with Mr Fred Chiles, its marketing and sales manager, in front of a twin screen Dlad 2D draughting system: "There has been widespread interest in the Centre," Mr Hammond says

computer manufacture, users in the manufacturing or process plant industry and venture capital. Within the groupings there could be more than one company or financial institution so that the equity is likely to be widely spread. An obvious candidate for the computer manufacturing group would be ICL which has been involved with the Centre almost from the beginning. beginning. Apart from the civil servants all the Centre staff are

technically ICL employees. In addition, or more possibly an alternative, Prime Computer of the U.S. has recently taken on contractual relationships with the CAD Centre by buying Compeda of Stevenage which is responsible for marketing some of the most important Centre

The sale is likely to involve Department of Industry stipulations to protect the interests of those who have bought Centre products while it was a Government-funded research

institution. **Positive**

Mr Fred Chiles, sales and marketing manager of the CAD Centre, said that the staff have over the past year been re-orientating themselves mentally for the passage to the private sector and most are positive about the proposed change. An informal poll produced a clear majority in favour of pri-

tor, have been given company tor, have been given company cars, put on commission and told to get out on the road and sell

The amount of bespoke work for individual companies—such as the three dimensional representation of a last for shoe design produced for Clarks— will be reduced. Although such projects were costed commer-cially, Mr Chiles points out: "It's high risk and at the end you don't have a product that you can sell."

The Centre is going to concentrate more single-mindedly on its most commercially successful products—the range of software for the process The percentage of running costs covered by sales has been products such as Plant Design missing and now stands at 50 Management Systems (PDMS).

Per cent—£2m a year towards per cent—£2m a year towards total costs of around £4m.

Management Systems (PDMS).

A business plan is being concentrated on new products of the equity of the Centra to financial self-this year—to fill in gaps and sufficiency within two years.

Already the number of direct systems.

For large scale plant, such as oil refineries or nuclear power stations, the aim is to have an integrated range of programmes which would take the designer from original conception to a finished design that could be

built from. "We think we are well placed for privatisation. We have exist-ing products already making money and new products on the way," Mr Chiles sald.

The Cambridge CAD Centre was set up with 20 people and an Atlas computer (the UK's famous commercial mainframe) in part of an old aircraft factory in the days when Mr Anthony Wedgwood Benn was Minister of Technology.

"The whole thing was set up "The whole thing was set up 10 years before the market was ready for it. It was absolutely fantastic—a gamble that has really paid off," said Mr Brian Gott, who joined the Centre early in 1969. He is now head of the Centre's Consultancy Service, which gives indepen-dent advice on CAD to com-penies and operates as a

The CAD Centre Consultants also run the Government-sponsored awareness and sponsored awareness and experience centres where mana-gers can get a feel for what computer-aided design can do. Mr Gott bas about 10 companies —between 30 and 40 individual managers—a month attending his CAD awareness presenta-tions. He believes that there is tremendous pent-up demand for computer-aided design which will turn into orders when recession ends and com-panies turn to high technology

their products. • The way in which computer systems are being integrated to give rise to the "electronic factory of the future" is shown by a new release from Counting House Computer Systems of its Integrated Business System, IBS, which runs on the same computer hardware as its existing CAD/CAM system Inte-grated Technical System, ITS.

to meet rising demand for

Both systems run on Prime computers under the Primes operating system and an ITS user with a small Prime machine can now run drafting NC tape preparation and business systems on the same computer. Counting House is a member of the Cope Allman

PERSONAL COMPUTERS

IBM's sprat goes hunting mackerel

THE IBM Personl Computer believed to have a better per(PC) launched in the UK today, is to all intents and purposes identical to the machine which has been available in the U.S. for the past two years.

Mr Alan Wood, managing director of Digitus, one of the five authorised dealers in the London area, said: "We have compared the Europeon version with an imported U.S. model and have not been able to discover any real differences."

The European model being built at Greenock will, of course, run on 240 volts rather than the U.S. 100 volts.

What IBM describes as the minimum self sufficient system

What IBM describes as the minimum self sufficient system

We have the first personal computer to be marketed effectively as a commodity.

It is generally thought that the PC is light on fast memory—it starts at only 64 thousand bytes, compared with 128 thousand on the Sirlus and best too low a disc capacity for soma big business applications.

The PC is also thought to be some of the competition.

The PC is also thought to be some of the competition.

mitter with microprocessor control allows 4,000 selective calls and also permits group calling, call diversion, absence diversion and up to 68 signal or alarm inputs. More on

Electricity for industry. The vital facts every works director needs to know.

In tough economic times, it's important to make optimum use of all resources: plant, materials, labour-and energy

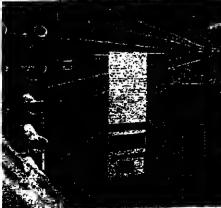

That's where electricity is ready to help by offering a wide variety of cost-effective equipment and techniques for both factory services and production processes.

Just take a look at the many ways electricity can help reduce the cost of factory services, for example.

Electricity. Reduced costs.

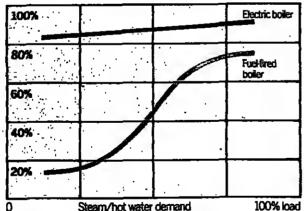

As the figures show, many companies have found that battery electric trucks are cheaper to run than diesel or LPG. For space and water heating too, there is a wide variety of systems available, that are inexpensive to buy and to run. They are easy to install, simple to control and can often operate on low cost night-rate electricity.

Electric steam boilers sited at the point of . use can reduce steam costs by allowing the main boiler to be closed down at times of low demand. See how the efficiency of an electric boiler stays high whatever the demand.

Left: Electricaire heating by Unidare paid for itest in just three years at A.E. Aspinali Ltd. and improved the working crimination of an Right: Henry Watson Potteries Ltd. has reduced energy costs and cut drying times with the installation of an electric heat pump supplied by Westair Ltd.

Electricity. Better energy management.

Electrical equipment gives highly efficient energy conversion at the point of use. Operating alone or in tandem with fuel-fired systems, it can often give better overall efficiency and lower operating costs.

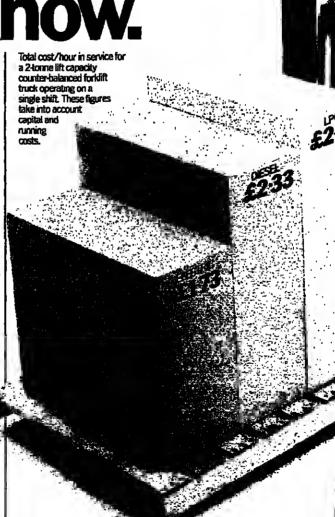

Electric heat pumps are recycling heat that would otherwise be lost to the atmosphere. One

pottery company has cut its energy costs by 45%, and a manufacturer of headwear has cut drying costs by up to 75%.

Electricity. Improved environment.

Whatever the application, the environmental advantages are clear to see, hear and feel.

You and your workforce will appreciate the deaner, quieter working conditions.

Electricity. Energy for today and the future.

uncertainty of future energy supplies. Electricity is an energy source you can rely on. It means you can plan with confidence.

Engineers. They're ready to help you make a detailed assessment of the most cost-effective ways you can use electricity.

REPUBLIC OF PORTUGAL GABINETE DA ÀREA DE SINES (G.A.S.)

> PREQUALIFICATION FOR MARINE WORKS CONTRACT IN THE PORT OF SINES

The Gabinete da Area de Sines (G.A.S.) invites contractors with experience in the execution of marine works, especially breakwater and quay structures, to present appropriate technical and financial data that permit G.A.S. to prequalify prospective bidders to undertake the forementioned works in

the Port of Sines. The planged works consist of: 1. Installation of facilities for initial

temporary coal unloading and future general and specialised

A) Construction of a breakwater with a total length of approximately 600 metres concected to the shore io average water depths of 22.00m.

B) Construction of quay struc-tures for temporary handling of coal, with a length of 220 metres to a water depth of 12.00m, to be used for bulk carriers up to 30,000 dwt.

2. Installation of coal unloading

A) Construction of a breakwater with a total length of approximately 1.100 metres connected to the shore to average water depths of 25.00m.

B) Construction of quay struc-tures for coal handling with a length of 345m in a water depth of 18.00m, to be used for bulk carriers up to 150,000

3. Rehabilitation of the West Break-

A) Reconstruction of the outer slope of the West Breakwater consisting of rockfill and slope protection approximately 800m in length, in water depth of 35 to 45 metres

B) Coostruction of a submerged breakwater with a length in the order of 220m in average water depth of 17m.

The works include dredging and fill

The harbour equipment for moving of

Prequalification will be fundamentally based on three parameters:

 A) Capacity to undertake the described works as evidenced by records of previous experi-ence in similar projects. B) Presect capabilities with respect to personnel and equipment suitable for the

C) Fioancial capacity.

Among the priority Items we include the degree of Portuguese participation and the shortest time for realisation of the works under item 1.

The works described under items 1, 2 and 3 above may be issued in different phases or simultaneously and may be subject to one contract or several

The date of issue of tender document is foreseen to be 28.2.83.

The information for prequalification and details about foreign participation shall be submitted on prepared forms, which can be obtained from G.A.S. at the following address from 18.1.83

Britain's newest exchange handles voice and data.

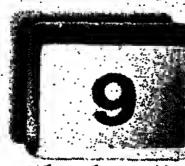

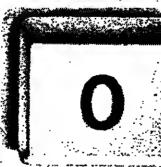

It integrates office communications into an

entire network. Approved by British Telecom,

it's available now for 100 to 3000-plus lines.

For further information, contact: Telephone Rentals plc, TR House, Bletchley, Milton Keynes MK3 5JL Telephone: Milton Keynes (0908) 71200.

Telematic DX from Telephone Rentals

eren da can be miles ar We can busines

and we ig 1110/i

Τh

WE'LLHAPPILY INTRODUCE YOUTOTHE EIGHTH.

Laying claim to the title does, we know, invite criticism.

Yet it would be hard to name anything that's more deserving than the revolution in international telecommunications technology.

Not only is it producing achievements which give the world plenty to talk about, it goes one better.

It actually benefits business.

And no one more so than the businessman with overseas offices to keep tabs on.

At last, he's able to communicate with even the most far-flung outpost.

He can transmit or have immediate access to huge wodges of information.

He can take action in, say, London. And down in Hong Kong, they'll know he's taken it. In seconds.

The means to do this (and more besides) is the direct result of a revolution in international telecommunications.

A revolution, we at British Telecom International, helped to make happen.

A revolution that we've turned into practical reality. As the services described below indicate.

Through Telex Plus Store and Forward, an operator can now forward a message to a computer which holds it for her, then transmits it as soon as the lines become free.

To anything up to 1,032 destinations automatically.

Through the International Packet Switching Service, data can now be sent office-to-office around the world almost instantly. And, significantly, from computers operating at different transmission speeds.

Through SatStream, our satellite based system, it will soon be possible to transmit the equivalent of a plane-load of computer data, plans and facsimiles across Europe. In minutes.

And through the Maritime Satellite Service, not only can instant contact be made with a ship anywhere in the world, even day-to-day issues, like the crew's wages, can be handled by a computer thousands of miles away.

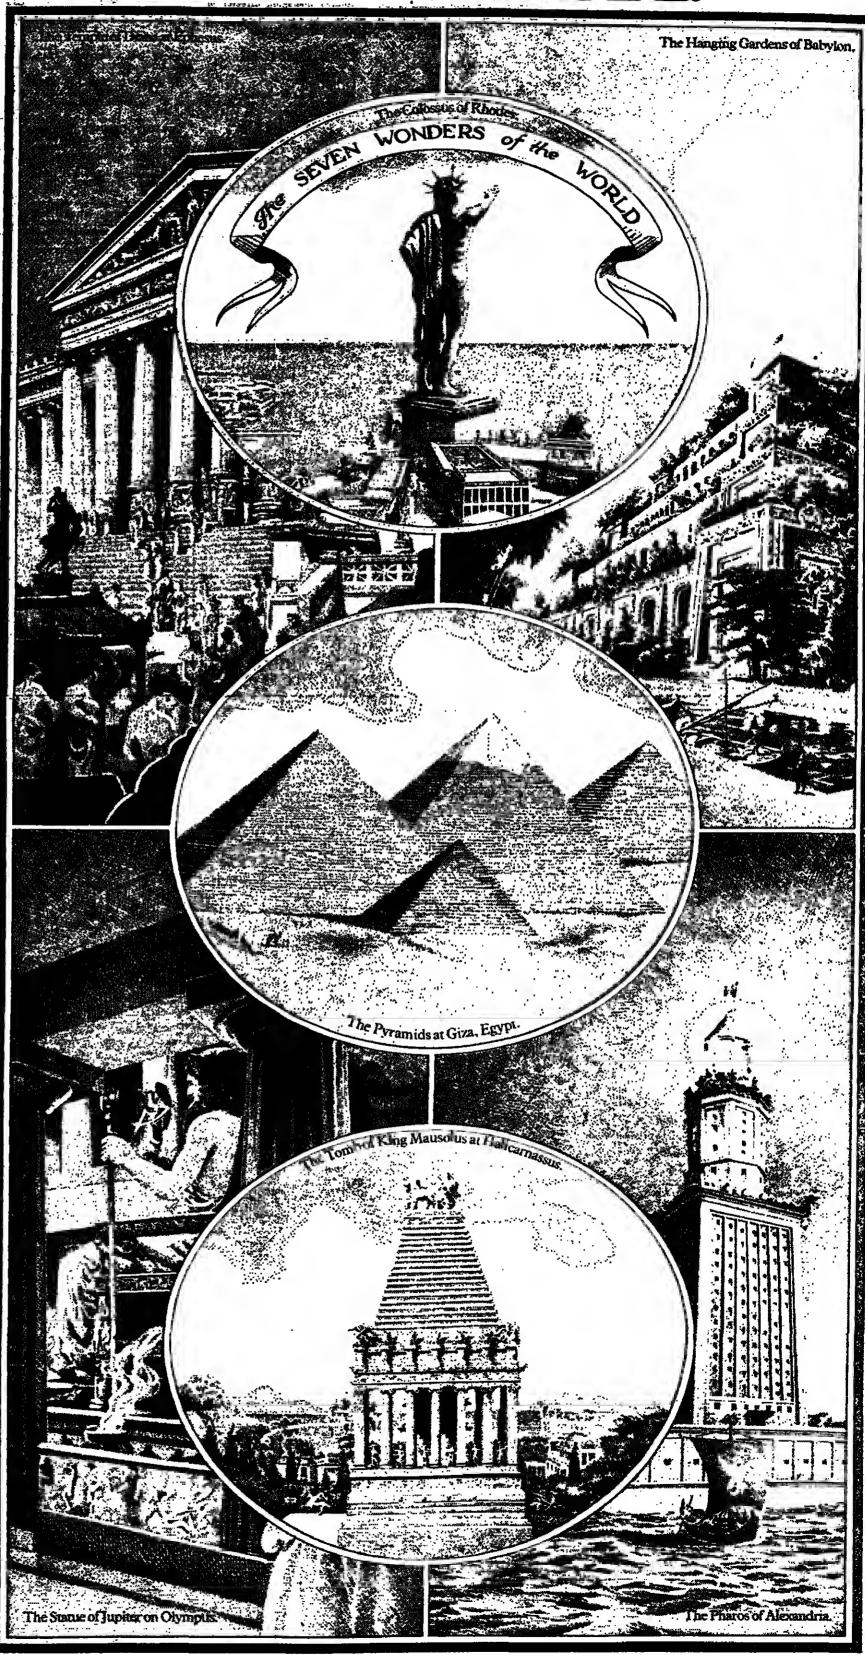

These services are examples of what we can do to sharpen your international business communications.

Give Paul Edwards a call on 01-936 2164 and we'll demonstrate what we could do for your business in particular.

Who knows, we could achieve wonders.

Emerson Associated. advisers in countertrade and Mr Gerry Draper has been

appointed adviser—international sales and marketing for Avis in Europe, Africa and Middle East. In December Mr Draper retired from the board of British Airways where he was managing director, intercontinental division of the continental d sion, chairman of British Airways Tour Companies and ways Tour C. British Airtours.

Mr Ronald Williams has been appointed managing director of EDWARD MANSON AND COM-PANY, banking division Manson Finance Trust.

Chairman of Lopex

Mr David L. M. Robertson has Mr David L. M. Robertson has been appointed a director and chairman of LOPEX, a marketing communications industry leader. Mr Robertson is chairman of MK Electric Group and Provi-dent Mutual Life Assurance Association. He is also a director of Berry Bros and Rudd, The Rouse Company (U.S.) and Kleinwort, Benson, Lonsdale.

GEO. HOULTON & SONS (HOLDINGS) has appointed Mr G. H. Houlton, Mr G. D. Ford,

specialist Mr R. Mason and Mr J. Stade as directors of Geo. Houlton & Sons, building and contracting company of the Houlton Group. Mr F. W. Bright feet are appointed. David Heulton are appointed directors of Geo. Houlton & Sons (Plant and Transport). These appointments follow the retire-ment of Mr George Houlton and Mr Dick Houlton, both of whom remain on the holdings board. Mr D. G. Robson has been appointed company secretary to the three trading companies in addition to his present appointments to the holding company.

Mr Graham Kenward has been appointed sales director of TARGET LIFE—a subsidiary of J. Rothschild and Co. He was previously national sales manager of Barclays Life

Mr Peter A. Tett has been appointed divisional chief execuive of the security division of

LIN PAG PLASTICS (GB) has appointed Hr Alian Appleton as managing director of Nationwide Packaging Distributors. He was managing director of Lin Pac Machinery Services, but will remain a director.

Mr F. C. Thackwray, director south west region, international Computers, has been appointed director, management services of the AUTOMOBILE ASSOCIATION and well take the big services. TION and will take up his new post in February.

Senior posts at Sun Life

Mr Peter J. Grant has become chairman of SUN LIFE ASSUR-ANCE SOCIETY following tha retirement of Mr Philip G. Walker, as foreshadowed last August. Mr R. M. M. Pryor, becomes deputy chairman in succession to Mr Grant, and Sir Godfrey Agnew, is made vice-chairman.

Mr Norman Whalley has been appointed parts director of FIAT AUTO (UK). He will be based at Fiat's parts operation at Warrington and succeeds Mr G. Leonelli. Mr Whalley joins Fiat from FTT Automotive Components in Italy.

Mr Brian Hughes has been appointed a director of HOLTS BLENDS, a wholly-owned subsidiary of Carless, Capel and Leonard. Mr. Hughes, previously marketing manager, will con-tinue to manage this area in addition to his responsibilities as a director.

Mr C. J. R. Sharman has given up his partnership with Montagu Loebi Stanley and Company to become managing director of BROWN SHIPLEY DEVELOP-MENTS. He will remain a consultant to Montagu Loebl

Chairman designate for Wimpey

Sir Reginald Smith, chairman of GEORGE WIMPEY, has re-tired. Mr Cilford J. Chetwood, chief executive, has been appointed chairman designate.

Cambridge University's com-puting service, has joined the DEPARTMENT OF INDUSTRY DEPARTMENT OF INDUSTRY as a special adviser on information technology matters. He will advise the Department on IT matters generally, with particular reference to following up the Alvey Committee Report, "a programme for advanced IT," and also to educational computer software. He will work closely with Mr Kenneth Baker, Minister for Information Technology. Dr Hartley is a member of the Prima Minister's Advisory of the Prima Minister's Advisory Panel on IT.

Mr Archibald B. Murray, general manager (London) will retire from the ROYAL BANK OF SCOTLAND on February 28. He will be succeeded by Mr Ian Sinclair, at present manager at the bank's London, Drummonds the bank's London, Drummonds branch. Taking over as manager at Drummonds is Mr George Macdonald, currently a manager at Lombard Street. Further changes have also taken place at Lombard Street office where Mr John A. Barclay, manager, has been appointed chief City manager. Mr John Cameron, senior assistant manager at the senior assistant manager at the senior assistant manager at the office, has been appointed deputy chief City manager and Mr William H. Brown, Mr John M. Irving and Mr William F. Rebertson, assistant managers. have been redesignated managers, as has Mr Alastair R. Gemmell, who was an advances controller with the officials' personal staff in London.

Mr Michael Fetherston-Dilke has been appointed chairman of WREKIN CONSTRUCTION CO., a subsidiary of The British Elec-tric Traction Company. The appointment is part of reorgani-sation resulting from the recent sale of a majority interest in Murphy Bros., previously Wrekin Construction's parent company. Mr Fetherston-Dilke is an executive of the BET Group. He holds a number of other directorships in the organisation including the chairmanship of its waste-disposal activities.

Mr Michael J. Rowlands has been appointed a vice president of THE FIRST NATIONAL BANK OF BOSTON. Based at the bank's European head-quarters in London, he will be responsible for vendor leasing operations. He was vice presi-dent of Security Pacific Inter-national Leasing.

International Capital

Markets Dr David Hartley, director of

> The Financial Times is proposing to publish a survey on International Capital Markets in its issue of March 14 1983. The provisional editorial synopsis is set out below. INTRODUCTION International capital markets

MARCH 14 1983

entered a new era during 1982 with the insolvency of several leading international borrowers and a marked decline in interest rates. This produced a sharp contraction in the euro-credit market and one of the best ever years for international bonds. How will the markets cope in 1983?

Editorial coverage will also include:

The outlook for the world economy

The U.S. credit markets

The enrocredit market and the outlook for 1983

A look at the major international bond markets

The role of major official institutions in helping to sort out international debt problems

The prospects for offshore banking centres

Export credits

transform the face of buildings with sky-spanning suspended window assemblies. They turn squash into a spectator sport, through toughened glass back walls. They throw new light into homes with large attractive patio doors.

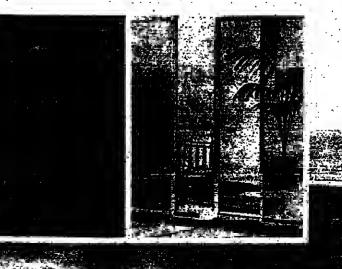

And that's just the start. Similarly, our toughened 'Armourglass' patterned glasses have created scope for imaginative designs wherever light with privacy or atmosphere is desired - and where safety is of prime importance. Shower screens and

doors, for example. All these glasses have an extra strength that no other can offer: the strength that comes from skills developed in making toughened glass over 50 years.

This strength is available to you, through the Pilkington Technical Advisory Service. So next time you have a call for toughened glass, call us. After all, if 50 years experience means anything, it means there's safety in numbers.

For further details about Pilkington toughened glass write to the address below

By Hazel Duffy, Transport Correspondent

LABOUR MPs will be pressing for an early debate on the report of the Serpell Committee into the future of British Rail, which is expected to be published by the Government to-

rail report

morrow, Mr David Howell, Transport Secretary, has now received the initial response of the Board of Diffusion Rail to the Serpell report, and the minority report of Mr Alfred Gold-

The tone of the board's response is largely critical of the two reports which it describes as a "disappoint ment". But it also seeks to extract those aspects of the reports which it sees as more positive, and will call on the Government to incorporate these into a new policy for the

The most encouraging of these are the requirement for the Government to make an early statement on the size of the network, and the on the size of the network, and the recognition by Serpell that trans-itional finance will have to be pro-vided by the Government to help British Rall to achieve greater effi-

ciencies and cost cutting.

But the formal response of the board takes issue with much of the criticism contained in the reports on British Rail's planning proce-dures and standards of engineering. The suggestion by Serpell that the arrears of track renewal and main-tenance frequently referred to by British Rail do oot, in fact, exist, could be very embarrassing for Sir Peter Parker, BP chairman.

Thatcher pledge on missiles control in UK

BY KEVIN BROWN, PARLIAMENTARY STAFF

MRS MARGARET Thatcher, Prime Minister, insisted in the House of Commons yesterday that the Government would have control over any American cruise and Pershing missiles deployed in Britain,

She told MPs that she was satisfied that the present 30-year-old ar-rangement with the U.S. was effec-tive. This made British consent necessary before a state of war readiness at the bases could be raised, but it left firing control in American

Opposition MPs have repeatedly demanded a return to the pre-1962 position, when, under the dual key" system. British permission was required before any missile could be launched.

Mrs Thatcher was pressed by Mr Michael Foot, the Labour leader, for a "considered response" to the missile reduction proposals made before Christmas by Mr Yuri Andropov, Soviet leader.

Criticising the Government's sup-port for the "zero option" demanded by President Ronald Reagan, Mr Foot said the Government should take account of the proposal for a non-aggression treaty which emerged from the Warsaw Pact

summit in Prague.

Mr Foot said it appeared that
President Reagan's sacked disarmament chief, Mr. Eugeoe Rostow, had almost reached agreement with the Soviet Union in disarmament talks at Geneva.

BT will sell new **Plessey** exchange

BRITISH Telecom (BT) has official ly entered the major market for large office telephone switchboards It is to sell a new exchange develop

ed by Plessey which was launched yesterday.

Plessey has the largest market share for PARXs (private automatic branch exchanges) of more than 100 lines with its digital electronic system.

system.

BT's decision to offer its new sys the zero option offered the best hope for peace, said the number of missiles deployed would balance tem - it is many years since BT of fered such a product - should en-able Plessey to hold its share in a market which is likely to become

much more competitive.

The decision by BT is a sethack for Mitel, the fast-growing Canadian company which has a rival large PABX. Since last summer, the City of London area of BT has unofficially offered environment the Mitel and the offered environment the offered ly offered customers the Mitel ex-

Pointing out that the same rules had been operated by successive governments. Mrs Thatcher assured MPs. "I have satisfied myself that they are effective." hange. BT had been expected to adopt the Mitel enchange – as it may still do. But Plessey has achieved the valuable first approval by being able to deliver the product sooner. Plessey said yesterday that it had more than £4m of orders for the exchange, most of which are thought to be from BT itself.

Plessey will also sell the ex-change, called IDX, itself. The ex-

change will be available as well from Telephone Rentals, which has a long-standing connection with The market for large PABXs

(worth more than £50m a year) is divided between a limited number of companies which have been given technical approval in the past by BT. They include IBM, ITT, Plessey

The market for all PABXs is to be liberalised in July and several com-The low season return fare be panies are to seek approval. Six are being tested by BT as an interim tween London and Madrid will be £117, compared with £196 last year The return to Barcelona will be £94 instead of £156.

Industry fears loss of coal conversion grants

BRITISH industrial leaders are expected to appeal to the Government not to sappeal to the Government ing greater coal use by industry, thereto the "output for the coal use by industry, spite the slow rate of applications

The Confederation of British Industry (CBI) is thought to be considering such a call as part of its bud-get proposals to Sir Geoffrey Howe, the Chancellor of the Exchequer. If the grants are withdrawn, as some ministers appear to favour, this could lead several companies, including Imperial Chemical Industries (ICI) and Monsanto, the U.S. owned chemicals group; to stop cooversions to coal in their UK factories.

ICI is about to decide whether to

Airlines to cut

fares between

UK and Spain

BRITISH Airways and Iberia, the

Spanish airline, are to cut fares un certain scheduled flights between the UK and Spain by up to 45 per cent from April 1

The two airlines will be offering

only a limited number of seats at the low fares, between specified pe-riods and on certain days of the

week. Passengers will be asked to make bookings, pay for and collect their tickets at the same time.

British Airways will cut rates be

tween London and Madrid, Barcelo

na, Bilbao and Valencia oo Tues

days, Wednesdays and Thursdays, and also to Malaga on those days

and on Mondays. Iberia will cut

rates to those and other cities on

Those proposals did not involve Fewer grocery shops after 10-year decline

A SHARP reduction in the number This represented a 45.3 per cent deof grocery stores in the UK over the cline. past decade is revealed in a new survey of the food industry.

The survey, published by the Nielsen research group, shows that the total number of food outlets fell by more than 46 per cent between 1971 and 1981 - or almost 49,000 The survey reveals a significant

structural change in grocery retailing, with small food shops increasingly giving way to larger super- over by only four times, against a markets and superstores. Food re- sevenfold increase for the cotailers can more easily absorb rising energy, labour and raw material costs through the extra volume generated by a large store. The Nielsen figures show that the

total oumber of grocers fell from 105,283 in 1971 to 56,590 in 1981, with the largest percentage decline among the multiple chains, which bave been reducing their number of small stores and replacing them with larger outlets. The number of multiple outlets declined from 10,973 to 4,789 - a fall of 58.4 per

Small independent grocers suf-fered the biggest absolute fall in numbers over the decade – a decline from 86,565 outlets to 47,334.

BY DAVID CHURCHILL, CONSUMER AFFAIRS CORRESPONDENT

The drop in number of cooperative retail stores was the smallest percentage decrease - 42.3 per cent - with an absolute fall from 7,745 stores to 4,467.

Nielsen's survey also shows the creasing strength of the multiple grocers in comparison with the independent operators. Over the survey period the small grocer increased his average annual turnoperative grocer and 13 times for the multiple supermarket.

In the same period, the multiple stores increased their percentage share of total grocery trade from 44.3 per cent to 62.7 per cent. At the same time the independents' share of trade fell from 42.5 per cent to

here though; to

study the report in advance. But close examination leter showed some fascinating vignettes thet were overlooked in the weighty parliamentary battle. In March the Argen-tine Foreign Minister had protested about an insult to his national flag which had-occurred in Port Stanley. Apparently the offices of the Argentine airline had been entered and the Union Jack placed over the Argentine flag. Written in toothpaste on a desk were the words:

"Tit for tat you buggers." It was left to an uld veteran, Jim Callaghan, the former Labour Prime Minister, to

come to the rescue of his party. In a magisterial intervention be made it clear that all this prattle ebout HKS Endurance was of no conseguence. But as o result of Mrs Thet-cher's policy over the last 12

months we were left with the situation which successive Governments had feared above all—the creation of a "fortress Falklands" policy, e short-term military victory and the prospects of a long-term political retrees.

tical retreat.

This drew a damaging admission from Mrs Thatcher that if we were to honour our obligations to the islanders there was indeed no alterna-tive to a "fortress Falklands" policy.
As is was obvious that the
Labour Party stood little

chance of winning this particular match they accused the Government of a "foul" by making premature leaks of the report to the press. The indefatigeble Mr Tam Dalyell (Lab, West Lothian) complained of the weekend heedlines which predicted Mrs Thatcher would be exonerated by Franks. It was be said "selective briefing

and selective leaking by interested parties." John Hunt

Thatcher cleared despite history of Argentine provocations any action leading to the

that there would be a pro-gression of economic and diplogression of economic and diplomatic pressure and thirdly—and the intelligence bore this out—that no action, let alone invasion of the islands, would take place before the second balf of the year.

The committee concludes that view "could reasonably be taken in the light of all the circumstances at that time" but the first and the intelligence bore this out—that no action, let alone invasion of the islands, would take place before the second balf of the year.

The committee concludes that view "could reasonably be taken in the light of all the circumstances at that time" but the first act of understances are that time but the first act of understances are that time but the following and thirdly—accept the importance of the The committee concludes that view "could reasonably be taken in the light of all the circumstances at that time" but that three factors were important in the misjudgment.

The Foreign Office is blamed for underestimating the Ministers and officious bad to for underestimating the importance Argentina attached deal with many other major and to its timeable for resolving the dispute by the 150th anniversary

Within the context of the general exculpation of the Thatcher Government for any contingent liebility for the invasion of the colony, the Franks Report examines in detail the events from the early 1960s on-

of the loss of the islands to Britain, for being unduly influenced by the history of the dispute and for believing thet similar loss of the colony, the Franks and for believing the dispute and for believing the Argentina would follow an orderly progression escalating the dispute.

At that time the key officials were Mr Anthony Williams, British ambassador in Buenos Aires, Mr John Ure, assistant undersecretary at the Foreign and Commettly office, the Cabinet ambassador in Buenos Aires, Mr John Ure, assistant undersecretary at the Foreign and Commettly office, the Cabinet ambassador in Buenos American, and Mr Robin Fear, and Mr Robin Fear, and Mr Robin Fear, and Mr Robin Fear of the department's South American section.

I do like to Miss Julie's unseen father carries the right pressure for the protagonists, whose sexual dalliance has been immediately know who to praise or blame when I write to the BBC. forgotten in an instant recriminatory orgy of muddled plans and petty revenge. This marvellous revival uses Michael Meyer's standard translation.

The question is, will Selina having turned the Scott stay the course? In the borrowed the traditionally worn by commer cial television, and gone for the "relaxed and informal" approach with emphasis on "the stars and personalities," will pick vision in the early morning is up the bigger audiences. The all wrong if not downright de question is whether Jay and his team, after watching a fortnight of light entertainment going out from the BBC unopposed, will dare stick to their highminded intentions.
Some doubts at least may

have entered the minds of any viewer who happened to see TV-am's half-hour promotion last Friday morning fronted by David Frost with a wearying stream of after-dinner gags aimed at advertisers. Since the presenters are business partners in the venture it is perhaps not the venture is is perhaps not surprising that they should join their advertising personnel in trying to flog commercials. But when you have seen Rippon making the dehatable claim that consumers are better persuaded

to all the astrology columns in though hard-worked, number the Press, though the more self-than TV-am's five, however respecting newspapers have atarry they may be—is in my never yet sunk that far. The view the best studio anchorman comparison is nevertheless of his generation. highly significant. It is clear from the outset that breakfast television sees itself competing not with other television programmes nor even with radio much, but with newspapers and —in the case of the BBC so far. anyway — specifically the cheaper newspapers.

Hence the news Itself comes mainly in headlines, read by former BBC secretary Debbie Rix (good) who looks as though she has been doing it all ber life and even has that slightly weird dress sense which seems de rigueur among female news readers: Day One found ber in a white patterned satin top suitable for the Covent Garden circle bar.

We had plenty of sport from making the debatable claim that David Icke (good) who used to consumers are better persuaded work on Newsnight, and to huy in the morning than the frequent weather forecasts from

Chris Dunkley gives a measured welcome to BBC's 'Breakfast Time', admiring the professionalism but disturbed by the frivolous approach.

Which is not to say that every- will you ever trust her again

Whn would bave dreamed 10 whith would have dreamed 10 presenter Glynn Christian years ago that the BBC, home (good) looks like the most of Dimhleby and Bronowski, maker of Cirilisation and The Reith Lectures would ever take to peddling astrology across the nation's breakfast tables? Yet there he was on Day One, a grossly fat individual in a rainbow striped jumper telling us all what Virgos could expect. What price a resident BBC leather airport sofas he will alchemist? Hints on making your own snake oil? A necroseombe and start losing some weight. And Nick Ross, who

It is not the presenters

even the content which has caused most debate in the runup to hreakfast television, how up to nrearrast television, how-ever, but the question of whether launching such ven-tures makes sense at a time when "viewing is falling away so disastrously." That asser-tion is in quotes because it is heard repeatedly even within the industry, but I do not

The emergence of hreakfast television now is not some co-incidental part of the problem: It is, on the contrary an integral part of the reason for the sea change which I sense is occuring. Audiences for individual programmes are, indeed, sbrinking. But the reason, surely, is that there is now very much more available to most viewers than there was even one year ago, let alone five or 10 years. Breakfast television is a typlcal part of the Increase. Put simply: audiences are being dis-tributed more sparsely among a larger number of attractions, including those on video-cassette, offered over a greater number of hours, on an increas-ing number of channels.

It may even be that with so much more television around, often available in such a manner that the viewer can choose what he watches when be likes—with power and choice moving away from the broadcaster and into the viewer's own control—television does been in trol - television does begin to seem less special and less com-manding and we really are beginning to pick and choose more and watch slightly fewe hours. Mainly, I believe, this change is simply a matter of the redistribution of viewing.

Closer investigation certainly suggests that the most famous "disasters" such as the sup-posed "loss" of seven million viewers by Last Of The Summer Wine at Christmas are due to that factor: the ITV/BBC1 total at that time this year was 20 million viewers, plus video-cassette watchers against last year's 23 million total: ie probably little, if any, change.

I have few doubts that 15 years from now breakfast televisioo will be an unremarkable daily event watched by e number of people who as consequence, will watch less than they used to at some other time of day. What is more problematical is the prospect six months bence: for the BBC'a worldwide organisation Breakfast Time is just one more programme, but if the advertis-ing dispute is not settled quickly TV-am could disappear almost as soon as it is born.

Mozart & Schubert/Barbican Hall

Andrew Clements

For this week the BBC has of et last hearing an orchestra taken over the Barbican Hall in the Barbican which was for a short festival devoted to alert and prepared to knuckle for a short festival devoted to Mozart and Schubert. The Symphony Orchestra and John Pritchard are giving three Schubert symphonies (noa 3, 4 and 5) and for the last three symphonies of Mozart, Walter Klein is the soloist in three of the best known Mozart piano concertos; the Chilingirian Quartet supplies string quartets and quintets; the BBC Singers and Kathryn Stott and Yitkin Seow offer lunchtime programmes that mix part-songs and piano duets.

The idea is unexceptional and

The idea is unexceptional and unexceptionable. The programmes are solid and consistent, and there is nothing in any of them (save the lunehtime recitals) that could not be beard easily in any average month on the South Bank. The first concert on Monday night, from the BBCSO and Pritchard, attracted a meagre audience and produced thoroughly competent perform-

ances, After the initial sbock

Mr Klein'a tack of mannerism and clean texturing took him through the C major concerto K.467 pleasantly. The lyricism was spun on tenuously thin linea at times, and the brittleneas of his sound emphasised passing blemishes in his passagework. But, as in the symphonics, one longed for a transfiguring performance to justify the whole enterprise, to lift it above the mundane and the routine; throughout this first concert at least ooe waited first concert at least one waited in vain.

This week's BBC Mozart- aided their concentration. But Schubert series has, three times this week, e lunch-hour pendant, taking the form of piano music for four hands by both composers adorned with part-songs, sometimes piano-accompanied, by Schubert. At the first of the three, yesterday, Yltkin Seow and Kathryn Stott gave as recital ceotreplece the wonderfully brilliant and charming C major Sonata, K521.

The two young planists allowed, on this occasion, no indication wbatsoever of any evident aptitude for the task at hand. Simply as piano duo playing, theirs was often disturbingly unsynchronised, and in any loog passage of concerted activity rhythmically unstable; instead of enjoying their partnership these two pianists seemed to inhibit each other. placing in consequence a pall of earnestness upon the con-viviality of the muslc, A new Barbican Hall nolse, like a muted power drill somewhere in the roof, can hardly bave

to have to listen to Mozart reduced to the level of soporific politeness in a series bearing his name was a diapiriting experience indeed.

From the vast treasure-trove of Schubert's secular choral music, the BBC Singers under John Poole had chosen three delectable samples—"Lied im Freien" and the craggily specu-lative "Grab und Mood" for male voices, then as concert finale the blithe "Gebet" for mixed choir, solo quartet, and piano (Miss Stott). To a less damaging degree, the choral Schubert had e character of smooth-tongued good manners not unlike the four-hand Mozart. Final consonants were elided or slid over in the English manner; nothing too assertive or too eoergetic was Schubert's "startling harmonic effects" (I quote William Mann's lively programme notes! in "Grab und Mond;" and — to put It bluntly-blandness ruled almost

Faults in the machine

which the Franks Report on the events which led up to the Falklands crisis itself regards as crucial. First, rould the Government have foreseen the vented that invasion?

sively that the Government had no reason to believe before March 31 that an invasion would take place at the beginning of April."

Indice leaves no doubt that it believes the Government might have behaved more prudently.

The Report also draws attention to some striking deficiencies in the machine.

And again: "There is no reasonable basis for any suggestion—which would be purely hypothetical—that the invasion would have been prevented if

Those sentences need to be read very carefully, however, along with the rest of the Committee's findings. What the Report is artually saying is that the Government could not have foreseen the invasion of the beginning of April (our italics). There is abundant evidence spread throughout the Report that an Argentine invasion had been considered a possibility for a number of years and that this possibility was becoming much more serious in the early monihs of 1982. What was not foreseen, and perhaps could not have been foreseen because the Report says that the Argentine decision was taken at very sbort noilce, was that the invasion would take place as early as

Equally, as the Report admits, the question of whether the invasion could have been prevented is a hypothetical one. It is impossible to say what would have happened if the Government had acted differently. Yet the evidence of the Report certainly suggests that the Government's handling of the matter was far from perfect.

There were errors at the continuous product of the real lesson of the continuous production. The real lesson of the continuous production is impossible to prove it.

There were errors of omission and of commission. The Report is particularly orbical of the Government's decision to with-draw HMS Endurance which was a token of the British commitment to the defence of the Islands. Mrs Thatcher made the lame claim in the House of

THATCHER yesterday Endurance was still there when the invasion took place. But the fact is that the decision to announce the withdrawal gave the wrong signal to Argentina. Along with the refusal to imple-Government have foreseen the ment some of the recommendative soil of Lord Shackleton's could the Government have prevented that invasion?

when it was clear that a crisis was developing. Mrs Thatrher asked Mr John Nott, the Defence Secretary, how quickly a Royal Navy ship could be deployed to the Islands. It took him four days to sails. would have been prevented in the Government had acted in the ways indirated in our report."

Pacsibility

a toya.

deployed to the Islands. It took him four days to reply, Again, lt seems remarkable that Government policy towards Argentina and the Falklands was never formally discussed the Foreign and outside the Foreign and Commonwealth Office after rington briefed the Cahlnet on events in South Georgia on March 25 1982. The Report reveals that there was no meet ing of the Defence Committee on the Filklands until the beginning of April 1982. Yet the Foreign Office had been conducting negotiations with Argentina and was aware that the situation was deterioratin; rapidly. It seems a strange way

Fatal decision

This lapse of communications apart, Lord Carrington comes out well. He recognised the need to negotiate seriously with Argentina shortly after he took office, but wanted to keep the

Government Departments with overlapping responsibilities and interests to work closely agreed on the civil servants to been paying more attention to this aspect of government in the last few months. Now we know why. On the evidence of Franks there is a long way to Commons yesterday that that Franks there is a long way to

A dollar test for Opec

IN THE oil market yesterday's unconventional wisdom is now de rigueur. The industrialised of Saudi Arabia that remains countries have a common in-terest with the Organisation of Petroleum Exporting Countries more bawkish members of Open in avoiding too sharp a fall in who wanted to extract more

the oil price. For this otherwise extraordinbank lending tespecially to Mexicol is effectively secured on future oil revenues for a collapse of oil prices to be contemplated with anything but alarm. Much more is at stake in the present price structure than the profitabllity of oil

exploration and production.

Whether such a fall comes about as a result of the oil market glut could well be decided one way or another in the next three months; and the outcome of next Sunday's Opec meeting in Geneva may provide an important pointer to the shape of things to come. That the meeting was necessary at all reflects the extent of disarray in

the Opec camp.

At the ministerial conference in Vienna before Christmas the producers' cartel came to a tentative agreement to raise the ceiling on Opec production by 1m to 184m barrels a day. But that notional limit on output was struck without any of the participants being able to answer the question of how production was to be shared between producing countries. In short Opee now confronts the they expect it to fall no further than the same than th

For some time the official reference price of \$34 a barrel up flagging export revenues. simply to defend a status quo. The pressure has redoubled as that anyway represents a dea result of the readiness of clining real price level. The others, most notably Libya and moment might then be ripe to Iran, to ignore production negotiate a move away from the quotas and offer covert dis-Opec price was closer to \$32 a sources of future imports.

rrurial to the outcome. In 1981 the Saudis sought to restrain the from the industrialised roup For this otherwise extraordinary turn of events the international debt crisis is largely responsible. Too much Western to Saudi motivation was the recognition that an excessively high oil price provided an inrentive to consumers to diversify their supplies, conserve energy and develop alternative sources. In the event the Saudis lost the day—not because they falled to bring the bawks into line, but because the dollar source, there-by imposing a further burden on an industrialised world that pays for its oil in dollars.

To maintain the present price To maintain the present price structure Saudi Arabia has been forced, as the swing producer, to reduce its output from 9m barrels a day for much of 1981 when it was trying to hold down the price, to little more than 5m barrels a day last month when it was trying to do the when it was trying to do the opposite. And it is under increasing pressure from the major U.S. oil companies to drop its price.

Judgment

elassir dilemma of a commodity ther (and they can use their cartel in a deep recession: bow own financial muscle to contricartel in a deep recession: bow own financial muscle to contri-to prevent individual members bute to that end) the case for raising production to compensate for declining revenues that say, \$30 a barrel would be reflect weak consumer demand. powerful. The oil companies might then be tempted in a less uncertain elimate, to re-

build stocks.

If, with an increasing number has been under pressure as of economic forecasters, they "high absorbing" countries expect the dollar to rontinue like Nigeria struggled to prop its fall, they may be content counts to the oll companies. and obstinate, robust and unpretentious — is also not dissimilar from Mrs Thatcher's.

Yet as Sir Derek severs his
daily ties with the efficiency
programme, closer examination
suggests several large question
marks over the future of a programme which Sir Derek
always intended to be a permatent part of Government aways interact to be a perma-nent part of Government machinery, rather than a hit and run exercise. One of the main problems, appropriately enough in the week of the Franks Report, has

its root in the tumultous month of May when Sir Derek was attempting, in conjunction with two Cabinet Ministers, Mr Leon Brittan at the Treasury and Lady Young at the Management and Personnel Office (MPO) (the civil service ministry, in effect, and independently of the

effect, and independently of the Treasury) to secure the long term future of his work hy setting up the so-called Financial Management Initiative.

The FMI is designed to force on each of the 30 Government departments and their 655,000 staff and f14bn a year budget a rudimentary system of cost. rudimentary system of cost accounting and budget control, which might in the end permit cost centre management right down the line and perhaps even decentralised pay bargaining. This would be truly a revolu-This would be truly a revolu-tion in the management of Government: "institutionalised Raynerism" as one union official correctly puts it. The problem, as Sir Derek came to realise only too well, was the artitude of the key department — the Tressury.

Some senior Treesury officials, apparently with Cahinet Office support, dislike the possibility that their financial control over

Sir Derek's answer was secretary, two very large tiers simple and born of long experience. having worked in permanent secretary.

Whitehall in the early 1970s. At the time of his departure. Sir Derek and Mr Priestley squad, staffed by high filers, both maintained the succession and inject them inside the was being handled according to main but as reported elsewhere He would create a small Rayner squad, staffed by high filers, and inject them inside the Treasury where, with the help of a tough guardian angel at deputy secretary level within the department, they would foment the revolution. He

Sir Derek considered his normal line of emergency action—a lit may yet be, of course, that talk with the Prime Minister—but she had her mind on more explosive matters in the South Atlantie and could scarcely be disturbed with Ministry of Defence, a great success.

It may yet be, of course, that lits technique has been to Sir Derek will win these battles. Sir Derek will win these battles. Sir Derek will win these battles. It is technique has been to scrutiny team found savings ministers in each department worth 1,115 staff and £10m a to identify operations where a short (normally 90 days) but administration, saw Sir Derek intense investigation by a young twice during his own scrutiny

W HEN Sir Derek Rayner stepped down last month after three years as Mrs Thatcher's personal efficiency chaser in Whitehall, the tributes from Downing Street tributes from Downing Street flowed freely. A fortnight lster, Sir Derek marched off with one of only four peerages in the New Year Homours List. He could hardly have expected less, having led his small team of civil servants on over 130 sorties into White-hall, racking up potential savings of £275m a year, of which £175m is already in the bag. may prove short-lived

systems. Sir Derek, in short, had been outflanked. The official line, of course, remains that all is well. Lady Young says she eannot recall any disagreement about these matters and re-assures doubters that the good work will contioue under her own direction. "This is an absorbing interest for me." she says. Sir Derek himself has maintained a cheerful public silence on the subject, but the circumstances surrounding his departure have compounded the impression that all is not going smoothly in the efficiency brigade. Although Sir Derek's own

soughbles about management

derision to leave was not na-expected — indeed it was overdue - it was odd that he was not replaced, except for his attempt to suggest that things would be run by his chief of Whitehall could be diluted and remain sceptical about the merit civil servant who lacks nothing of putting large amounts of in stamina or ability but who, time into the kind of management system that Rayner has promoted.

Sir Derek's answer was secretary, two very large tiers civil servant power battles, lacks status. He is only an under strong and here of long ery below the service's ton rank of

one interesting potential con-cession in suggesting that in future, departments which save money will be allowed to retain some of the proceeds. That may be a small measure, but it, or something time it, is needed to halt the palpable decline in civil service morale which has

civil service morale which has accompanied the 14 per cent cut in its size which the Thatcher Administration will have achieved by April 1984.

What all this adds up to is that a fragile but politically hipartisan raft of support for righter and less secretive running of the civil service has started to be constructed. There started to be constructed. There is a danger, however, that the advances so far made oould be lost. An incoming Labour government would probably scrap them because of their associations with

"Thatcherism." And if Mrs.
Thatcher wins a second term,
her zeal for across-the-board
cuts, which have already reduced morals in the service, might well prove incompatible with the thoughtful Rayner

approach
Civil service union leaders are
convinced that Mrs Thatcher convinced that Mrs Thatcher has already written into her manifesto another 5 to 10 per cent across the board cut Meanwhile, the drama within Whitehall itself continues, as the events surrounding the Rayner unit in the last year industry.

dicate. It is believed that only a few of the permanent secreboth experienced and committed both experienced and committed hackers of Raynerism, Mr Herel-tine's appointment to Defence is a success for the better manage-ment school, however, and a good deal will be learned from whether an Intriguing docu-ment concerned with the job description of permanent secre-taries ever sees light of dev

taries ever sees light of day.

This paper, written by the
Rayner unit, and already in the
hands of the permanent secretaries, makes the case for constructing a ministerial charter which would outline the role and responsibilities of that loftiest of Whitehall creatures. the permanent secretaries. Crucially, from the Raynerites' viewpoint, it would include among its items a requirement that permanent secretaries accept responsibility for efficient and cost-effective management of their own departments.

David Housego reports from Paris on the changing fortunes of the OECD

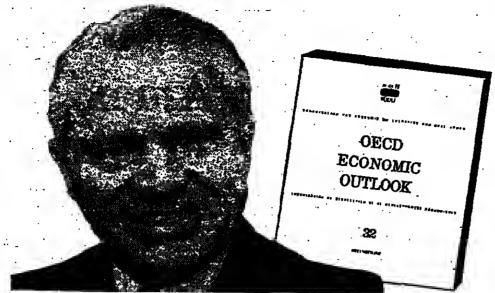

Pilot fish ahead of the sharks

IN ONE out of the way corner of Paris, this week's international gathering of finance ministers and treasury officials has brought unexpected cheer. At the headquarters of the Organisation for Economie Cooperation and Development (OECD)—squeezed inconveniently between the Boils de Boulogne and the smart suburbs of the 16th arrondissesuburbs of the 16th arrondissement the Group of Ten meetings are seen hopefully as pointing to an end to the organization's long period in the wilderness. For one of the policy lines to emerge, of encouraging countries to pursue growth as far as their "room for manoeuvre" allowed, is one that the OECD secretariat has long preached. At last spring's ministerial meeting of the 24 industrialised member states, the Secretariat unsuccessfully the Secretariat unsuccessfully pushed its plan for "differenti-ated" growth by which those countries with comfortable infation and balance of payments positions would apply some measure of stimulus.

At the same time the new sultation and co-ordination that has resurfaced (particularly in the U.S.) is music to the ears of an organisation whose raison detre is international co-operation. Since its genesis over 20 years ago in the wake of the Marshall Plan, the OECD's bread and butter has been the interrelated issues of trade, monetary and exchange

But in recent years, its infinence has been in decline. It was branded with what was thought of as a rather old-fashioned expansionism that was out of tune with what President Reagan was advocating in the U.S. or Mrs Thatcher in Britain, and which also worried the Germans and the Japanese.
As an organisation committed

to economie co-operation it suffered from Mr Reagan's distrust of interference with mar. and in particular energy and ket mechanisms. Among inter-export credits, national institutions it has been losing ground to the IMF and of the even to the Bank for Inter-national Settlements (BIS). It has been squeezed out from its once central role in international economic policy making the OECD has had in its history, ing hy the emergence of the is expected to retire in 1984. Group of Five (the finance His contract was extended this ministers of the U.S., West Geryear after an unseemly tussle many, Japan, Britain and between member states ended in France) as the main steering a stalemate over appointing a group for the world economy. their authoritative status as the predicted recovery slipped Marris, his British economic further over the horizon.

Mr Emile van Lennep, secretary-general of the OECD

In Mr George Shultz, the new U.S. Secretary of State, the OECD has et last a friend in court in Washington. Mr Shultz

was Treasury Secretary from 1972-74. He then worked closely with the OECD in putting tha final touches to the flexible exchange rate system that was introduced in March 1973 and in co-ordinating the It is also being more deeply

involved in East-West questions.

Mr Shultz called on Mr Emile

van Lennep, the OECD Secretary-General, during his recent
tour of Europe. One of the issues they discussed was the extended but controversial role being given to the OECD in monitoring East-West trade.

This possibla swinging back of the pendulum comes at a critical time when some of the most senior posts at the OECD are falling vacant. Mr van Lennep, only the second director, the OECD has had in its history, successor. "Nobody of stature wanted the job because the

But apart from this week's organisation since 1953 and meeting the Organisation has been most responsible for its taken heart from other signs. economic philosophy, leaves the focal point of its ectivities "The role of the Secretarian," says Mrs Ostry, "is to pm down crucial issues, then to carry out the best and most objective analytical work before translat-Finally, the job of heading the ing this into something which is meaningful and strikes a bell with a busy policy maker."
To that definition Mr Marris
adds that 50 per cent of the

EUROPE HAS grave problems
—no growth, mounting deficits,
declining institutions, more
people without jobs, little
investment and sluggish productivity. Sometimes we get members of their family who less out than we put in. We were close to it. They had perhave low capacity utilisation sonal experience of industry and depressed profitability in and its basic ronditions and

and depressed profitability in industry.

Europe is not creating new resources, but is declining under the pressure of increased compedition. When things are dying, clearly dying, we do not let them die any more. Companies do not go bankrupt the way they used to do. We try to restructure, preventing the creation of new dynamic structures. I think this is detrimental. Another sign of weakness is the fragmentation of policymaking and of our global perspective. We deal with the world in terms of monetary policy, fiscal policy, social policy, employment policies.

policy, employment policies, foreign policy and trade policy. All these are, of course, different are related ferent aspects of one global policy.

We also tack a "people policy." We deal with people in terms of unemployment. retirement and child or medical care. We devote very little time the development of people's ambitions, ideas, initiatives, motivation. We are not discuss-ing the true "social contract" that would make people contribute.

Most of our nations-and this is certainly true for my country Sweden—gave top priority to the redistribution of income and wealth. It was an easier job to implement welfare policies when there was growth.

We realise now that growth was taken for granted. We forgot bow fragile was the process of creating resources, sociel and political terms, If we thet histo=cally people always can engage our people in e fought for their survival. We took industry's stability for

granted.
Industry todey is a "minority citizen" in the Western world continued stagnation, continued stagnation, with every nation trying to solve its own problems and not co-opera-ting with others. We ere defending our shrinking indus-trial sectors and their employ-ment. The results of this new isolationalism can be seen in -in the sense thet it does nol employ the most important part of the workforce, in terms of ting with others. We ere capital employed, in terms of defending our shrinking induspower. But industry is expected trial sectors and their employing deliver the hulk of national ment. The results of this new resources, Il is now realised isolationalism can be seen in that the health of a country is international trade.

We need at this point to be industry.

In the 1950s and 1960s most adult citizens in any Western society had some link with inbeyond the next quarter's infladustry. Elther they worked with currency development industry themselves or they bad members of their family who were close to it. They had per-

After World War II new international institutions were created. They gave people hope and expectations for a better future. These institutions and initiatives included the reconstruction of Europe, new monetary systems, new trade monetary systems, nevagreements, the Alliance and the buth of Euro-pean co-operation. These institutions have been successful and durable. They were not, how-ever, designed for the present

type of crises. Some time ago I suggested that we need a new kind of "Marshall Plan" to get Europe going again. The Marshall Plan served—for a limited period— aa an instrument to spur growth, and to build industry and infrastructure.

Europe's problems can only be solved through economic growth. We need expansion to create jobs in our industry and in the service sector. Growth can only rome by the develop-ment of higher value-added products and increased produc tivity. A new investment pattern must be created to encourage this.

I believe strongly that indus-try must play an active and important role in the formulation of the industrial strategies for future growth; to identify end D, productivity, new capacity and industrial infrastructure. This should, indeed be the responsibility of business. Co-operation on a Euro-Financial means must be developed to support the new investment pattern. A virtuous

A healthy, vital and growing Europe is of prime importance to the U.S., to Japan, to the growth of the less developed countries and therefore to world stability. The process of weelth creation is international. There-

new industrial future for Europe. In symbolic terms we need a new "Marshall Plan" and the time has come for e new European initiative,

Letters to the Editor

Monopolies and Mergers

From Mr A Nelson, MP

Sir,—Mr Alister Sutherland (January 13) advences a dangerous line of argument in suggesting that the Monopolies and Mergers Commission must be satisfied that a merger is actively beneficial to the public interest rather than determining whether it is against the public interest. Such a presumption against mergers should find no place in law for, provided a merger is not actually decrimental to the public interest, why should anyone other than the shareholders bave any say in the disposition

In my view, the Monopolies and Mergers Commission has interpreted too widely the criteria iaid down under Section 84(1) of the Fair Trading Act, 1973, in deciding what is egainst the public interest, not only in the case of Charter/ Anderson Strathelyde, but also in the cases of Hong Kong Shanghai Bank/Royel Bank of Scotland, and Lonrho/House of Fraser. In each case the Commission allowed itself to make value judgments on the mission allowed itself to make value judgments on the personality and outlook of directors, on the degree of autonomy of subsidiary companies, and on regional political factors well beyond ensuring a balanced distribution of in-dustry and employment.

significantly and on the need to increase the return on capital employed throughout

industry.

Last year I expressed concern to Lord Cockfield, the Secretary of State fer Trade, about the negative tenor of a number of Commission reports come the decision by Mr Peter Rees, the Minister of State for Rees, the Minister of State 10:
Trade, to reject the majority
recommendation of the Commission in the case of Charter/
Anderson Strathclyde. I am
even more reassured that the
final decision on what is or is
not in the public interest should
rect with Ministers rather than with unelected members of the Monopolies and Mergers Com-

Ministers may not always make the correct decisions but on the whola they can be relied upon to make a finer judgment on where the public interest lies. There would be no point giving Ministers the final say if they were only allowed to endorse the majority findings Anthony Nelson.

ciations in the South

Politics in Totnes

From the Labour Prospective Parliamentory Candidate, Totnes .

Sir,-In Ivor Owen's article (January 11) on the sorrowful state of the Totnes constituency Conservative Association, and whom should have the "privilege" of being represented by Mr Mawby following the next General Election, your peper'e usual political balance seemed to disappear.

In case it escaped the notice of readers, (as it surely did, for it was not mentioned), the constituents of Totnes, if new boundaries are not implemented in time, will also have a Labour candidates to vote for. I can assure readers that my party will be working at least es bard as apparently are some of his own association members, to unseat Mr Mawby. I am also quite sure that if boundary ebanges do take effect, the two new constituencies will select Labour candidates. Because, however, in the Labour Party selection is by a democratic method involving all party bid.

The linked life market

From Professor C. Mundle Sir.—Your article "The battle of the linked life market" (January 8) drew attention to

trusts differ very widely in the gains allotted to their bolders considered as proportions of the gains made by the unit trusts to which the bonds are linked. According to your figures for 1982 a bondholder's share of the unit trust gains ranged from a mere 35 per cent (Britannia Gold and General) to almost 93 per cent (Gartmore Special Situations). How can this be explained or justified?

To a lesser degree the same anomaly is found when one compares the gains allotted to holders of investment bonds with the galos made by the unit trusts in which they are invested. I give an example taken at random (I have not done tha gains for other cases). Having lost your price list for January 2 1982, I take the year from Jenuary 9 1982 to January 8 1983. During the period M & G's American and General trust gained 51.9 per cent and its Perthshire

American Bond fund invested almost exclusively in that trust, gained elightly more—53 per cent. Henderson's North American trust gained 57 per cent and its American Bond fund gained 47 per cent.

political thinking of major government that the secretariat

can put forward its point of view with astuteness. Mr Marris

likes to employ a favourite image of a "pilot fish swimming before a shark" in describing

the OECD's role towards its member governments. "If it gets

too far ahead its ideas are not followed. If it gets too close to them it is swallowed up." In the 1960s the pilot fish

swam confidently shead of the shark. It was through the top

treasury officials on Working Party 3 that the OECD effec-tively policed the system of fixed exchange rates. The

Secretariat prepared the blue-

able to present governments with an analysis of their inter-

Hence the surprising situation that although a holding of Hendersons' North American trus gained almost 10 per cent more than M & G's corresponding trust, a holding of Henderson's Bond gained 11.5 per cent less than a bolder of M & G's corre-

I am not unaware of the fact that Henderson's American Bond fund is now partially invested in its American Smaller Co. and its American Recovery trusts. Taking account of this fact, however, heightens the contrast I have made above. For whereas Henderson's North American trusts gained 57 per cent, its American Smaller Co. trust gained 62 per cent and its American Recovery trust has, since its launch seven months ago, gained 60 per cent. (Prof.) C. W. K. Mundie. Ashcliffe.

Basic factors for

From Lt Gol A. Campbell Sir,—There are five basic fac-tors, which enable the Mon-dragon group (December 14) to maintain virtual full employment for 20,000 members. There is the long term policy of giving security of employment priority over maximisa-tion of earnings. When con-tinuously pursued, this has a greater effect than might be

There is the absence of any commitment to wages — although it is current policy not to let cash drawings fall below 80 per cent of comparable

The management division, as well as advising on commer-cial matters, also advises on how the enterprises should be organised so as to motivate their members to stick to them. (In that respect, few of the co-operatives" and "common ownerships" currently operat-ing in Britain would qualify for e Mondragon bank loan.)

There has recently been a suc-cessful policy of getting most of the enterprises to join together in local or trade federations, in which the member enterprises delegete a degree of control to a central board. This strengthens individual businesses, without denying their owners ultimate control of their own affairs. There is the point that all Funchley NS.

managers and staffs are controlled by elected directors. Thus the bank directors are elected by enterprise represenelected by enterprise represen-tatives on the basis of one repre-sentative per bundred members. The result is that facts pre-sented by management are belleved and managerial plans are seen as being made by fellow workers. Alastair Campbell. Ord House Cottage,

An improved performance

British manufacturing output falls to lowest for 16 years

BY MAX WILKINSON, ECONOMICS CORRESPONDENT IN LONDON

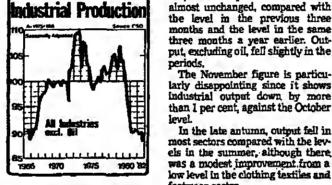

This continued depression of UK industrial ectivity is bleak news for the Conservative Government of Mrs Margaret Thatcher, which had hoped that lower interest rates and the receot fall in the inflation rate would stimulate a moderate but sustained recovery.

Hopes of this recovery have been progressively postponed since last spring partly because of the de-pressed outlook for the world as a whole. Signs of revival are still sparse, in spite of the 4% per cent real increase in spending in shops in the last three moaths of 1982 In November, manufacturing out-

put had fallea to 19 per cent below its level when the Thatcher Government came to power in the spring of 1979 - at the peak of the last economic cycle.

The November index for overall

industrial production was 12 per cent below what it had been in the second quarter of 1979, but if North Sea oil is excluded, the fall in industrial output was 17 per cent during

in the developed world as a whole fell by about 4 per ceat during the period. Most of that decline took place last year, with the average quarter of 1982 4 per cent below its level in the fourth quarter of 1981.

The UK Government's index of overall industrial production for November was at its lowest since the winter of 1975. The index for all industries, excluding North Sea oil, was at its lowest since the winter of 1966, and the index for manufacturing industries at its lowest since the beginning of 1967.
In the three months to Novem-

ber, industrial production remained almost unchanged, compared with the level in the previous three ment can claim that its consistent efforts to attract direct Japanese in-vestment to the UK have again months and the level in the same three months a year earlier. Output, excluding oil, fell slightly in the gained from the fact that this is a VTR operation, which has been a

The November figure is particularly disappointing since it shows industrial output down by more than I per cent, against the October

els in the summer, although there was a modest improvement from a opted to set up in West Germany, citing the superior quality of the laow level in the clothing textiles and bour force and the technical sup-port available in the Federal Repub-lic. The only consistently buoyant

sector was North Sea oil and gas production, which increased by 27 per cent between the spring of 1979 Mr Jenkin's travelling party, on the last leg of an Asian tour, was described last night as emphoric The underlying level of total in-dustrial output after taking account of changes to stocks is estimated to even expecting to be able to an-

nounce another Japanese investment in Britain shortly. have risen by about 2 per cent since In Tokyo, however, it is thought its lowest level in the spring of 1981. unlikely that Mr Jenkin will be able The rise in oil production however, on this visit to overcome Nissan's accounts for aearly all of this inreluctance to establish an assembly crease If this is excluded the unplant in Britain or to create a grea-ter Honda association with BL, the derlying level of output is estimated to bave risen by less than 1/2 per cent in the period, while manufacstate-owned car group. He is due to meet officials from both companies turing output is thought to have fallen by about % per cent. tomorrow and on Friday.

From the Japanese standpoint, the Sanyo decision can be portrayed as demonstrating an increasing awareness of European concerns over the imbalance of trade in technological sectors.

The European Community is putting additional pressure on Japan to curb its exports of VTRs. But last week, in talks with EEC officials in Tokyo, the Ministry of Trade and Industry (MITI) refused to commit itself to quantitative restrictions on VTR shipments to Europe. The assembly of VTRs in Europe,

however, might enable Japanese companies to continue their hold of the European market, should trade relations deteriorate to the point where Europe raises barriers against direct Japanese imports.

Sanyo will be the second compaay to make VTRs in Britain. Thorn EMI began last autumn assembling machines at Newhaven, Sussex.

An Amex gold card for Mr Safra

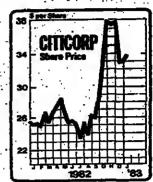

Over the past two years, American Express has executed one of the most remarkable U-turns in iaternational banking Early in 1981, Amex bought Shearson Loeb Rhoades, the Wall Street brokerage house, for \$820m and promptly nailed a For Sale sign over its off-shore banking subsidiary. Now it is proposing to pay the equivalent of \$550m the bulk of it in Amex paper for the noa-U.S. operation Trade Development Bank, the high-ly discreet financial institution controlled by Mr Edmond Safra. The combination will produce one of the largest offshore banking operations

Amer is paying a rich price for this privilege. The deal values TDB at a premium of almost 50 per cent to reported aet worth at a time when U.S. bank shares are trading at an average discount of about 30 per cent. TDB itself is capitalised in the market at about \$570m but, on paper at least, roughly \$250m of this represents its 81 per cent hold-ing in Republic New York, which is act part of the transaction.

TDB can, however, boast returns on equity of about 20 per cent - balf as much again as the recent average returns of the U.S. banks - and the mysterious Mr Safra will take up the reins of the enlarged banking operation. Moreover, the two companies should make a neat fit. with TDB providing an extensive client base to tap the extremely wide range of investment services provided by Amex.
Yet it is hardly a marriage which

will make bank regulators sleep easy at night. Precisely who would be responsible for this offshore Leviathan, with total assets of almost \$13bo, in the event of trouble, is a question best not asked.

After the whirlwind of activity in which Trident TV has been involved, the actual profit figures for what prosaic. In fact the second half proueed a modest pre-tax profit of £0.4m, taking the full-year out-come to £4.3m, even though run-ning an empty Playboy Club cost 11.6m in exceptionals and closure a further £1m in extraordinaries. The diversion of management attention to casinos also appears to have had U.S. film division.

the assets side, the gamble in casi-nos has reduced net worth from £32.5m to £22.6m. But pre-tax profits may be in the region of £7m or C8m, which compares with £7.4m in the year to September 1981. Since Channel Four obligations will be depressing TV contractors earnings in the current year. Trident looks to have emerged a more profitable animal since the divestiture order of the IBA, although there may be cavils about quality of earnings. The shares were unchanged yesterday at 78p, producing a prospective p/e of about 10, fully taxed.

U.S. banks ...

The year-end results of the U.S. money centre banks, now being re-ported for 1982, rarely reflect signif-icant differences over how best to treat a major problem. But to the caused a breaking of the ranks - of which a notable example was the Herstatt collapse - should now be added the Mexican crisis of 1982. Arrangements were made last

year for Mexican dollar borrowers in the private sector to service U.S. loans in pesos. The banking results out so far this week suggest that the loans serviced on time have been treated as current and interest accrued in the normal way. Unfortunately, some of these pesos arrived after the end of the year, producing a variety of responses among the banks.
Citibank appears so far to have taken the most conservative ap-

proach, cancelling the accrual of the CJ.5m write-off required on the probably accounted for a quarter of aext few days, might-give more the \$200m increase in Citibank's clues on the worth of RS, estimated non-performing loans over the in the City of London at around means that the company is on an three months - helping the year's £25m, or 13p a share.

sums involved are not trifling have left their books open for sever-

Chase Manhattan, meanwhile has confused most of Wall Street by taking a compromise line. It has as the offending portion but has not added them to its non-performing portfolio, which rose by \$78m in the fourth quarter. On the other hand Chase has cancelled the accrual of the interest involved. It is by no means clear how the negative impact of this cancellation on after-tax earnings can be as little as 5km -given the \$300m figure. Discrepancies between the ac-

counting procedures of different banks on what is, after all, a fairly specific problem certainly strength ens the argument for inviting na-tional - if act international - bank ing authorities to provide some formal guidelines in difficult cases.

Burton Group

The Burton Group's interest in UDS's loss-making Richard Shope (RS) makes eminent sense for a revamped company in a buoyan growth phase. To buy the RS port-folio of 217 outlets would more than neet Burtoa's objectives of adding 150 shops to its 750 units, while creating the opportunity to attack e slightly older sector of the women's fashion market. It might also be easier to buy shops in bulk, and it titor (the Office of Fair Trading per mitting) which could be brought back to life either by its present management or the Bassishaw In vestments bidders for UDS.

Hopes rise for end to EEC fish row

HOPES FOR an end to the bitter fisheries dispute between Copenhagen and its nine EEC partners rose last night following a third rouad of emergency talks in Bonn, involving Denmark, West Germany, and the European Commission.

While no details emerged of the proposed agreement, a spokesman for Herr Hans Dietrich Genscher, the West German Foreign Minister and current president of the EEC Council of Ministers, said that all three parties were convinced that they had worked out oew arrangements that could be approved at the Council of Fisberies Ministers meeting in Brussels next Tuesday. Mr Uffe Ellemann-Jensen, the

Danish Foreign Minister, would be recommending acceptance to his Government and M Gaston Thorn, the President of the Commission, would be doing the same in talks with the other nine EEC member states, the spokesman said. There remain, bowever, several

important obstacles to be overcome. The minority Danish Government aceds to win over its parliamentary opposition, while the Commission must coavince the other main fisbing nations, especially Britain, that any new arrangements will not ua-do the basics of the package agreed unanimously by the Nine at the end of last year.

Apart from Copenhagen's well-

known desire to have guarantees on future mackerel catches, the Bona talks are understood to have

BY WILLIAM HALL IN LONDON AND PAUL TAYLOR IN NEW YORK

"WE ARE MARRYING a unique se-mi-tapped private client base with a very powerful range of financial services" is how one senior executive sums up the proposed marriage between American Express's offshore banking arm and the non-U.S. banking interests of Mr Edmond Safra, who controls the big-gest private banking empire in the world.

The \$550m deal will create one of the biggest offshore banks in the world, with offices in nearly 40 countries, assets of \$13bn and shareholders funds of around

After American Express' acquisition of Shearson Loeb Rhoades last year, the group is one of the biggest players in the worldwide financial services industry with interests ranging through banking, stock broking, insurance and travel. The one thing it lacked was a big private client base and this is where Edmond Safra's Trade Development

bank worldwide.) Mr Smith said the object of the "copper project" was to "emulate and follow TDB".

In October American Express approached TDB and Mr Edmund Safra suggesting thoughts on a pro-posed merger. Both Mr James Robinson and Sandford Weill visited Europe to conduct negotiations with Safra and the deal was finally signed in Montreal at 2.12 a.m. yes-

terday morning. Mr Rodney Leach; an English executive director of Trada Develop-ment Bank, describes the deal as a "logical fit especially when you see the direction the financial services industry is going." American Express will be able to provide Trade Development Bank's customers which a much wider and more sophisticated range of financial ser-

He stresses that both participants are extremely profitable and con-servative and neither side has faced any difficulties in the recent uncertain international banking climate. Quite the reverse says Mr Leach who notes that Trade Development Bank has been almost embarrassed by the numbers of people wishing to deposit money with it.

Nevertheless, the merger marks a major change of direction for both banks. Less than a year ago, Mr Safra announced plans to merge his Luxembourg-based master company, Trade Development Bank Rolding (TDBH) with its New York affiliate, Republic New York Corporation, which accounts for about balf the capital and earnings of the

Rea Brothers in limelight over proxy row

can entrepreneur, has this week fired his second broadside in 10 days against Sir Walter Salomon, chairman of Rea Brothers merchant bankers, in his battle to mount a takeover of Canal-Randolph Corp., a U.S. real estate company chaired by Sir Walter.

His announcement on Monday of an alternative board of directors to replace Sir Walter's board if his battle for control of the company suc-ceeds comes bot on the heels of lawsuits filed in the U.S. against Sir

The suits allege violations of federal securities laws. One falls under the Racketeer Influenced and Cor-

rupt Organisations Act. The battle for Canal-Randolph has brought into the limelight one of Britain's more baroque banking institutions, and one of its more enigmatic figures. Sir Walter, in so far as he is known at all, is known as an old fashioned liberal, and something of an outsider in the London banking community. This is per-haps epitomised by Rea Brothers' motto - "Recte fac, noh temere" -"Do right and fear not."

Mr Edelman, who described himself as "an experienced real estate appraiser," has built up a 20.8 per cent stake in Canal-Randolph since

If the lawsuits filed in the Delaware courts succeed, they might disenfranchise Sir Walter and com-

built up a 28.6 per cent stake in Canal-Randolph without observing

This holding came to light on December 17 last year, when Rea Brothers disclosed to the U.S. Securities Exchange Commission (SEC) that 15.4 per cent of Canal-Randolph stock was held by companies managed by them.

A further 132 per cent of Canal-Randolph stock was held by the Rea Brothers group through discre-

over of the company.

His bid seems to be blocked by the resistance of shareholders rep-resented by Sir Walter and Rea

nanies managed by Rea Brothers at the company's annual meeting in March. It is here that a proxy battle for control of the company will be fought. Success in the lawcourts will, therefore, open the way for Mr Edelman to complete his takeover of Canal-Randolph. It is alleged that Sir Walter has

a securities exchange requirement that any stockholder must disclose his holding in a company once it ses 5 per cent, and every one per cent thereafter.

Under SEC laws, anyone who

"has or shares the power to vote or dispose of" a particular stock is deemed to be the beneficial owner, and is therefore compelled to dis-MR ASHER EDELMAN, an Ameri- last April, and is intent on a takeclose that ownership once it reaches 5 per cent.
It is Mr Edelman's allegation that

the interlinking stakes held by Rea Brothers and the companies managed by it made Sir Walter the beneficial owner, and as such he had a controlling interest in Canal-Randolph which ought to have been disclosed to the SEC.

The companies using Rea Brothers as managers are the Scottish and Mercantile Investment Trust, the Scottish Cities Investment Trust, the Lancashire and London Investment Trust, Ocean and Wilsons Holdings, Jastlin, and Fashion and General Investment.

In these companies, none of which has more than six directors, Rea Brothers has at least two of its own directors. In two cases it has three. In all but one case directors also sitting on the Rea Brothers board account for half or more of the company's board.

It is understood that Rea Brothers has always held the view that relationship with these companies did not make it a "beneficial owner" did not make it a "beneficial owner" Montagu, the merchant bank, of any significant chunk of Canal- which with four companies under

stock. As such, Rea Brothers felt there was no need to disclose stockbeldings. Under British law, it is understood there would be no liability to disclose a stake in similar cir-

Neither side was prepared to comment on the issue before the court case. Mr Edelman has won pediting discovery" on the lawsuits, which means that it is highly likely the cases will be heard before March 9, the date of the annual meeting at which the proxy contest for control of the Canal-Randolph board will be held.

In his action, Mr Edelman is asking that if his case is upbeld, then the shares held by Sir Walter. Rea Brothers Group, or the six companies managed by Rea Brothers, be ineligible to vole in the proxy con-

He is also asking that these var-ious British stockholdars be forbidden from buying fresh shares, and that they be forced to divest their holdings. He is also claiming monetary damages and punitive damages of 510m.

He is also citing Montagu Investment Management, part of Samuel Randolph stock. Each company was its management owns 5.74 per cent seen as an individual owner of of Canal-Randolph stock.

hived off from Butler Brothers of the U.S. At that time, it comprised a stockyard in Canal Street in Chicago. Today, it is a large U.S. real estate company, which operates seven office buildings across the country, and owns United Stockyards Corp the largest livestock stockyard company in the U.S.

Sir Walter Salomon has been chairman of the company since 1960 "building it up conscientiously and conservatively.

It is thought that Sir Walter sees this week's law suit as nothing nore than part of a rough-riding takeover strategy that symbolises one of the less savoury aspects of U.S. corporate life.

PETER MONTAGNON IN LONDON ON GROWTH AMID CONTRACTION

BIS reveals paradox in banking

THE LATEST batch of quarterly banking statistics from the Bank for International Settlements (BIS) offer a particularly difficult brainteaser, even for those who willingly pick through page after page of densely printed figures in search of new trends in international lending. The figures cover the third ouar

ter of last year and, not surprisingly, the BIS records a sharp contraction in net new international bank Overall expansion of net ner

business slowed to \$25bn from \$30hn in the second quarter. New lending to non-OPEC developing countries actually fell by \$800m at er an increase of \$13bn - the first absolute decline since 1977. But the growth in gross interna

tional banking assets continued apace. In the third quarter they in-creased by \$68.9bn to \$1,627bn compared with an increase of \$28.4bn in the second quarter.

The BIS explains the discrepancy between these two trends by point-ing out that a large part of the increase in total assets was accounted for by a very strong revival of inter-

Cross border interbank deposits rose by \$50.5hn after a growth of only \$3hn in the second quarter. Interbank claims in foreign currency within individual reporting centres rose by \$26.5bn after falling \$32.5bn

and Markets INTL. COMPANIES & FINANCE

The Socialist Government teams up with the Bourse

French companies urged to go public

A DRIVE to encourage more private companies to go public has been mounted by France's

Next month, M Jacques
Dens, the Finance Minister—
a leading figure in attempts to
wake up the country's longsomnolent capital markets—will formally inaugurate an unlisted securities market in Paris, closely modelled on the scheme introduced in London two years

ago.

The aim, according to M
the chairman of Yves Flornoy, the chairman of the Paris Stockbrokers' Association, is to tempt French companies away from their traditional preference for finan-

Entry qualifications for the market—to which M Flor-y hopes to struct at least 30 companies over the next two years

will be undemanding.
Company proprietors who had previously fought shy of a bourse quotation for fear of losing their independence will have to offer no more than 10 per cent of their shares to the public (the same as on the USM in London) rather than the 25 per cent which was previously the minimum.

kept as low as possible with reduced bureancracy. And, unlike the Paris Bourse's previous attempt to encourage fresh blood (it set up in 1977 a kerh market as a "waiting room" for companies preparing a full bourse quotation), there will be no obligation for com-panies to seek full entry on the Stock Exchange after three

CE MOVEMENTS

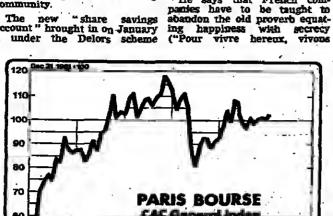

French patrons have never been enthusiastic about wading out from the traditional shallows of family ownership and selling their shares to the public.

Since then, the Government called for tax concessions to be has taken steps to suggest that introduced along French lines, has been mounted by France's Socialist Government together with the country's bourse authorities, in a bid to improve the finances of the carporate sector.

Next month, M Jacques Delay, the Finance Minister—a leading figure in attempts to wake up the country's long.

to increase equity investment in the UK To show that ideas can flow in both directions. M Flornov makes no bones about admit-ting that the stimulus for the unlisted securities market has come from the London Stock Exchange's venture. He says that French com-

The new "share savings account" brought in on January 1 under the Delors scheme

allows individuals tax deductions amounting to 25 per cent of their net share purchases a year, up to s ceiling of FFr 7,000 annually (equivalent to \$1,050), ing of capital bases, and giving or FFr 14,000 for a married impetus to finencial planning.

details were altered slightly during passage through the National Assembly late last year. Originally, the plan was to give concessions of 20 per cent np to a ceiling of

But a generally favourable view of the new moves, the ample amount of liquidity oo their shares to the public.
Only about 2 per cent of
French companies are quoted on
the country's stock markets—
one of the long-standing causes
of the severe under-capitalisation of many concerns.

The Socialist Government cut
into the importance of the Paris
Bourse by nationalising key
private lodustries and banks
last year. The move deprived

ample amount of liquidity oo
offer, and the strength of Wall
Street, have combined to give
the stock market a solid 1983
start. The CAC General stock
market index, which rose only
a laggardly 1 per cent last year,
has risen s further 2 per cent
so far in the New Year, while
the more narrowly-based Trend
Index has gained more than 4
last year. The move deprived

Additionally, the Government's wealth tax may act as an incentive for some company owners to sell off their shares to raise ready cash, be argues. When the unlisted securities scheme starts up on Fehruary 1, some 21 companies already in a special "waiting room" section will transfer to the new

companies in the preferred capitalisation range of FFr 50m to FFr 100m. Two companies-Zodisc, the

rubber group, and Soderho, the catering chain — are already known to be planning early the stock exchange of some of its glamour stocks and wiped some FFr 300n (\$4.5bn) off total share capitalisation, reducing it to about FFr 200bn (\$30bn).

The move deprived per cent.

Ironically, the Socialists' to be studying the possibility. If no more than 30 fresh concerns join up over the next two years, declares M Flornoy, the interest of the project can be considered a failure.

As part of additional efforts to beef up the importance of the Paris share market—the size of which M Flornoy has compared in the past to that of Kuala Lumpur—the Bourse authorities plan to unity the "cash" and "term" markets by the end of this year. Continuous trading from 10 am to 4 pm using computers is mentally next year and to hecome operational in 1985.

As for this year, M Flormon ascribes the huoyant start on the Bourse not to the ecocomic environment — where he criticises the Government for con-tinuing to hold down prices and profits—but to moves to correct an imbalance of holdings in restors' portfolios.

Many portfolio managers have reduced the proportion of French equities in their security portfolios to 10 per cent or 20 per cent—the rest being bonds (where turnover on the Paris Bourse last year was three times that in shares) and foreign equities.

This means a shortage of shares to come on to the market — which helps explain why the recent rights issues, amounting by Paris standards to a wave, have failed to disturb

Partly to get round the Government's dividend controls, which are lifted only for com-panies increasing capital by at panies increasing capital hy at least 10 per cent, a stream of concerns has recently announced capital rises, includ-moet-Hennessy, the diversified chamnagne company, Skis Rossignol, the sports equipment group, BSN-Gervais Danone, the foods concern, and Compagnie Generale des Faux the diversi-Generale des Eaux, the diversi-

fied water group.

M Flornoy says that last year's total of new share issues a special "waiting room" section will transfer to the new
market.

M Flornoy numbers the
potential candidates for the new
sector at 400 to 600, mainly
sector a cent on other international stock exchanges, on his assess-

> All the same, the amount of new capital raised lo share issues will still look puny comof the Paris bond market, where new issues leapt in 1982 to FFr 154bn from FFr 107bo in 1981, and look set to forge further ahead in 1983.

MAKE YOUR REPORT & ACCOUNTS WORK HARDER AND FOR THE WHOLE YEAR

The most important document every financial institution circulates each year is its Report and Accounts

This is why The Banker takes them very seriously.

If you advertise a summary of your balance sheet in The Banker readers may respond either direct or through us for copies of your full report and we index your announcement in every issue of The Banker for 12 months—extending its working life for a whole

In 1982 over 400 banks and financial institutions requested over 2,000 annual reports through The Banker.

Advertise a summary of your balance sheet in The Banker and you will be very surprised how many institutions from all over the world are interested in the financial strength of your organisation and its range of services.

Further help proposed for Amsterdam shipyard

BY WALTER ELLIS IN AMSTERDAM

dam council Fl 6m and the ability.

THE FUTURE of ADM, the Amsterdam ship repair yard, is likely to be decided in the Dutch purliament today. MPs have been asked by the Government to rule on whether state backing should be given to an Amsterdam city council scheme for the purchase of two ADM floating docks for s total of FI. 15m (U.S.\$5.8m).

City councillors want the Government to agree to take over the FI 15m deht lf, despite the purchase, ADM goes bankrupt. The deal would be that Amsterdam liself would buy the docks but that the state should hover closely behind, cheque book in hand.

ADM has been in deep trouble for several years. Strong competition for repair orders from the Far East has eaten substantially into the Dutch company's reserves and only regular hail-outs by the Economics Ministry have prevented an early collapse. Last week, the Ministry, with the utmost reluctance, agreed to find another FI 9m to help the company out of its present affigulties. The Social Affairs Ministry added FI 2m. Amsterdam council FI 6m and the stability.

Why AT & T's customers are cutting loose

Some major U.S. companies are finding it more efficient to run their own systems. Guy de Jonquieres reports

America's Communications Revolution:

Part 6

Akai sil

deebly h

Day Blum

33 Brofik

for ling

OVER THE next few months strange apparition will start to take shape on Staten Island, a nondescript New York borough a few miles south of Manhattan. From behind a rampart of heaped earth will rise a cluster of satellite ground stations their of satellite ground stations, their dish-shaped aerials pointing out into the stratosphere.

Residents who inquire about the development will be in for another surprise. For it is not the work of NASA, the Central Intelligence Agency or American Telephone and Telegraph—nor, indeed, of E.T.— within 12 months after it starts but of Merrill Lynch Pierce operation later this year and to Fenner and Smith, the world's make profits in three years. He largest financial services group.

The project, known as Teleport, is an eye-catching example of a growing trend among large U.S. companies. Faced with steadily mounting communications costs, many are finding that it makes sound commercial sense to take their custom away

voice and computer data traffic.

They are permitted to do so by the increasingly liberal policies applied by the Federal Communications Commission (FCC), which have effectively opened up telecommunications to all-comers. Such freedom is still unthinkable in most western European in most prime marketing targets is the broadcasting networks and cable television companies, which require huge transmission capacity to send programmes across the country.

One such enstoner, Financial to News Network (FNN), recently continued in most live financial to the broadcasting networks and cable television companies, which require huge transmission capacity to send programmes across the country.

One such enstoner, Financial to set up shop in Merrill Lynch's headquarters. FNN, transmission to send programmes across the country. They are permitted to do so, by the increasingly liberal policies applied by the Federal Communications Commission (FCC), which have effectively opened up telecommunications to all-comers. Such freedom is still unthinkable in most where telecommunications is dominated by state monopolies, many of which are reluctant even to lease circuits to companies for their internal use.

The increasingly liberal grammes across the country.

One such customer, Financial telecommunications hudget, currently running at about telecommunications hudget, currently running at about the currently running at about the company, which is low transmits 25m messages a day between its 500 U.S. and 60 for a company in its business.

The company, which is low transmits 25m messages a day between its 500 U.S. and 60 for a company in its business.

The above the communications overheads. It recent sharp rises in AT&T's uses its own computers to route telephone calls via the most lines, on which many companies for their internal use.

The less of lucrative business simultaneously when it is companies for their internal use.

is clearly worrying for AT&T.
But the recent decision to
curtail its U.S. monopoly should
allow it to fight back by cutting its long-distance rates and by introducing new competitive transmission systems such as business satellite networks.

business satellite networks.

Citicorp, the second largest
U.S. bank, has so far spent an
estimated \$100m purchasing and
installing communications
systems for its own use. Says
Ken Philips, a vice president
in its office of telecommunications: "We have established
that we can do a better job
than the telephone company,
primarily because we use more
advanced technology."

While AT&T must build into
its regulated tariffs depreciation

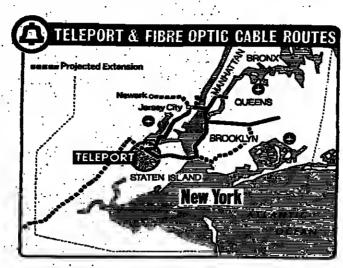

its regulated tariffs depreciation

charges for investments which date back decades, its customers charges for investments which date back decades, its customers are finding that they can get better value for money by purchasing equipment from tival suppliers whose prices reflect the dramatic fall in the cost of micro-electronic components. U.S. manufacturers such as Rolm, for instance, today sell private exchanges (PBXs) at prices only about three-and-a-half times the annual rental which ATAT charges for a technically less sophisticated system.

Merrill Lynch, which expects to invest a total of \$60m in Teleport jointly with Western Union, has gone even further. As well as handling the vast quantities of information which pour in and ont of Merrill Lynch's Wall Street head-quarters, the project is intended to pay its way by serving other large corporate users in New York.

Gerald Ely, head of tech-nology planning at Merrill Lynch, expects Teleport to generate positive cash flow within 12 months after it starts says that the fibre optic cable linking it to customers will carry computer data at far higher speeds that AT & T's landlines and at a lower cost. "It's not our intention to take

business away from AT&T...but that's where the husiness will come from," he says. One of his prime marketing targets is the broadcasting networks

TELEPORT is designed to offer companies in New York direct access to communications satellites which can beam two-way voice, data and video traffic almost instantaneously between points thousands of miles apart.

The U.S. is already served by 16 domestic communications satellities and many more launches are planned in the next few years. International transmission capacity will be boosted by craft such as Britain's privately-financed Unisat, due to

Users of Teleport, which is being developed jointly by Merrill Lynch, Western Union and the Port Anthority of New York and New Jersey, will be connected to ground stations on the Staten Island complex by a high capacity fibre optic

The network will carry communications signals at the same very high speeds as satellites transmit them. Initially 25 kms long, it is being laid by Western Union, which has the rights to use AT&T's telephone ducts.

Af present, the nearest large commercial ground station to New York is located some 200 miles away in West Virginia and access to it is via a conventional coaxial cable. According to Gerald Ely (right), Merrill Lynch's head of technology planning, the cost of using the cable can be almost as high as the charges for satellite time.

He believes that some Teleport customers will also use its fibre optic network to transmit computer data between locations in the New York area. It is designed to operate much faster than AT&T's circuits, which most companies currently use for this purpose.

local network which carries all

A decision to go ahead with the project was taken after a detailed analysis had been carried out by McKinsey, the management consultants. The study showed that the investment in Teleport would be justified by the expected more than 28m minutes per savings which Merrill Lynch would make just on its own minute have fallen to less than

by more than 50 per cent in 1981 after AT&T abolished a legally controversial bulk discount scheme called Telpak.

Local rates bave soared by as much as 20 per cent a year, partly because Government regulators have started to restrict the subsidy which AT&T may pay out of long-distance revenues to its less profitable local telephone comprofitable local telephone com-panies. Local charges are set to rise again by two or three times by 1990 after the Bell System is broken up at the start of next year.

City.
Few large companies have been more aggressive in applying the benefits of advances in communications technology to their business than Citicorp. Since the mid-1970s, It has pursued a systematic policy of investing in its own communications systems whenever upproved economic to do so.

It is at present building a high-capacity fibre optic link between its mid-town New York beadquarters and its computer centre a few miles away on Wall Street. It is also constructing a private satellite network to handle high-speed data transfer between New York and locations in other parts of the U.S. such as its bank card processing centre in Sioux Falls, South Dakota.

The company, which spends about \$150m a year on communications. hardly uses AT&T's public switched network for its inter-office long-distance calls, relying instead mostly on private lines leased from competing carriers. It economises on overseas traffic by using transatlantic leased circuits connected to its own private exchange in Lewisham, south east London. From there, the calls can be switched directly into British Telecom's the large electrical and broad-casting group, is tackling the public network.

problem by building its own microwave radio network to connect 22 of its plants and offices. The network due to be completed this summer, will It has also obtained FCC licences to establish digital microwave networks in a dozen completed this summer, will use expected to eliminate annual telephone tharges of about \$5.5m and to save the company \$65m over the next decade.

Manage

Westinghouse, whose total Citicorp is legally prohibited communications bill rose 38 from becoming a common per cent in 1981, is also relying carrier and selling capacity on increasingly for long-distance its networks to others. It is its networks to others. It is nonetheless exploiting oppor-

systems.

In Chicago, Allstate insurance, a subsidiary of the large Sears' retail chain, is considering plans to lay a 25-mile fibre optic circuit to carry voice and data traffic. Initially, the cabte would link six of its offices and a satellite ground station, but spare capacity might be leased later to other companies in the city.

Few large companies have

Criticorp is also experimenting with home banking systems, which chable residential custo-mers to carry out financial transactions on a terminal in their hoose which is linked to a Citicorp computer. The bank has designed an inexpensive terminal which is on trial in several hundred households in the New York borough of Queens. The system will also be made available to owners of popular personal computers.

Citicorp is still pondering how to market the system commercially. It doubts whether it can be producted in the system college.

can be profitable if used solely for banking and has not yet decided how to offer other types of service on it, such as clec-tronic shopping. But a consensus is growing that the spread of such systems is only

a matter of time.

Ken Philips thinks that electronic technology, combined with corporate diversification of the kind which has taken Sears into broking, insurance and property sales, will eventually create huge overlaps between previously separate businesses.
"The day is not far off," he says. "when people will order car tyres from Citicorp and go

Western Board Mills has be of benefit in the group and beaten its forecast of lower profits for the six months ended of a further profit on sales of September 30 1982 by returning investments (£107,000 in the first September 30 1982 by returning investments (£107,000 in the first figures of £882,000 at the pre-tax balf) taken in the current half level, compared with £884,000 for the same period last year.

At the annual meeting last September Mr H. Vogel, the chairman, sald business conditions had been difficult and share: a final of 4.5p was paid

previously.

First half turnover fell from

thining the trade profitably, results for the first half would be somewhat below those of the corresponding months of the previous year.

Sales in the last quarter of 1982 were glow but Mr Vogel says they have recently shown signs of improvement.

He points out that the slide

First half turnover fell from firm to fill from the group is involved in the manufacture of mill and fibre boards and the fabrication of board components. Tax took £435,000 (£449,000) after which stated earnings per share emerged at 8.5p (7.8p). Retained profits amounted to £341,000 (£309,000).

The group's nitrade profits from the group is involved in the manufacture of mill and fibre boards and the fabrication of board components.

Tax took £435,000 (£449,000) after which stated earnings per share emerged at 8.5p (7.8p).

Retained profits amounted to £341,000 (£309,000).

Horsell Group optimistic

A rise of £106,000 to £812,000 in pre-tax profits is reported by Frank Horsell Group, the Leeds printing equipment manufacturer, for the half-year to September 30, 1982. Sales were up by 26 per cent at £8.72m against £5.31m, and the directors say this was a "creditable achievement" in a time of recession.

They was a "in massa in a sale of the company has been sold at its net asset value.

Mr Alan G Martin, the chairman, says the construction of a second coll line for the production of presensitised plates, fore-the chadowed in July, is now wall in hand. This will provide for the

port sales of 47 per cent is particularly commendable in the light of the strength of sterling in that period. The board expects the second balf to be more profitable than the first.

The pre-tax figure was struck after depreciation of £319,000 against £180,000 and interest payable of £124,000 (£106,000).

Mr Alan G Martin, the care and the company has been sold at its net asset value.

The resources thus released, together with the enhanced profit retentions to be expected as a together with the enhanced profit result of the proposed benus issue—by a capitalisation of the share premium account—will be need to accelerate the successful development of the other company has been sold at its net asset value.

The resources thus released, together with the enhanced profit result of the proposed benus issue—by a capitalisation of the share premium account—will be need to accelerate the successful development of the other company has been sold at its net asset value.

The board believes that it is in the interests of the company to reduce its overall dividend costs for the financial years ending March 31, 1983-1987. Horsell's shares are traded on the market made by M. J. H. Nightingale and Co.

The results and balance sheet details disclosed yesterday give shareholders in Lincroft Kilgour shareholders in Lineraft Kilgeur a chance to see the new shape of the company, which has been in a state of flux for the past.twn years. The disposal programme is now virtually completed and the £1.5m cash pile will remain invested in marketable securities, in accordance with board-room policy. Return on capital room policy. Return on capital employed, the board's chosen criteria of success, stand at 5 per criteria of success, stand at 5 per cent, against a target of 10 per cent. For the current year, investment income will probably stabilise, but trading income will benefit strongly from the absence of further redundancy charges. With higher spending at the retail end likely to feed back to the clothing manufacturers, Lincroft is now an attractive warwick Street and three other the freehold premises, the attributable net profit came nut at the clothing manufacturers, Linzelly. (£237,059) for earnings of 3.16p (5.1p) per 10p share, the group's freehold and long leasehold properties, other than an office in Belgium, were revalued at September 30 1982 with higher spending at the retail end likely to feed back to the clothing manufacturers, Linzelly is now an attractive recovery stock, with a yield of 7.5 on the increased divided as a special ottraction for the shares which jumped up 10p to 40p yesterday.

Bellair back in the black

FOR THE full year to October against previous losses of £21,000. Despite increased losses at the halfway stage the directors say that the profits achieved in the second half — amounting to £152,000—justify the recommendations of the board and subsequent resolutions passed in

share were given as 0.42p (losses 0.82p). There is again no divi-dend—company is 76.2 per cent owned by Fenton Hill Inter-

An increased loss of £142,000 against £51,000 was made at the halfway stage. The principal cause, according to the directors, for the loss for the six months to April 30 1982 was that from November 1 1981 the company ceased sharing the use and cost of a factory with its associate, together with management and calling overheads.

. The directors point out that the first half loss was achieved despite the "substantial" increase in turnover from f634,000 to f1.14m. They add that it was also indicative of the seasonal nature of the business resulting in losses for the first half and profits in the second

Countryside improves by 34% and expects further progress

profits and a higher divideod are reported by Essex-based property developer and housebuilder Countryside Properties for the 12 months ended September 30

At the pre-tax level profits rose to a record £1.78m, an increase of £449,000 over the previous year's figures. The second half contribution advanced from £908,000 to £1.23m.

A final dividend of 2.695p (2.45p) raises the net total by 0.385p to 4.235p per 25p share—a higher increase in the final dividend was considered but the directors say they believe tha group's future prospects would be better served by retaining as much profit as is reasonably possible while still increasing the dividend by a bidney reasonably the dividend by a higher margin than the rate of inflation generally.

Looking to the current year Mr Alan Cherry, the chairman, says given economic conditions no worse than those experienced recently 1982-83 will prove in be a further period of satis-He adds that prospects for

Randfontein does well in December quarter

BY GEORGE MILLING-STANLEY

Anglovaal groups to improve their oct profits for the period.

Randfootein Estates in the Johnnies group, the leading light in the recent upsurge in gold share prices on the stock market, boosted mill throughput by supplementing ore from underground—with reprocessed material from surface dumps.

The operation managed to maintain its recovery grade at 5 grammes of gold per tonne, and svoided any increase in working costs, with the result that operating profits rose by one-fifth.

A lower charge for taxation and tha State's share of profits under the mining lease formula, in consequence of higher capital expenditure, brought about an increase of almost 70 per cent in net profits to R67.91m (140m).

The rise in capital spending followed the mine management's decision to speed up the pace of development work, especially on the richar Cooke section. Values as high as 12.3 grammes of gold ner tonne were echieved at the

as high as 12.3 grammes of gold per tonne were echieved at the Cooke No. 3 shaft, although the latest report pointed out that this was limited in area.

The forward sales policy of the big but low-grade Western Areas in the same group to some extent cut the mine off from the benefits of the improvement in the bullion

price.
The average gold price received was almost \$40 lower than for Randfortein Estates, in man for Kandsonean Estates, in sharp contrast to the September quarter, when Western Areas reported a higher price than Randfontein, in spite of its

forward sales.

The September figure of \$376 has, however, subsequently been found to be in error, and Western Areas has re-stated its gold price for the September quarter at \$357 an ounce. This shows clearly the effects of the policy of selling the bulk of production forward, in that it denies a mine the benefits of e rising bullion price. forward sales. The September figure of \$376 has, however, subsequently been found to be in error, and Western Areas has re-stated its gold price for the September quarter at \$357 an ounce. This shows clearly the effects of the policy of selling the bulk of production forward, in that it denies a mine the benefits of e rising bullioo price.

Nevertheless, Western Areas has achieved its objective of keeping the mine open during last summer's weakness in the gold price, without resorting to state aid.

The Angloval group's Hartebeast in the sestionating managed only a substantial constanting more than pala copper mine and Ho smelter as a result of a labour stoppage shareholders to its offer of three Academy as a result of a labour stoppage which began on January 6. Assarco holds 52.3 per cent of SPCC.

Australia's Endeavour Resorting to SPCC.

Australia's Endeavour Resorting for the Monday is confinuing discussions with the National Companies and Securities Commission (NCSC).

The latter requested the suspension of trading in Endeavour shares in Melbourne on Monday because it felt the market was because it felt the market was because in felt the market was because it felt the market was because in felt the market was because in felt the market was because in felt the market was because it felt the market was because of 5.1 grammes of gold processors with the subspension of trading in Endeavour shares in Melbourne on Monday because it felt the market was because it felt the market was because of 5.1 grammes of gold processors with the SPCC Toque acceptances totalling more than acceptance to acceptances totalling more than acceptance in acceptances totalling more than acceptances totalling more than acceptances totalling more than acceptances totalling acceptances totaling acceptances totaling acceptance

price.
Nevertheless, Western Areas
has achieved its objective of
keeping the mine open during
last summer's weakness in the preference chares.

The number of warrants to be issued will be determined early overt month by dividing the Canadian dollar equivalent of 8 per cent of the loan by the market value of the warrants at that time.

Areas Nevertheless, Western Areas has achieved its objective of keeping the mine open during last summer's weakness in the gold price, without resorting to state aid.

The Anglovael group's Hartenbertheless warrands only the state and th

and the state of t

THE HIGHER everage gold marginal increase in net profit. security of loans of A\$7.94m price during the December Increases in the gold price and (£4.96m) made by Endeavour to the milling rate, plus a slight the small Nabta and Namka comproducers in South Africa's rise io grade, produced higher panies which had used the loans Johannesburg Conselledated operating profits, but a cut in Investment ("Johnnies") and capital speeding meant a higher Copper and which had since sold their oet profits for the period.

Readlocately Eristes in the West: just 2 ner cent higher. were just 2 per cent higher

The marginal Loraine suffered from higher working costs, following a reduction in the amount of ore drawn from surface dumps, and had to repay more to the state assistance scheme for the September

quarter.

In spite of this, net profits improved, largely in consequence of the higher gold price and a positiva contribution from non-mining lucome.

non-mining Income.

The group's base metal operations, the copper-producing Prieska and the antimony and gold concern Consolidated Murchison, both cootinned to do better over the period.

Prieska benefited from an increased number of copper shipments made in the December quarter, while Murchison was saved by higher income from its by-product gold.

Round-up

Southern Para Copper Cor-poration (SPCC) has completed on schedule the repayment of a \$200m (£126m) loan, the major segment of the approximate \$400m financing for the construction of the big Cuajone copper mine in Peru which was completed in 1976. The mine, which is owned as to 91 per cent by SPCC and 9 per cent by Billiton of the Nether-

lands, is currently closed together with the SPCC Toque

UK COMPANY NEWS

Trent Holdings up 44% at midway

tinuing to grow.

To ensure that capacity keeps pose with demand and that delivery periods do not become prolonged, the new factory has been extended and additional plant installed.

In the half year group turnover advanced by £510,000 to £1.59m and the profit before tax by £46,753 to £151,985.

Earnings are shown at 5.87p.

Earnings are shown at 5.87p per share (4.85p). The interim dividend is lifted from 8.7p to 0.84p—in 1981-82 e total of 1.75p was paid from a pre-tax profit of \$225,000.

THE ADVANCE in profits forecast by Trent Holdings for the half year ended September 30 1982 turns out to he 44A per cent. The company is a specialist door manufacturer and formeriy enjoyed the title of Leaderflush (Holdings).

Tha directors report that 1982 is proving to be a successful year for the group, with the demand for the group, with the demand, fire resistant and security doors continuing to grow.

To ensure that capacity keeps pose with demand and that delivery periods do not become prolonged, the new factory has been extended and additional

shops and public buildings. The factory in Derbyshire near the MI, which was occupied three years ago, is currently werking flat-out with 120 employees and the order book is worth about £1.6m, 50 per cent up on this time last year. The possibility of selling off over six acres of adjacent land, now that an option has expired, should eliminate borrowings, already low, and encourage the company to diversify into security installation. It already has an eye open for a small low-profile.

Tomover 1982 1981 eye open for a small low-profits company. But after the turnoil boardroom battles six years ago, 18,774 30,491 forest before tax 151,585 105,222 12,500 eye open for a small low-profits company. But after the turnoil boardroom battles six years ago, 18,774 30,491 forest before tax 151,585 105,222 12,4500 eye open for a small low-profits company. But after the turnoil boardroom battles six years ago, 18,774 30,491 finit its prospects for rapid growth. Pre-tax profits this year should reach £330,000 which has cornered for itself a tightly-defined but rapidly growing market segment where it has only 14p.

Caledonian Cinemas **improves £93,000**

Inverness

DESPITE A reduction in turn-over from £5.58m to £5m, tar-able profits of Caledonian Asso-clated Cinemas increased from Although e public enquiry was restrictive practice removed.

Although e public enquiry was held last March, the company has only just been advised that the Secretary of State for Scotland has turned down its appeal against the refusal of planning permission to redevelop tha site of the former Playhouse Cinems and adjacent buildings in Inverness. £195,000 to £288,000 for the 28 weeks to September 25 1982.

However, the directors say that the results for the interim period are not necessarily representative of those for the full year. For the 12 months to March 27 1882, pre-tax profits slumped from £905,000 to £215,000, on turnover of £10.78m (£9.91m). Inverness.

This is e most disappointing decision, say the directors, who add that the company must now rousider afresh what, if any, potential this town centre site has for an economically viable redevelopment in the light of the continuing planning difficulties.

The company's operations turnover of £10.78m (£9.91m).

Tax charge for the first haif of the current year rose by £55,000 to £174,000 leaving net profits ahead at £114,000, as against £77,000. The net interim dividend is a same-again 2p per 25p share—last year's final was 7n.

The company's cineme results cover cinemas and leisure, continuit to be affected by the barring regulations, the directors property and retailing. The state. An unsuccessful application was made in October 1982, Equity Trust.

Extracts from the Chairman's Annual Statement

The objectives I set for the Group two years ago have largely been achieved - they were:

 To improve profitability of successful retailing activities as a firm base for future growth.

 To rationalise or dispose of activities unlikely to contribute significantly to future profitability.

To reduce substantially dependence on a high level of bank

All principal activities of the Group now contribute to profits. A cash surplus has been generated after having financed £17m of capital expenditure. Most importantly, the Group has established a firmly based retailing organisation with proven trading formulae targeted towards major segments of the clothing market.

An independent valuation of the Group's freehold and long leasehold property portfolio shows £60m in excess of net book value.

Speaking to shareholders at the Annual General Meeting. the Chairman said:

Sales for the first twenty weeks of this year, to 15th January, are 25 per cent ahead of the comparable period last year." Copies of the Annual Report and Accounts may be obtained from the Secretary, The Burton Group plc, 214 Oxford Street, London W1N 9DF.

Flour sale to Egypt adds force to Ghana wins Drought threatens Southern African crops farm trade war threats to EEC

THE U.S. has backed up threats major breakthroughs soon. They of a farm trade war with the EEC by agreeing a subsidised Im tonnes wheat flour sale to Egypt. It is the first American decado, the market having gone part of the dairy surplus on the more and more to subsidised EEC exports. The U.S. deal represents one-sixth of the ending to the challenges to the EEC whils negotiations are proceeding, but a great ago, the Americans held almost 30 per cent of the Egyption flour market. That the first American discussions do not produce share shrank to nothing as the EEC increased its foreign sales of subsidised flour.

The Ecc now sells Egypt about Im tonnes of flour a year, offering it at prices far below that American millers acn offer. The U.S. bas not concluded flour, and the concluded flour and the end of the Egyption flour market. That the first American flour market also still considering a plan to sell of subsidised flour.

The Ecc now sells Egypt about Im tonnes of flour a year, offering it at prices far below that American millers acn offer. The U.S. bas not concluded a flour deal with the Egyptians

flour.

It will be indirectly subsidised by the U.S. Government through the provision of cutprice stockpile wheat to the millers.

• NON-FERROUS Metal Works of the World has produced an updated and extended third odition. Metal Bulletin Books,

Withered grazing has forced

The surplus has been aggra-vated by stagnant demand for red meat following steep price increases in recent years and the effect of the deepening

recession in South Africa on household spending patterns.

The meat board is considering a reduction in the controlled "floor" price or some form of consumer subsidy to stimulate demand for meat.

Low prices, this time in the international market, have also exacerbated the problems of

exacerbated the problems of karakul (Persian lamb) pelt

producers in southern Namibia

and the Cape Province. Mr G. C. van Wijk, chief executive

of the International Karakul Secretariat, estimates that only

I-I.5m skins will be produced this year, compared to 2m in 1982 and 4.8m to 1981.

RAIN CAME to a perched Transveal at the weekend-too late to reverse much of the damage caused by Southern Africa's worst drought for a decade.

To add to farmers' worries, some areas are sweltering under record temperatures. In the North-West Cape, where the last good rains fell in 1974, temperatures soared last week to a bilstering 46 degrees centi-

Zimbabwe's capital. Harare. had its hattest January day ever last Monday, and evaporatish rates in some areas are up to a quarter higher than

Thanks to good rains in Botswana last November, the drought is not as critical yet as it was last year. Nonetheless, the Gaborone dam which supplies the country's capital with water is now only about onethird full. The hot, dry weather has

come at one of the most critical times for summer crops—particularly make, which is both a staple food and one of the region's most important export commedities.
The South African Maize Board discussed a suspension of its export programme last week, but decided to wait another fortnight or so. South Africa is the world's fifth largest maizo exporter.

Recent rainfall is not enough to overcome drought conditions. Bernard Simon reports

able yet. Some of the main Mashonaland which is hardest South African growing areas, hit. such as the Western Transvall and North-West Orange Free State, may still produce good

But almost half the crop in the Eastern Transvaal bas already been lost and much of the rest wil be of poor quality. The highest guesstimates of this year's South African crop are around 8m tons, slightly lower than last year and well down on the 14.2m tons har-

If official estimates—the first of which is due within the next of which is due within the next month—indicate a crop of less than about 6m tons, exports are likely to halt. South Africa's domestic maize consumption is around 6.5m tons a year. The Zimbabwe Department of Agricultura said this week

that crops in many areas were past permanent wilting point and were either dead, dying or losing yield. Tobacco plants have been scorched and are flowering too early. This is Zimbabwe's second

consecutive year of drought, and this season's damago may be worse than in 1982. Last week, but decided to wait be worse than in 1882. Last inother formight or go. South year's dry conditions particularly affected livestock areas but this year it is the country's main crop producing areasears maize harvest is available.

affected by the drought Citrus fruit produced in South Africa. Mozambique and Swaziland is almost ali grown under irriga-

Mr Arend Venter, assistant general manager of the citrus exchange, said: "We'll be fine Withered grazing has forced South African cattle farmers to send livestock to abattoirs earlier than usual. The authorities have tried to reduce slaughtering permits in some areas but the meat board has a stockpile of 60,000 carcasses.

If it rains within the next month or so." There is less fruit on most trees but the size of the fruit is bigger than last year, an advantage in export Likewise, the drought bas so far had little impact on the South African wool industry.

The most critical period for sheep farmers is the next two months, when rain is needed to ensure adequate grazing during the winter.
Farming organisations and the husiness community in general are most worried about the effect of the drought on farmers' financiai positions. Their debts have increased

sharply in recent months. In South Africa, more than half of debts to co-operatives are in arrears

in arrears.

The South African Government has been urged to implement more generous drought relief measures. 1982 and 4.8m to 1981.

369.73 at 1 pm. Volume 5.81m
shares (7.17m).

Blue Chips took the brunt of a sharp retreot on the Tokyo market yesterday, with investors taking further profits amid persisting worries over the high level of margin buying positions. Foreign buyers were said to be holding the sidelines.

However, some bargain hunting during the afternoon brought e partial recovery. The Nikkei-Dow Jones Average of one point in the morning was more than 100 points down, taking it below the 8,000 mark for the first time since December 27. By the close, it had railied to 8,028.28 for a net fall of 54.45.

ATT, strong in recent sessions, was off \(\) to \$68\(\). IEM, another loader in the market's recent rise, was unchanged at \$99\(\). Both remained active.

General Moters, Ford and Chrysler were all lower on published reports that car manufacturers will have operating losses in tha fourth quarter.

Honeywell, which reported lower fourth quarter profits, fell \$3 to \$83. American Express, which is to acquire a group of foreign banks for \$550m, shed \(\) to \$42 and Citicarp \(\) to \$33\(\).

Hamfacturers Hamsver lost \(\) to \$42 and Citicarp \(\) to \$33\(\).

Both remained at \$99\(\).

Mr Nakasone, the Japanese Primo Minister is now in Washington to confer with President Reggan on trade and other issues. But political observers here have expressed concern about an outbreak of fresh trade friction because of oews that the U.S. is not satisfied with the latest Jopanese package of market-opening measures.

Shipbuilding stocks receded in the face of news that export or Japanese shipbuilders foll 50 per cent in 1982 from the

A\$2.15.

Somp remained a firm exception.

Minings sector, CRA rose 17 cents to A\$2.34.

Western adding Y20 at Y3.420, supported by news that it is planning to boost production of compact disc players this ground due to strong demand.

Tokyo

Blue Chips took the brunt of a sharp retreet on the Tokyo

Germany

A widespread retreat in share prices took place as Bond prices continued to recede on second thoughts about possible domestic credit rate cuts. Brokers blamed the situation on domestic political uncertainty ahead of the General Election, to be held in March, and the sudden weakness of the D-mark on foreign exchange markets. The Commerchank index dipped 8.9 to 739.2.

Engineerings provided one of the weaknest sectors, with

it had rallied to 8,028.28 for a net fall of 54.45.

The Tokyo SE index lost 4.94 to \$88.32, while volume further contracted to 330m ahares from the previous day's 380m.

Speculation that the Bank of Japan is apparently planning to delay o cut in the Official Discount Rate because of the falter of the fare-up of trade tension, were additional depressants for the market.

Mr Nakasone, the Japanese Primo Minister is now in Washington to confer with President

Among Gold stocks, GMK

A\$45m through the placement of 15m Ordinary shares at A\$3.00 each declined 6 cents to A\$3.19.

Hong Kong

With the institutions and over seas buyers providing fresh sup-port, markets easily absorbed further profit-taking by cautious local small investors, leaving most issues pointing higher at

the class.

The Hang Seng Index gained some 12 points more in the first hour but had stipped back to show a seven-point gain at mid-session. However, active fresh hours the afternoon t session. However, scrive fresh buying during the afternoon took the ivier shead to 888.91 for a day's rise of 15.42. Overall turnover on the four r. hanges was modorate, but showed an expansion to HK\$250.62m from Monday's HK\$168.31m.

Continuing to oncourage the market were expectations of lower U.S. interest rates, which would help send local rates down.

Shares in the Banking and Trading sectors attracted the most buying attention.

Case 150.

STATE OF THE PARTY OF THE PARTY

Paris

Prices were mixed in quiet trading, with announcements of a fall in French unemployment in December and of a 2 per cent decrease in bankruptcies has your having little influence on the market.

Johannesburg

Gold shares closed mostly easier on the downturn in the Bullion price, although e few counters held firm on speculative demand. Trading remained activo. Heavyweight losses ranged to 200 cents, as in Presi-

London stock markets remained dominated by the remained dominsted by the course of sterling and yesterday's fall in the exchange rate against the U.S. dollar prompted a marked turnround in sentiment. Conditions were much calmer then obtained in last week's slide in the pound, hut Government stocks were quick to reflect the change in mood and blue chip shares followed suit as markets became increasingly uncertain. ingly uncertain.

The threat of an all-out strike by the water workers and growing apprehension pending the outcome of next Sunday's Opec

ortcome of next Sunday's Opec meeting to agree output quotas also contributed to the weakened tone.

Against this backdrop, Government stocks lost the bulk of the previous day's gains which extended to 1½ at the long end of the market, while short-dated issues reacted to close with losses ranging to ½ and occasionally more. Selling was

Exchange rate uncertainties revive

relatively light, but nervous offerings found the market unwilling in the prevailing thin and sensitive trading conditions. The reaction in leading equities also took place in a low yolume of trade and closing losses were usually moderate. Measuring the tone, the FT 30-share index drifted lower to record n loss of 6.7 at the noon calculation and held around that level until a small after-hours' technical rally left it a stade above the worst with a net fall of 5 points to 614.8.

Of the sectors, Store shares, despite confirmation of buoyant sales figures in December, encountered selling on fears that the boom in consumer spending may have since petered out. Essewhere, some of the recent speculative Issues came back quite sharply as professional operators, liquidated their positions.

Absorbed and the Gold mines consortium W. H. Smith "A." 238p, Gassies "A," 558p, and Marks and 6pencer, 201p, all shed around 10, while Debenhams gave np 4 to 94p. Press. comment suggesting that a major deal was in the pipeline prompted fresh support of Mellins which advanced to 165p; an announcement from the company defusing the situation shed to 100p. Other leading may have since petered out. Essewhere, some of the recent speculative Issues came back quite sharply as professional operators, liquidated their positions.

Insurances easier

South African gold mining shares also turned reactionary after the recent strong advance, but profit-taking was well FINANCIAL TIMES STOCK INDICES

strongly over the last couple of trading sessions, reacted to 460p on profit-taking before closing a net 4 off at 468p. George Wimpey attracted e useful two-way husiness and touched 136p before reverting to the overnight level of 123p. Eisewhere, gGB shed 14 for e two-day drop of 36 to 194p on disappointment with the annual results, but Countryside touched 174p before closing a couple of pence dearer on halance at 170p following the increased preliminary profits and the board's confident statement. After Monday's gain of 16 awaising the interfan results, Trent Holdings reacted to 106p on the amouncement before rallying to close unchanged on balance at 114p. John Carr (Doneaster) firmed 6 to 156p following the chairman's ancouraging statement at the annual meeting, while McCarthy and Stone edvanced 20 to 480p in 9 thin market on the chairman's cheerful statement in the annual report.

amual report.

ICI, s strong performer recently on talk that profits had been npgraded, encountered profit taking and reacted to 368p before settling s net 6 off at 370p. Recently dull Allied Colloids attracted revived support and put on 6 to 290p. while Hickson and Welch improved 7 to 312p. Novo Industries "B" rose 4½ points more to £158. icl s st

stated its interest in UDS's losing 8 to 385p and Tesco 3 to Richard Shops chain at yester- 116p. S. and W. Berisford gave day's annual meeting, gave op 8 up 10 to 194p, after 191p, after to 315p; UDS eased a couple of comment on the annual results, pance to 104p awaiting the offer Secondary issues displayed a document from the Bassishaw firm feature in Albert Fisher

profits. Courts Furnishers "A" rose 4 to 130p after revealing higher interim profits.
Conditions in Electricals became much quieter and the closing tone was mixed. Thorn EMI softened e conple of pence to 443p, after 440p, while Racal relinquished 5 to 547p; the latter's interim results, originally exhausted and are approximately according to the contract of the co latter's interim results, Originally scheduled for yesterday, are to be revealed today. Elsewhere, Euretherm put on 12 more to 577p shead of tomorrow's annual results, while AB Electronic gained 14 to 529p and Oceenics edvanced 40 to 760p. Recent speculative favourite Arlen encountered profit-taking and dropped to 153p before finishing n net 4 down at 164p. BSR came on offer and shed 3 to 58p, while Lec Refrigeration gave up 2 to 260p.

Engineerings plotted an irregular course in moderate trading. Westland declined 6 to 149p following the chairman's cantious annual statement, while Staveley drifted lower on small

Staveley drifted lower on small selling and lack of support to Hickson and Welch improved 7 to 312p. Novo industries "B" rose 41 points more to £158.

Mellins react

Leading Retailers, a buoyant sector recently on reports of record pre-Christmas business and a highly successful sales season—a view confirmed by the latest set of provisional retail sales figures—encountered seatered profit-taking reflecting fears that dearer money will adversely affect future consumer spending. Burlon, which sales of interest, J. Sainsbury stated its interest in UDS's

Bowater became a fairly lively counter among the miscelively counter among the miscel-laneous industrial leaders, louch-ing 180p before closing a net 5 up at 175p on investment huying fuelled by recovery hopes. BoC. at 174p, retrieved half of the previous day's fall of 6 which followed the chairman's profits warning but Glaxo drifted i lower to £141 and Beecham lost 5 at 347p. Eisewhere, Low and Bonar reflected satisfaction with the sale of a subsidiary and rose the sale of a subsidiary and rose 10 to 82p, while Valor advenced 6 to 90p on the repurchase of a factory adjoining its Wood Lane plant in Birmingham. Awaiting plant in Birmingham. Awaiting news from the annual meeting, Stanelco added 6 to 46p, while Western Board Mills put on 5 to 183p in response to the increased first-half profits. Investment support was again forth-coming for London and Liver-pool Trust and the close was 9 further 25 bigher at 380p, while Christies International firmed 6 to 210p and Cole 6 to 168p. Restmor rose 6 to 114p on further consideration of the half-year figures. Bellair Cosmetics, however fell 3 to 17p, after 15p, on Benlox dipped 2 more to 29p Benlox dipped 2 more to 29p with sentiment still unsettled by solverse comment. Profit-taking after the recent upsurge left James Wilkes 27 off et 320p, after 305p. Gesteiner A gave up 4 to 38p.

Sold down to 74p awaiting the preliminary results. Trident TV steadied on the alightly betterthan-expected profits and the anthan-expected profits and the ancouraging statement and closed unchanged on belance at 78p. Elsewhere in the Leisure sector, further publicity given to the sharp upturn in boliday bookings prompted useful demand for Horizon Travel, which put on 13 to 215p.

Mont Distributors succumbed

on 13 to 215p.

Motor Distributors succumbed to sporadic profit-taking.

Jessups, firm recently following a couple of investment recommendations, gave up 2 to 47p, while Henlys shed 5 to 89p. Elsewhere, specialist coach builders Coleman Mine, dealt in the United Securities Market, Imlisted Securities Mz-ket, Improved 6 to 62p following a Press mention.

Still benefiting from the pre-liminary results and proposed restructuring Associated News-papers firmed 5 more to 185p. Fleel Holdings attracted revived

EQUITY GROUPS & SUB-SECTIONS awaiting today's helf-timer. Swire Properties put on 51 to 601p on Far-Eastern advices. Oils turned easier on increase

which attracted revived support and pul on 9 to 50p. Danish ing uncertainty surrounding Bacon, however, shed that much, next Sunday's OPEC meeting British Petroleum shed fi to a thin market.

Bowater below best

Bowater became a fairly

Bowater became a fairly

Support and pul on 4 to 56p with part and put on 4 to 56p with support and put on 4 to 50p with support and put on 5 to 50p with support and 5 to 50p with support a KCA International met revived support and put on 4 to 56p with KCA Drilling the same amount higher at 40p. Clyde Petroleum held st 82p: the company has a 13 per cent stake in the latest North Sea oil find.

Textiles provided a late feeture in Scott and Robertson, which were marked 61 higher et 39p following the proposed acquisition of Plasti-Covers. Plantations featured Inch Kenneth which attracted a use-ful trade and solvanced 33 to 323p reflecting Far-Eastern solvices. Harrisons Malaysian closed 6 up at 100p.

Golds easier The failure of the buillon price to move through \$500 an ounce prompted sizeable profit-taking throughout mining mar-

from the outset and tended to from the outset and tended to drift throughout the session although selling was hy no means heavy. The Gold Mines index reflected the overall trend in Golds, losing 4.1 to 656.3. Bullion was finally \$8.5 down at \$486 an ounce.

Among the beavyweights, Randfoniein ended a fraction easier at £87; while the cheaper-priced issues showed Western Areas 5 off at 451p ahead of the sharply increased profits in the December quarter.

A number of the lower-priced issues continued to attract speculetive huying interest, noishly Cons Modderfontelu, finally 25 stronger at a 1982-83 high of 371p, and Marievale, which put on 13 to a peak of 324p.

The leading South African Financiels mirrored the trend in Golda hut several second-line stocks continued to gain ground, especially Middle Wits, higher at £11, and Transvaal Consoll-dated Land, a full point to the good at a 1982-83 high of £31. Australians made rapid progress at the outset but met per-sistent profit-taking towards the

cheaper et 395p. Western Mining edged up 2 to a 1982-83 high of 265p, again boosted by its substantial gold interests while Whim Creek

ricel Holdings attracted revived demand and rose 4 to a peak of 40p. Elsewhere, quality support lifted British Printing 7 to 100p, after 101p, but McCorquodale, up to 273p earlier, reacted to finish a net penny cheaper at 265p.

Properties held reletively steady before drifting off in late dealings to close with minor 1,828 calls and 475 puts. British losses in places. British Land settled a fraction cheaper at 265p awaiting today's balf-year and recorded 156 calls and 120 puts. Commercial Union reperty gained 6 to 190p following Lower values in London equity prices boosted put premiums in Traded Options. Marks and Spencer January 220 puts rose to 200, while Shell Transport January 460's closed 10 higher at 280. Tolal contracts struck

For rote indications see end of Share Information Service Money was giveo for the call in De Beers Deferred, Charter Cons., Polly Peck, KGA Drilling and International, North Kalland Cattell, Televil.

Based on bargains recorded in perty gained 6 to 130p following maloed reletively active with a major property letting, while 264 calls transacled.

Professional institute told that it needs more political weight

BY CHRIS CAMERON-JONES

THE UK'S main accountancy body, the Institute of Chartered Accountants in England and Wales, was criticised yesterday for not having enough political weight.

Mr Martin Haslam, a pariner of chartered accountants Keymer Haslam, said that the profession should be advising the government of the day what to do, based on the needs of industry and commerce, and not the other way round.

He was speaking on the secood and final day of the Financial Times conference, held in Loodon. oo new challeoges for the accounting profession.

Mr Haslam said that the 1981 Companies Act illustrated "that somehow, in spite of 100 years of preparing accounts, we have not een effective.

The profession must lead and it must be a forceful profession," he continued. "What I am afraid I consider to be the real problem today is a total lack of political fibre in tha leadership of our institute."

He proposed as a solution the appointmen of a director general "a full-time paid official, one who has the political personality and clout to speak up for the members."

Mr Haslam, who with his partner Mr David Keymer is best known for resisting the latest current cost accounting standard, SSAP 16, went on to say that it was a disgrace that banks had advertised their personal services while the profession bad beeo impotent to do the same, A director general, he suggested, would be able to put pressure on the London clearing banks.

He noted that the public did not, it seemed, turn to accouptants for their investment advice. He called for a national advertising campaign to promote accountancy services.

Mr John D. Cormie, director of Reed International and deputy president of the Institute of Chartered Accountants in England and superficial view that it is for the law

sion at the institute for the past 18 measurement issues months. The problems would be finding someone suited to the changing problems.

However, Mr Cormie said he did finding out what members wanted, not just the political activists. Nor did be accept the wisdom of adver-tising, which he felt would open a

education and training of accountants and the needs of industry. "I believe it is a pity that so much

He continued: "I believe this view is too facile, if only because the firms lay in extending general advioverriding requirement of 'true and fair' may well require, or through not see the institute as a political time come to require, disclosure of lobby. The problem generally was matter which is not expessly listed in the legislation.

Mr Sharp said that the achievements of the ASC over the past 12 years had been considerable. but this was not to suggest that all was Mr Cormie also examined the perfect with it. But it had the flexibility to correct its mistakes relatively rapidly, unlike the legisla-

Financial Times conference on new accountancy challenges

heat is generated by the training in industry issue," he said.

"It would seem to me to be one perfectly sensible place to train to become a chartered accountant." He acknowleged that the profession could not produce specialists in three or four years, but it could and must produce oumerate people who understood the changing oeeds of industry and commerce and could communicate that understanding

Mr Kenneth Sharp, bead of the Government Accountancy Service and former institute presideot, said it was much better to retain the present undefined relationship beween the profession and government which could adapt more sucessfully and be more effective than formal structures.

The Accounting Standards Committee (ASC) was one of the more interesting aspect of this relationship, he said. In the areas of disclosure, the lack of comparability that bad ariseo between companies' accounts had led some people to "the Wales, said that the idea of a director require disclosure and accountlowed to operate regardless of pub-

lic policy," he said. "In particular,

the Government, of any political complexioo, is bound to he siderable interest in what has become known as economic conse-While the Government might feel the committee's proposals were satisfactory in terms of accounting

theory, be continued, they might have a detrimental economic effect. Instances of this bad occurred with the ill-fated current purcha power accounting standard SSAP? Where proposals were contrary to the international interest, the Government must inevitably bring pressure to bear, Mr Sbarp said.

Mr Edward L Langton, senior partner of Stoy Hayward, discussing the future of the medium-sized accountancy firms, said a major advertising campaign would not ap-peal to the kind of clients that this size of firm sought. The money could be better spent on improving the quality of its services. But largescale advertising could have an ef-

tor general had been under discus- ing standards to be restricted to fect on a company looking around to change its auditor.

The future of the medium-sized sory services to audit clients, he said. The Unlisted Securities Market was another area of growth. He argued that medium-sized firms would survive because of their adaptability.

Mrs Barbara Culverhouse, sole practioner and member of the English institute's small practioners' advisory committee, said some 85 per cent of accountants were-small practitioners and there would alrays be a place for them.

However, she called for a reduction in the amount of legislation particularly regarding tax. She noted that the accounting standards made the cost of audits out of all proportion to the benefits for a

Mr Paul J Rutteman, a partner of Arthur Young, McClelland Moores, spoke of the impact of the European Community. He stressed the importance for the profassion to be in right from the start of relevant EEC directives. Although they took a long time to be finalised, once adopted they were difficult to

Peat, Marwick Mitchell, said that the accountancy profession was liv-ing in the middle of a technological revolution with computers. He warned that if the profession did not meet the technical and econom ic demands of the business it served, thare were plenty of compe-

Mr F. E. Bleasdale, vice-presiden of the Association of Certified Accountants and assistant genera manager of Midland Bank Interna tional, said there were too many ac countancy bodies in the UK. He urged a speedy introduction of registration by the Government to re strict the activities of the unquali-

Deviation to convenient port reasonable

DANAE SHIPPING CORPORATION OF MONROVIA * TPAO GUYAN TURKISH INSURANCE CO LTD Queen's Bench Division (Commercial Court): Mr Justice Lloyd: December 21 1982

DEVIATION OF a vessel from its contract voyage for the purpose of carrying out repairs is "reasonable" if the port to which it is taken is safe and convenient; and where the arguments for patting in at either of two ports are evenly balanced, the court. In assessing reasonabl ness, is entitled to accept the reasoning of the person whose decision it was to choose a particular port, if he is a person of competent skill and knowledge and acted bona fide in the interests of all

concerned. Applying those principles Mr Justice Lloyd found that the plaintiffs, Danae Shipping Cor-poration, owners of the Daffodil B, were reasonable in having deviated to Laurion for repairs. and beld that they were entitled to general average contributions from the defendant cargo owners and their insurers, TPAO Guvan

occurred during the deviation.

"General average" is a loss incurred for the good of all interested parties oo a ship, to cost of which all parties con-

HIS LORDSHIP said that on November 13, 1978, in pursuance of a charterparty, the Daffodil B loaded a cargo of 35,000 tons of set sail for Rotterdam, but suffered a breakdown in her dlesel generator and continued the voyage by using the two main her steam turbine generator.

The master was ordared to change course for the eastern end of the Dardanelles. He ex-plained to the owners' managers that it was advisable for a repairs team to come on board to repair the generator. There was some discussion as to which was the most conveolent port of call and Captaio Galanos, a port captain employed by the managets, ordered the vessel to go to Layrion, a small port on the east coast of Greece.

Five minutes later she grounded on a rock at the northmaster tried to get ber off by use of engines, but without suc-cess. Eveniually she was lowed off efter discharging part of the

She was taken to Corinth and from there to Piracus. After comolation of repairs, she proceeded to Izmir in accordance with fresh instructions, where she discharged her cares. she discharged her cargo.

The owners of the Daffodil B claimed general average contri-bution from the cargo owners. According to the adjustment the

The defence was that the ves-sel deviated in the course of the chipowners admitted the deviaentipowhers samilied they were
tion, but said they were
eotitled to rely on Article IV
rule 4 of the Hague Rules, which
provided that "any reasonable
deviation shall not be deemed to be an infringement . . . of the contract, and the carrier shall not be liable for env loss or damage resulting therefrom."

deviation was reasonable. It was agreed that it would not have been safe for the vessel to navigate the Dardanelles with the diesel generator out of action. Thus it was essential for the vessel to put in to a port for repairs, or to take on a repair team. The ahipowners said it was reasonable to put into

The cargo-owners main case was that Lavrion was not safe for a vessel the size of the

Heving regard to that evidence. which was backed up by statistics, it was impossible to hold that the anchorage at Lawrion was unsafe for short-stay vessels as large as the The main ground on which tha

cargo-owners put their case was therefore rejected. Their second

They said that it would have been better if she had gone to Piraeus, because although the deviation would have involved an additional 40 miles as ooposed to four. Piraeus was a large port with amole repair facilities, and tugs were available in the event

In all the circumstances, the cargo-owners contended, the reasonable and obvious thing to do was to put into Piraeus, and it was not reasonable to go to

at page 343 that the true test of what was a reasonable deviation from the contract voyage might a prudent person controlling the mind all the relevant circumstances... including the terms of the contract and the interests of all parties coocerned, but without obligation to consider the interests of anyone as con-

Considerable assistance was derived from Phelps James v Hill [1891] 1 QB 605 where Lord Justice Linley sald at page 611; "All the decisions oo. . . devia-tion abow that what is reasonwas that Lawrion was not safe for a vessel the size of the Daffodii B. The shipowners said that it was.

The crucial factor was the length of time that the vessel preference to another, then

On November 15 at 17.20 hours, the Daffodil B anchored at Lavior stated in evidence different view, they ought not that in his view the port was board. It was intended that the perfectly safe for larger vessels, repairs should be undertaken in provided they stayed only a short the course of the voyage. At time, taking on crew or provided they stayed only a short time, taking on crew or provided they stayed only a short fully justified in attaching continue to turn the scale in their own winds.

The shipowners sald that Lavrloo was just as safe as Piraeus, indeed safer. If the remaining generator had broken down when the vessel was io crowded seaway, and the vessel had suddenly become disabled, the danger from collision with other vessels would have been at least as great, if not greater than if the vessel had become disabled on entering Lavrico.

There was much force in that contention. At the very least the choice between Lavrion and Piraeus, from the safety oont of view, must be regarded as evenly balanced; and m favour of Lavrion it could be said that it involved a smaller deviation

The argumente in favour of Lavion were entitled to carry the day. Assuming that the orguments were evenly balanced. then one came back to the man who made the decision.

Captain Galanos knew the there was no question; and on-body doubted that the choice was made bona fide. Adopting the approach of Lord Justice Linley in the Phelps James the court should be slow to criocise

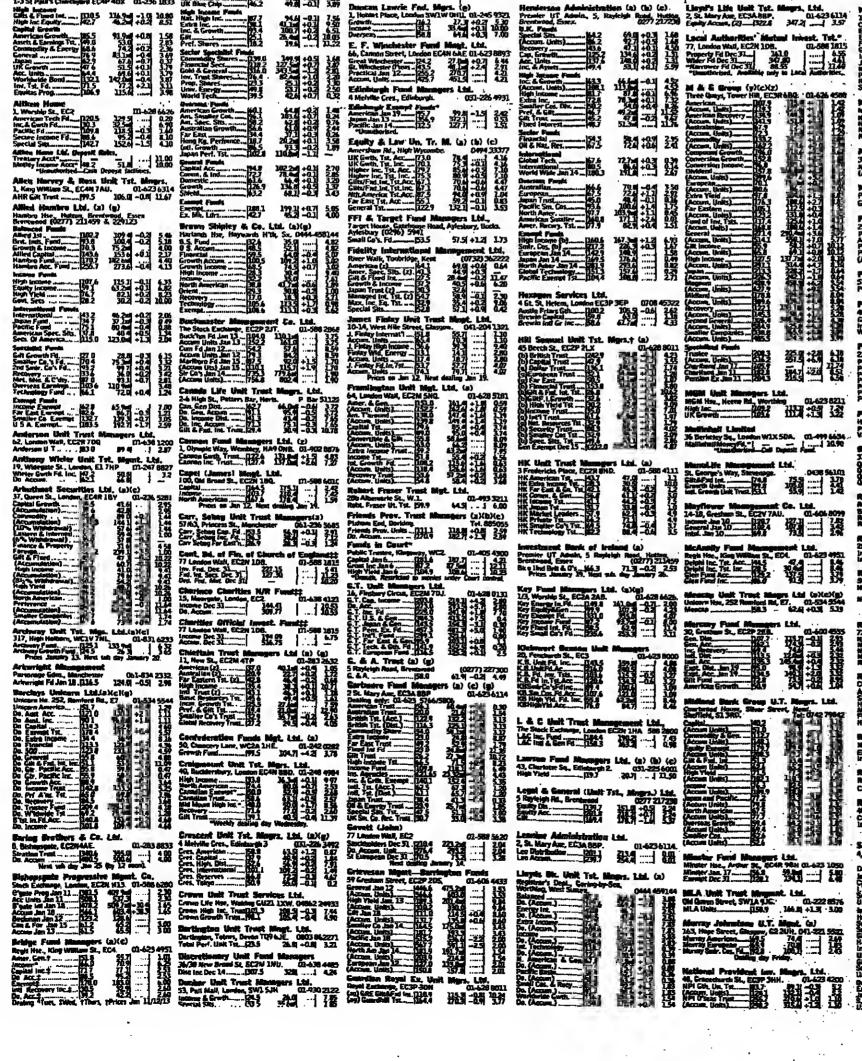

The deviation was "reason deviation" within the meaning of Article 1V rule 4 of The Hague Rules. There would be judgment for the shipowners for \$387,304. For the shipowners: Anthony Colman QC and Patricia Phelan (Hill Dickinson and Co.) clair Roche and Temperley).

FINANCIAL FUTURES

D-mark eases in nervous trading

The D-mark lost ground yester-day as curreocy markets acted nervously ahead of the March general election. Funds were switched out of the German currency into U.S. dollars, aided by a growing conviction that German interest rates may fall before a oimilar move in the U.S. The passing of another day without a cut in the U.S. discount

Sterling fioished firmer against European currencies, although a low of \$1.5725 against the dollar sent shivers through financial markets in London, causing a slight upturn in domestic rates.

DOLLAR — Trade-weighted index (Bank of England) 118.3 against 121.8 six months ago. A change of emphasis towards fundamentals such as rising trade and budget defialts bas pushed the dottar down recently. pushed the dotter rates had previ-ously kept the U.S. unit firm but the Federal Reserve discount the Federal Reserve discount rate and bank prime rates are now following a downward path.

The dollar finished at its best level of the day against most currencies, rising to DM 2,3950 against the D-mark from DM 2,3580 and SwFr 1,9640 compared with SwFr 1,9640 compared with SwFr 1,9325. It improved against the French franc to FFr 6,7850 from

FFr 6.6825 and Y231.90 from STERLING - Trading range STERLING — Trading range against the dollar in 1982-83 lo 1.5257. December average 1.6176. Trade weighted iodex 82.0 against 82.0 at noon and 82.3 at the opening and compared with 81.9 on Monday and 90.8 six months ago. Sterling has been very weak of late on fears of an early general election, and forecasts that world oll prices will remain under downprices will remain under downward pressnre, leading to a worsening of Britain'o balan payments. The nervous and vnla-tile conditions have tended to stabilise in the last few days

Sierling opened at \$1.5800 agniost the dollar and rose on initial demand to a best level of \$1.5900. However recewed interest in the doller saw the

strain of the March election and strains also bigher against the pen st Y365.75 from Y365 and FFr 10.6925 compared with FFr this week's central council meeting from the strain of the march election and strains of the march election and strains of the march election and strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strains of the march election and expectation of a cut in the strain election and expectation of a cut in the strain election. ground on nervousness about the result of the March election and expectation of a cut in the Bundesbank key lending rates at this week's central council meeting. Sterling improved to DM 3.7710 from DM 3.7450, and the Swiss franc to DM 1.2205 from DM 1.2170. On the other band the Italian lira was unchanged and the French france.

D-MARK — Trading range against the dullar in 1982-83 is 2.5940 to 2.2410, December average 2.4225. Trade-weighled index 128.2 against 124.5 elx months ago. The D-mark has been strong recently, helped by an improving balance of payments position. It has benefited from the weakness in the dollar and sterling, but is showing signs of losing ground during the run-up to a general election in March.
The D-mark weakened against most currencies et the Frankfurt

pound fall to a low of \$1.5725 in fixing. The Bundesbank did not THE FUDODEAN CURRENCY UNIT DATES

attempts to rally finished 1st lower at 100-10.

The short sterling interest rate

contract showed a similar trend contract showed a similar tream a quite settive trading, particularly for March delivery. This also opeoed firmer at 89.76, but closed near the low of the day at

89.54, compared with 89.70 on Monday. Traders reported 2

resurgence of nervousness about the pound, although yesterday's

THREE-MONTH EURODOLLAR (IMM)

Volume was good in the sterling interest rate instruments on the Loodon International Financial Futures Exchange yesterday, but trading was nervous influenced by movements in the cash markets. These reacted sharply to the fall of sterling against the dollar on the foreign exchanges. Despite a stronger performance against major currencies in general, including substantial gains in the pound; although yesterday's foreign exchange movements were largely the result of the D-mark's weakness against the dollar, which tended to drag down other European currencies. March sterling currency trading was also reasonably active at 558 lots, compared with March Eurodollar volume of only 453 lots. The Eurodollar pit is terms of the D-mark and several other European units, the pound lost ground to a very firm dollar. This disturbed the cash gilt market, where falls of over £1 were soon recorded. After a better opening of 101-17, compared with the previous close of 101-15, the March long gilt price March Eurodollar volume of unly 453 lots. The Eurodollar pit is very quiet at present, overbung by speculation about a cut in the Federal Reserve discount rate, and next week's large Federal funding programms. quickly fell away.

In nervous and sometimes volatile trading it touched a low of 100-07, and despite several

Last year they advanced around £4bn to mortgage applicants and in so doing apparently surprised themselves as well as the year progresses.

A further early fall in mortgage application will become more difficult as the year progresses.

Net Receipts

What's the catch?

Everyone wants extra interest but it can mean you have to tie your money up, so you can't take it out in a hurry.

Not with the Woolwich! And there's no catch. Woolwich Higher Interest Shares give you

extra interest -34% more than ordinary Share rate.

If you want your money immediately, the interest you lose is only just over 50p for every £100 withdrawn.

That's hardly a catch is it?

What's more-if you can give 28 days' notice you earn full interest right up to the moment of withdrawal.

So if you've £500 available, now you can

enjoy extra interest and the flexibility of a Share Account with Woolwich Higher Interest Shares. The 34% premium means you will earn 7% net (10% gross*).

Housebuilding

Private sector poised for upturn

ingredient in a thriving private housebuilding sector and the early days of 1983 appear to be heralding its return.

It is one which has been in very short supply since 1980, overwhelmed by the worst aspects of the recession such as rising unemployment and high

interest rates.
Confidence on the part of the housebuyer and, in turn, of the housebuilder has been deast a succession of blows over the past two years or so and the distress of the private sector has been surpassed in the public housing field.

At about the 50,000 mark, completions in the public housing sector during 1982 are

ing sector during 1982 are thought to mark the trough to the thought to mark the trough of an uneven but sharp decline which has seen its share of the housing market fail from nearly 50 per cent in 1968 to under

Modest revival

There are hopes for a modest public sector revival over tha medium-term, though neither of the two major political parties has exactly encouraged its growth in recent years and its contribution towards solving Britain's housing problems must be regarded as a diminish-

fore, which is expected to con-tinue to make the running in terms of new housing output and there are some signs at least that its recent dismal per-formance is set for a welcome

improvement.
Official figures are not yet available but private sector housing starts during 1982 are thought to have reached around 140,000, a reasonable perfor-

CONFIDENCE IS the prime mance when set against the ingredient in a thriving private 116,000 starts made in 1981 and housebuilding sector and the 88,000 total in 1980 hut of little merit when compared with earlier achievements.

Completions last year reached an estimated 122,000 against 113,000 in the previous 12 months and forecasts for 1983 suggest a hig increase to between 145,000 and 150,000. Starts during the same period could rise to around 155,000. The outlook for 1984 indicates further modest improvements in housebuilding output, al-though the forecasts become in-

creasingly conditional. In any examination of the likely balance between future housing needs and actual supply, the provision of new homes represents only one factor in the equation, especially during a period when so much emphasis is being put on rehabilitation and modernisation. The old levels of new bousing output do not neces-serly, therefore, provide a reasonable benchmark for building activity.

There is general agreement, however, that new housing re-quirements have been altered by the growing trend towards refurbishment of existing returnishment of existing stock, although recent ontput levels have not been anything like high enough.

According to Lloyds Bank,

whose recent mortgage market onslaught has left them with more than a passing interest in housing, the number of homes likely to be built in the two years or so will continue to fall short of potential

The hank points out that about 160,000 net new bouse-holds are expected to be.

HOUSING STARTS

decade, the majority of them single households, since there are fewer marriages and more divorces. At present 250,000 homes are shared by families. At the same time, there are nearly 4m other households which are unfit, lacking basic amenities or requiring some degree of renovation.

2000 dwelfing

400

In the opinion of Lloyds, the infamous "crude housing surplus" of 500,000 homes is homes, by those unfit for occupation or by those in areas of high unemployment and internal emigration; as such, they can he heavily discounted.

The bank points out that the sale of council houses has, indeed, satisfied some of the growing demand for owner

reduced the ability of councils to shorten their waiting lists. It adds: "Unless some way can be found of breathing new life into the declining private rented sector, those who wish to cent rather than buy will continue to move from private to public rented accommodation, including housing associa-tion tenures. The rise in public sector rents will, however, cause more households to seek

Lloyds emphasises that the 1977 housing green peper pointed to an annual demand for 180,000 owner-occupied homes by 1881 and an additional 125,000 public sector fromes. The trend towards of which about 160,000 might be in the private sector. emphasises, would demand a further 15 per cent increase in

Nationwide in action: London

Nationwide is providing mortgages for these two bedroom homes and flats, which are being developed by Addison Housing Association Ltd., principally for first time buyers who cannot afford outright purchase. These are in Ealing, West London.

Nationwide is actively supporting urban renewal programmes in many city centres where housing improvements are urgently needed.

First time buyers also need help and nearly half Nationwide's lending supports this group, many of whom are on lower than average earnings.

Nationwide is also active in providing valuable up-to-date information about the housing market in its regular quarterly bulletin "House Prices."

to decide Nationwide

Developments

Expanding role in financial services

Surect banks and the building societies have been nervously circling each other, searching for the weak links in each

ther's armour. The building societies won round one by attacking success-fully the clearers' "life-blood" —their stable seven day deposit base. The banks woke up rather late to what was happening. But in 1981 successfully counter-attacked moving into the home loan market—the traditional preserve of the building

move into the home loan market came as a nasty shock to many building societies and for the past year or so they have been wondering whether they should go for the banks jugular and challenge them on their
"home turf" by the provision
of money transmission services
— arguably one of the few
things the banks do rather

well.

The Abbey National has amounced vague plans to join forces with the Co-operative Bank to offer its customers cheque book facilities plus interest on their accounts. The Lelcester Building Society has linked with the UK arm of Citibank, the giant U.S. bank, to offer a credit card. The Nottinghamshire Building Society is working with British Telecom and the Bank of Scotland to provide the UK's first home banking service.

-Initiatives

All these invisives reflect attempts by the building societies to come to terms with one of the fundamental quesone or the rundamental ques-tions they face—should they become more heavily involved in the provision of mainstream money transmission facilities, such as cheque books, standing orders and cash dispensers? Recent technological advance is likely to lead to a blurring of the distinction between the process of attracting savings deposits and the process of repending a system for money remembersion, which has until now been dominated by the high Street banks. Against this background the

key question is: Can the build-ing societies provide a compet-ing money transmission service, or is it better to join forces with the banks?

with the banks?

Earlier this month, the Nationwide and National and Provincial building societies announced that they were linking with Midland and National Westminster Banks, respectively, to offer their 4.5m customers use of the banks' Acress credit cards as a way of Access credit cards as a way of paying hills and gaining access to other basic banking services.

These two links are the first real sign of how the major building societies and banks plan to face the major challenges of the next decade as their respective market places undergo major change in the way financial services are distributed to customers. With 25m savers the building societies have a far bigger personal customer base than the High

Street bank. Mr Brian Holmes, chief execu-tive of National and Provincial, says that "although banks and building societies are competitors, we do not see any reason why we should not co-operate in advantage.

." Paperless payments are the way of the future and trans-mission of money is too expensive for building societies to operate on their own," says Mr Management Account is the first step on the road to providing National and Provincial's 1.5m customers with a simple and efficient medium for handling payments.

The next step must he that onle can settle their accounts direct with us via a debit card if they shop in a supermarket. It is all leading that way," says Mr

National & Provincial esti-mates that the average family makes payments to over 20 separate financial institutions, separate financial institutions, buying more than 30 different financial products. For maximum efficiency and minimum cost, money transactions should be channelled through as few sources as possible. Both Nationwide and National & Provincial believe that providing Access cards to their customers is a first step in achieving this goal. Mr Horace Fielder, a general manager of the Nationwide, says it seemed that "we should be looking at different ways of trying to make the banking service more freely available to those people who do not have bank accounts."

The Nationwide does not think the Abbey National's cheque book scheme (details of witch have still to be revealed) is a good idea. "The banks have a perfectly good cheque clearing operation and we do not want to take it over," says Mr Fielder.

to take it over," says Mr Fielder.
At first glance it is easy to
see why Midland and National
Westminster favour the link. They gain access to a major new group of potential custo-mers without bank accounts and

have a ready market to which they can sell their associated products such as personal loans and insurance.
Just what the building societies get out of the link is less obvious. They provide their customers with access to new services which will help maintain customer loyalty, but beyond that it is far from clear what the real benefits to them

some stage the banks might offer building society customers access to their cash dispensers. Under the two latest moves customers of the Nationwide and National and Provincial can draw mores. money on their Access cards from a nationwide net-work of cash dispensers (Midland and National Westminster are in the throes of linking their cash dispensers) but they have to pay interest as if they are borrowing money. The next step is to allow them

to draw money directly from their building society account via the Midland/NatWest cash

dispenser network.

But before that happens the banks and the building societies are going to have to consider carefully just how they see their future role in the money transmission business. At the beginning of 1983 it is far from clear how the story will unfold-

William Hall

Wide variations between regions

THE AVERAGE price of a home in the United Kingdom rose to £25,530 in the fourth quarter of 1982 according to the latest mortgage statistics published by Nationwide, Britain's third largest building society. A year ago the average price of a home was £23,740, according to the building society.

Nationwide's figures illustrate the deep variations in prices in different parts of the Country for similar types of

Not surprisingly, the highest prices are paid in the more economically successful South East where the price of an average home in London's commuter belt was £34,510 in the final quarter of last year, 10 per cent higher than at the same stage a year earlier.

Cheapest

 $V_{lidig(\frac{1}{2})}$

my role

al service

By comparison the cheapest region to buy a house is in Yorkshire and Humberside, according to Nationwide, which said that the average price of a home was just over £20,000 at the end of last

A breakdown into different types of properties shows even more marked price differences. According to Nationwide, home buyers could expect to pay in excess of £61,000 for a new defached house in Greater London. A similar property in Yorkshire and Humberside might be

expected to fetch just under

Around the regions the highest price rises recorded last year were in Wales and the North of England where the cost of an average home rose hy a surprising 11 per cent compared with an 8 per cent rise nationally. Less surprising was the 10 per cent improvement in parts of the South East.

The depressed West Midands saw one of the smallest annual increases in house prices, of just 4 per cent (although as in a number of (although as in a number of other regions the rate of house price increase in the West Midlands picked up during the fourth quarter of 1982). In Northern Ireland house prices rose on average by only 2 per cent in 1982, reflecting the particular difficulties of that

The map and chart provide a breakdown of quarterly and a breakdown of quarterly and annual price changes around the regions as well as average prices for various types and ages of property compiled from mortgage approvals made by Nationwide, during the final quarter of 1982.

The building society said that during the fourth quarter it made an average advance to borrowers of £18,410 which represented 72 per cent of average purchase wice. chase price.

Andrew Taylor

Sellers starting to fare better

HOUSE PRICES are at last edg- in interest rates is bound to ing up again having been spack continue to give the housing in reverse or neutral gear for market a modest fillip. much of the past two years. There is little danger however that rising prices in 1988 will lead to the market overheating.

Few observers of the British housing scene (spart from over-optimistic estate agents) are expecting a boom in house prices this year, although a number of important economic indicators would appear to suggest that a sharp rise in house prices

Slowly returning confidence by the recent falls in mortgage interest rates — will continue to be tempered by concern over rising unemployment, restricted earnings growth potential and the general state of the British economy.

It would appear that there are several economic forces pulling the housing market in opposite directions at the same

Mostly, forces have been working in favour of the buyer. House prices in relation to earnings have seldom been cheaper during the past ten years. There has been a plentiful supply of finance to meet record demands for home loans while the cost of building society mortgages has fallen five percentage points in the past year. There remains a wide and varied choice of properties on the market.

For the prospective seller of a home, life has been tougher during the past 18 months. Many bome owners have been forced to lower their asking prices to achieve sales in an extremely difficult market. But ome of the factors which have assisted huyers are now starting to work in favour of sellers.

The relative cheapness of house prices has encouraged near-record sales in many parts of the country as the huge backlog of properties, which have been put on the market, bas steadily been eroded.

One of the paradoxes of the 1982 housing market has been that prices for most of the year have remained generally depressed despite the record demand for home loans from building societies and banks.

Changing climate

The climate in the market, however, is changing. The Royal Institution of Chartered Surveyors in its latest price survey says that elthough sales remain historically high, the rate at which homes are being put on the market has slowed. About 13 ner cent fewer homes were 13 per cent fewer homes were put on the market in the three months to the end of November than in the corresponding period in 1981, says the insti-

Some building society man-ngers have also reported what they believe to be the first signs of a pick-up in prices, which have benefited from a two-fold reduction in mortgage rates in the autumn. The building society base mortgage rate is now 10 per cent compared with 15 per cent of the beginning of

The first year cost of a £20,000 mortgage over 25 years has therefore reduced from £258 2 month at the beginning of 1982 to £183.90 currently.

Figures published recently by Nationwide, the country's third largest building society, indicate that house price increases in the

fourth quarter of 1982 were for the first time in many months, outstripping rises in inflation. According to Nationwide, average anional house prices to be 21 percent in the fourth rose by 24 per cent in the fourth quarter of last year, more than double the rate of increase in the previous three months.

The spurt in prices in the fourth quarter, says Nationwide, has lifted the everage house price increase in 1982 to 8 per cent. This is above the annual increase in inflation and about in line with the rise in everage earnings for the year, say the building society.

High demand

Mr Cyril English, Nationwide's chief general manager, said: "The demand for morigages has remained high in spite of the onset of winter. While there are no indications of a boom in house prices, there is certainly increasing evidence of a return to confidence among home-buyers. This is likely to result in a continuation of the present level of house price increase the early months of 1983."

Anglia Building Society also claims to have seen an improve ment in house prices in recent weeks. Mr Peter Moreton, Anglia's chief surveyor, says: "There are already indications of even greater activity in the market in some areas, with modest price rises already being recorded. In my opinion, house prices are due to pick up."

The huilding society, however,

puts the average national increase in house prices during 1982 somewhat lower than Nationwide at between 4 and 6

Nationwide at between 4 and 6 per cent.

While most building societies would expect a faster rate of growth in house prices during 1983, few. if any societies expect a house price boom. A 10 per cent rise in prices, modestly ahead of projected increases in annual inflation, would appear to be the most popular and realistic forecast of housing trends.

House prices would have to

Housing trends.

House prices would have to rise sharply this year to make up the ground lost against rises in inflation and annual earnings since the end of the 1970s. According to figures published by Nationwide, house prices have risen by just 16.5 per cent since the fourth quarter of 1979, compared with a 36 per cent rise in inflation and a 42 per cent increase in average earn-

ings.
Nationwide says that the ratio of house prices to earnings remains "historically low" with average house prices just over three times average annual earnings compared with 3.69 times average earnings in the fourth quarter of 1979.

On past performances in the housing market it would appear that a sharp rise in prices is long overdue. The fact that this is unlikely to happen reflects not so much uncer-tainty about the housing but uncertainty about the general economic future for Britain.

The biggest new

The creation of a new building society is a rare opportunity. A chance for real progress and new ideas.

At National & Provincial we've used that opportunity to form a society that's bigger and stronger in every way.

With the kind of strength we put behind all our services, your money couldn't be in better hands.

A strong pedigree

We're a merger of two important building societies: the Burnley-highly respected since 1850 for standards of customer service.

And Provincial - one of the country's most dynamic, go-ahead societies.

Strength in our size

The new National & Provincial becomes the sixth largest building society with over 360 branches and 1000 agents throughout

So, for convenience, there's one near you. Which means you can get to your money quickly and easily.

The right kind of products

We decided from the outset to look afresh, not only at what we have to offer. but at our customers' needs.

For instance, Monthly Income Shares pay interest each month as a regular supplement to your income or pension.

Or Special Shares, bringing you a premium rate of interest, and you can withdraw your money whenever you need it.

And if you plan to buy a house our Savers Shares are an excellent way to save for that all important deposit.

That's the kind of strength that's good for your money.

Strong on customer service

National & Provincial is new with modern attitudes. And we're determined to offer you that little bit extra in service; trying harder to understand exactly what you need.

Reading through our product leaflets will demonstrate the point.

They're in plain easy to understand terms. You'll find the same friendly, straightforward service when you come into any of our branches. Try the one nearest to you-you'll get the address by posting the

Competition for savings

Banks throttle back on home loans

BY THE MIDDLE of last year, competition between the hanks and building societies for borrowing and lending had reached boiling point.
The banks bad raised their

The banks bad raised their mortgage advances, net of repayments, by 90 per cent in 1981 and were well on the way towards producing a similarly spectacular performance in 1982. By this time, some of them were also looking to take over from National Savings Certificates as a threat to the espirates' deposits hase.

societies' deposits base. Barclays Bank had announced the experimental opening of 400 branches on Saturdays—"If banks are to offer retail banking, they should be open during retail hours," said Mr Deryk Vander Weyer, chairman of Barclays Bank UK. The theory was that by opening on Satur-day mornings, Barclays would

Outstanding end-1980 ... Increase in 1981

took a different view: as interes rates continued to fall, they said, the clearing banks would find it progressively more diffi-

find it progressively more difficult to maintain profit margins on home loan business.

Lloyds Bank soon followed Barclays' lead and, by the late autumn of last year, only National Westminster still a seemed to be steaming full a shead in the mortgage market. The next major event was a record two percentage point cut in the building societies' mortgage lending rate to 10 per cent, announced in mid-November, which the clearing banks were which the clearing banks were quick to follow. Given that this

Market outstand-

Mr Christopher Johnson group economic adviser at Lloyds Bank, came up with his answer in the bank's economic bulletin early in December. In 1982, he estimated, the bank's share of outstanding mortgage debt would have risen by 75 per cent, to one-third of the £13bn flow of new advances net of repayments.

In 1983, he forecast, the benks share of new business could fall back to nearer a fifth.

He accepted what both the
hanks and the building societies
had been saying earlier: "They
(the banks) have in most cases

52.3 9.6 13.0 14.3 89.4

ontstand-

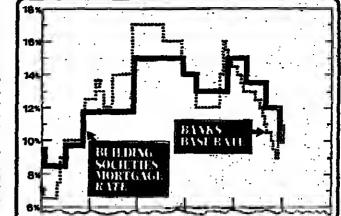

Yet the fact is that Lloyds' projections for 1983, if fulfilled would represent a formidable banking commitment to the home loans market at a time when at was unattractive. In October, observers were saying that a 11 point cut, rather than the two points which eventually transpired, would leave the banks' mortgage business banks' mortgage business operating on the edge of profit-

The banks had higher opera-

societies did not have expensive money transmission services, money transmission services, and did benefit from tax advantages not enjoyed by the banks, although these were not so important as they once were. Despite this, the bulletin's projections involve the banks raising their lending commitment by 30 per cent in 1983 against a 19 per cent increase for the home loans sector as a whole.

Mr Johnson underlined this point and its implications.
"The hanks will nevertheless have more than quadrupled their outstanding mortgage advances in only three years," he said, "and clearly intend to remain a major force in the market, even if their share fluctuates with changing monetary conditions."

In the meantime, there must be a temptation for huisding society staff to sit back and take it easy, while they are taking the money and the bulk

of the lending business. This is rates, when they were taking of the lending business. This is exactly what Mr Clive Thornton, chief general manager of the Abbey Building Society, is afraid of. "It is very sad," he says, "that the banks are pulling out in the lending area and that the pressure is off from National Savings at the other end." "Building societies," he maintains, "badly needed to be shaken from top to bottom by the blast of competition."

1979

Taking the long-term view, he reckons, building societies would have done themselves a lot of good if they had still had to go out and win the money, and the borrowers. For a chief executive who wanted to change things, he says, life was made exercise by the productors. made easier by the predatory lending of the banks and the similarly predatory pricing (in terms of offered interest rates) employed by National Savings until the spring of 1982.

Like others in the industry, Mr Thornton thinks it unlikely that the banks could have kept going at their peak lending

over 40 per cent of the market. It might have suited him, one feels, if they had kept going a little longer. On the deposits side he notes that National Savings intend to remain a source of government funding; "I welcome that," he says.

Receipts

Malcolm Hughes, assistant general manager for market planning at Nationwide, says at the time of writing that in December the industry should have taken f490m of net re-ceipts—an all-time record for the month and 2½ times what it brought in during the same month last year. "Industry receipts," he says,

"have been going up like a lift since National Savings and bank competition began to fall away at the end of March." Mr Hughes notes that National Savings are now com-ing back very strongly with advertising expenditure at "un-precedented levels." They are

also attacking the huilding societies' strong points—short notice or term shares, both extra income accounts—with competitive products, although the competition is nowhere near as fierce terms as the 23rd and 24th issues of certificates at the latter end of 1981-82.
On lending, says Mr Hughes, the competitive pressure from the banks has halved from its

peak. But he has two points to make here. First, he says, it make here. First, he says, it is doubtful bow much of the brake "home lending" was actually going into house purchase, and how much simply released equity for existing housebolders to spend elsewhere.

Secondly, be says, the banks always had a proportion of the home-lending market—9 per cent in 1979 and 7 per cent in 1980 hefore it soared in 1981 and 1982. "We are, says Mr Hughes, returning to a normal situation."

HERBERT WALDEN

It is a step which Mr Walden, who in May starts a two-year term as chairman of the Building Societies Asso-ciation, contemplates with a suitable blend of entiusiasm

For his time at the top will coincide with a period which may prove critical to the building societies' progress and during which many important decisions will have to be made.

Mr Walden, who is general manager of the Warwickhased Heart of England Building Society, believes the societies have held their heads up high during recent battles to fend off competitors in the savings and mort-gage markets. He has no doubts about their ability to continue to defend their cor-

Service

"I am not inclined to criticise our competitors too much and am far more in-terested in ensuring that we continue to beat them. I would accept that our supremacy in the mortgage market led to a certain amount of complacency but the societies learned their lessons quickly and have responded to meet the challenge."

Mr Walden feels that, over a period, the societies will prove themselves to be the best available option both in the all-round service provided and the terms they offer to the public.

the public.

Despite his reluctance to eriticise competitors, the next BSA chairman says he awaits with interest some indication of how the banks will treat borrowers who fall on hard times and into arrears. The societies, he suggests, have a history of social commitment which has led to the sympathetic treatment of customers in difficulty; the banks have yet to prove themselves anywhere near as "understanding."

Although Mr Walden he

Although Mr Walden be-lieves the societies should resist calls to turn themselves into financial supermarkets and should continue to concentrate on housing and housing-related areas, he accepts there is plenty of room for expand-ing the societies' existing role. "I am on the side of those who say we should stick to the job we know best, the jeh we have done for over 200 years. But we would be foolish not to examine every opportunity to see what additional services we can provide for our members, without try-ing to become banks. "However we develop

and expand our present op-erations. I believe such acti-vities should remain peripheral to our central role, that of providing mortgage finance and a good home for

personal savings."

How far the societies will be able to develop their role will depend to a large extent on the scope afforded them in any new legislation which is proposed. The prospect of a new Act of Parliament for huilding societies is the sub-ject of detailed consideration and lengthy debate within the

industry, which is anxious to gain new freedoms without having to surrender some of its existing independence.

its existing independence.
According to Mr Walden
The rules governing our
operations have not been
changed significantly since
Victorian times and the
societies will be able to do
quite a lot more if we get the
right legislation.
There is tremendous scope
for updating the constitutional and operational side of
the business and the societies
want increased powers to enwant increased powers to enable them to expand their traditional activities, most notably into the direct provision of housing.

"Not all societies will want to follow the same path but we believe that enabling legiswe believe that enabling legis-lation to pursue a more direct building role is overdue. Even given the go-ahead, most societies would only want to make available a limited pro-portion of their funds for such purposes, but the oppor-tunity should be provided for there the purpose of their statement.

those who want to participate.
"The power to hold land
for housing development

in inner city regeneration and urban renewal and would replace the tortuous route which societies now have to follow if they wish to give belp in this direction.

"If we could, additionally, and to a limited degree, hold property for letting—with an appropriate assurance from politicians that rent controls would not make schemes un-viable—we could offer young couples the chance to take short tenancies while saving for their first purchase. Socie-ties would only be looking for a reasonable return on their capital and would be develop-ing a relationship with future borrowers."

Mr Walden accepts that the advisability of seeking new legislation. "I suppose it not knowing what the legisla-tors will demand for granting new freedoms. But it is silly to think that we can simply demand what we want with-out anything being expected

A major concern is the like-lihood of enabling legislation lihood of enabling legislation being used by government to direct societies to allocate a stated proportion of their funds for particular types of activity. The societies have, fer example, come under considerable pressure to leod increasing amounts under the local anthority support scheme and so help fill the gap left by reductions in public spending.

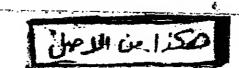

Rut whatever difficulties

Rut whatever difficulties and challenges lie ahead, Mr Walden has an appropriate faith in the ability of the societies to thrive: "Despite what vociferous critics say what vociferous crities say from time to time, the industry has built up tremendous good will and lovalty among millions of people. I believe we can develop our service in the savings and housing field to retain and even enhance that loyalty and trust."

this decline cannot be checked."

Preceded by riots in Toxteth,
Brixton and elsewhere, these
remarks—one of the conclusions
drawn in an independent
report* sponsored by the Abbey
National Building Society and
published a year ago—have
been followed by evidence of
increasing awareness on the
part of huilding societies of
their social responsibilities in an
era of urban decline.

It is not that they were blind

Nationwide had set up separate company—Nationwide Housing Trust—to promote the role of the private sector in raising the UK's housing standards and showed its commitment by appointing Mr Tim Melville-Rose abroady respectible for Ross, already responsible for the society's finance division, to head NHT.

Commitment

commitment

Commitment

It is not that they were blind
to the problems before. In mid1930 Sir Raymond Potter, chairman of the Halifax, noted:

"The Society bas also played an
active role in the rehabilitation
of bouses In inner urban areas,
although of necessity this role
has been limited by the funds
avoilable."

However, the degree and
quality of the societies' involvement in the area has clearly
improved since the Financial
Institutions Group (FIG) was
established by the then Environment Secretary, Mr Michael
Heseltine, after the inner city
disturbances in the summer of
1981.

Last October Mr Cyril
English, chief general manager
of Nationwide (which already
had a reputation for positive

Mr MelviHe-Ross has already
argued Nationwide's financial
commitment to NHT up to £30m
a year; he accepts that this does
not seem a lot when the scolety
is lending up to £150m a month,
but points out that the £150m
digure includes a fair proportion
for inner city projects of one
sort or another which do not
come within NHT's brief.
He sees three main areas for
NHT's inner city activities.
First, pump-priming: schemes
which need a small imput of
public funds to "tee them off"
and could be developed partly of
a shared ownership market. In
"These are the schemes which we
mornally don't get developed because they are too marginal" be
says.

Next there is homesteading, to

Sir Raymond Potter, chairman of the Halifax: "The society has always played an active role although this has been limited by the funds available."

where properties which are run down but structurally sound are sold off at very low prices to first time buyers—"with substantial grants for improvement which young enthusiasts can carry out themselves." Thirdly there is an agency service under which a local authority sets to the pioneering efforts of the could involve as many as the pioneering efforts of the could involve as many as the pioneering efforts of the could involve as many as the could involve as

general manager of Nation-wide: last October he promised more support for im-proving and increasing hous-ing, and regenerating the

Mr Clive Tharmton, chief general manager of Abbey; "In 1979 the society ear-marked £10m on aix areas. Last year improvements of property of all kinds will top £100m."

"figures are now meaningless."
For the record, however, he
notes that in 1979 the Abbey
earmarked £10m on six areas; partnarked 210m on six areas; last year improvement of pro-perty of all kinds will have topped £100m. More relevant, he reckons, is

More relevant, he reckons, is that only 3 per cent of the money spent on new properties each year is spent in the inner cities. Abbey, in every action area, has written to every householder and offered finance. "The take-up averages about 14 per cent." says Mr Thornton, "is as high as 37 per cent in some areas and as low as 3 per cent in others."

Since 1977 all Abbey branch

Since 1977 all Abbey branch managers have been required to report on the bousing condi-tions in their areas as well as on investment and lending and with particular reference to housing action areas. A whole new central office division, the Urban Regeneration Unit, has been built up to co-ordinate action area involvement.

In the regeneration process itself, it may well be that the commitment of human effort may be more important than the initial allocation of funds. It is when an area has upgraded itself that the real hunging starts buying starts.

* Housing Action, compiled by Sandy McLachlan. William Cochrane

Mr Michael Heseltine who, when Secretary of State for the Environment, started schemes for the Improvement of inner

Europe

Housebuying habit on the increase

IN MOST countries housing interfering with the principles finance is very much the preserve of the local lending institution. Non-domestic mortality in the field, and is unlikely to do so.

In one respect however, the gage business is modest in the U.S. and Europe, and pretty well unknown in Japan. A number of U.S. banks entered the UK housing loan market in

the Ok housing loan market in the late 1970s, but their penetration has been limited.

By the same token, cross-border activity is equally rare, held in check hy all sorts of factors, Two of these have an especially negative effect. The diversity of lending systems from one country to another is yery broad; and financial techvery broad: and financial tech-nology — so rampant in retail banking areas generally— remains curiously pedestrian world-wide at the level of bous-

ing finance. There are, however, a number of common threads. Mortgage lending tends to operate on a remarkably similar business cycle in all developed countries, swinging from feasts to famine: when demand is high it invariably receives a big boost from some sort of fiscal incentive; and in just about every instance borrowers are attracted by the value" of the deal they

Over the past couple of decades, demand for housing finance has grown rapidly, for the most part stimulated by the preservation of real asset values. For long periods, bor-rowers bave taken advantage of long-term loans at nominal or negative interest rates. Coupled with tax inceptives, the mortgage investment "opportunity" has been an international phenomenon.

international phenomenon.

The fiscal advantages associated with housing finance vary widely from country to country.

The tax deductibility that operates in the UK has some imitators, but is by no means in the UK has some imitators. universal. Some mortgage boriniversal. Some mortgage but-rowers face simple exemptions, like stamp duty. Others escape capital gains tax, while many face exemption from income tax on the imputed rent income from owner-occupied housing.

Incentives

As levels of owner occupation As levels of owner occupation have risen so fiscal incentives have tended to become less obvious. The UK example of a gradually deteriorating incentive is mirrored in many parts of Europe. In Sweden, full tax deductibility has recently been replaced by a system of tax credits whereby interest deductions are limited to a maximum of interest outlays.

of interest outlays.

The future of tax deductionity worldwide, or at least in those parts of the financially sophisticated world where mortgage finance is of pressing interest — has over the past decade begun to edge into the political area. In the UK, the theoretical argument that tax deductibility for mortgages is politically unacceptable to pure free market economic theories. overhangs the housing finance

overhangs the housing anamore industry.

While it is probably politically impossible for any UK Government to move towards the abolition of tax deductibility at present, industry realises that the practice may be allowed to wither on the vine if Governments simply fail to raise the level of deductibility in line with inflation. ibility in line with inflation.

A similar situation applies in the U.S., the other major area for mortgage finance. President Reagan has never suggested

Ine one respect, however, the U.S. housing market corres-U.S. housing market corresponds more nearly to European markets than to those of the UK, and that is in the continuing strength of the private rental sector. This sector, which is still a major source of housing for both working and middle class families in major cities in the U.S. would be likely to oppose attempts to strengthen the principles of tax deductibility, especially at a time of economic recession. For the time being, these questions are in the background; but they could be brought into the foreground over the next five years, with significant implications for cross-border bousing

Pressures

The resilience of the private market in many Continental countries has meant that demand for bousing finance, and therefore the com-mercial and political pressures to meet it, have been held in check. There are now strong pressures for change in France, where the major banks are extending their mortgage

The growth of the private mortgage field in France has yet to drive the private rental industry onto the defensive, however, as it has done in the UK. In addition to the tradi-tional agricultural demand for tional agricultural demand for rentals, which passes over easily from farm land to farm houses and thus to residential financing, there is still not total acceptance of the desirability of housebuying by the new "technological" bourgeoisie of the towns — many of whom voted for a left-wing president at the last elections.

In southern Europe, including Portugal, Spain and the south of Italy, the trend towards bouse ownership is not yet strong enough to have fathered a bealthy private financing industry, and it may be some years before there can be any question of cross border interest.

Purchase of houses by non-nationals is not uncommon, the financing of such deals is rarely public and is often in cash from the purchaser's own SOURCES

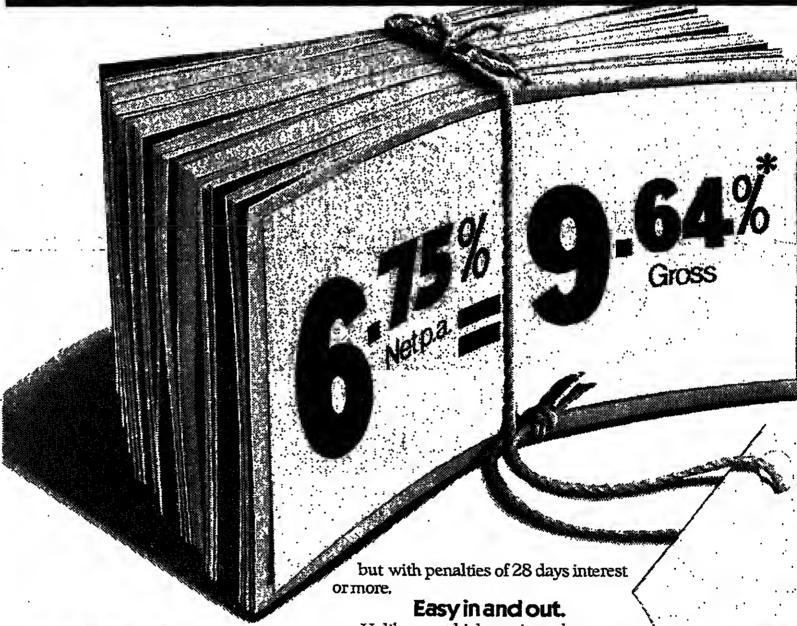

There have been some signs, bowever, that the more advanced countries—in terms of mortgage financing—are searching other geographical areas for new sources of finance as their descriptions.

their domestic sources run into difficulties.

In the U.S., where the domestic savings and loan industry has been badly bettered by the effects of inflations arms or financers. battered by the effects of infa-tion, some major financers have looked at the Eurobond market as a possible source of funds. It has been pointed out that European banks would be better off lending money on houses in Florida than in propping up barran loans to South America or Eastern Europe. However, this newly directed U.S. interest has yet to be translated into business to be translated into business terms, and with the Eurobond market less secure and attrac-tive than it used to be, there seems little likelihood that U.S. housing financers will take any practical steps in this direction in the near future.

ABBEY NATIONAL BUILDING SOCIETY, 27 BAKER STREET, LONDON WIM 2AA

paigns, particularly on TV. A wider branch network enables

thus making the costs justifiable. One major merger now going through and coming into effect in April is that of the Anglia

with the London and Sooth of

England. Anglia itself is the

result of several previous mer-gers, the last one three or four

years ago being between Anglia and the then Hastings and

Mr Peter Wilkinson, chief general manager of Anglia.

Thanet.

When merging is the only answer

LAST YEAR, 22 building societies transferred their engagements to other societies, while four more were involved in merging their operations into two nominally new

These figures bigblight a trend seen in the building society movement over the past decade or so, that of some building societies deciding to link their future in some manuer or other with other

building societies.

A number of factors are bringing about these mergings of operations, but there are three dominant factors: inflation, computerisation and competition.

Inflation has sent administration costs soaring over the past decade or so, forcing financial institutions into adopting comprehensive computerisation programmes in order to keep unit costs down. But such programmes require substantial

caught up in this nut-cracker but with other savings institu-situation between rising tions, such as the clearing banks administration costs and lack of size to justify computerisation. The only solution left is being where it was and open areas so that the branch net-merging to form larger units. When consumers needed lt, work has been extended. But

The other development over played a vital part in securing the past decade has been the growing competition between building societies for funds. Again a branch organisation building societies for funds. It expensive to operate and an Until about three years ago, the expansion of the branch netbuilding work required a high capital

AMALGAMATIONS IN 1982 Otley and Over Darwen , Skipton Cheshire Accrington Savings Britannia Darlington Midshires Advance Queen Victoria Street Easthourne Rurnley City & District Permanent Metrogas Senttish Swansea Park Permanent... Bradford & Easthourne Bingley Matual Britannia Bradford & Driffield Hearts of Oak & Enfield ... Bingley Wellington (Somerset) & Northern District Cheshire Cheshire

In addition the Birmingham and Bridgwater Building Society was formed by the union of the Birmingham and Bridgwater societies. Finally on January 1 1983 the North Wilts Ridgeway Building Society was formed through the union of the North Wilts and Ridgeway societies.

This competition led to the switch in emphasis to the High programmes require substantial capital investments that can only be justified on a high minimum level of business.

Smaller building societies have found themselves being only between building societies and the societies of the high substantial street branch office away from head office. The branch office was in the forefront of the campaign to attract savings, with the competition being not only between building societies.

societies was to attract sufficient outlay with the knowledge that in building societies promoting funds for mortgage lending. the increased business will many more advertising camjustify that outlay. Too often, such an expansion into the wellestablished area of operation of the cost of those campaigns to another building society could be spread over more branches

not be justified.

The logical and the financial solution has been for two like-minded societies to merge their interests where this can be done beneficially. Up to now, the linking has been between socie-tres with different catchment where there has been a duplica-tion of hranches in the same town or adjacent towns, the societies bave gained by merg-

states that the benefits of that merger are now coming ing the branches.. merger are now coming
The competition has resulted through. He hopes that the ex-

perience gained will belp to achieve more quickly benefits from this new merger. The new group will have assets of £33bn and around 380 branches.

Thus the pressure to merge is

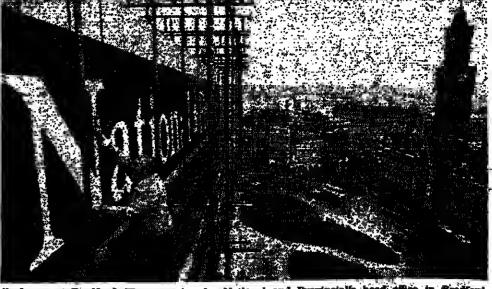

being felt at both ends of the building society movement. Small societies are being forced to link up with others because of cost pressures. Larger societies are merging for aggressive reasons in that it is the quickest and most efficient neans of growing.

The building society movement has nevertheless been operating under conditions of expansion, despite the fierce competition, and the expansion of the branch network has proved financially justified. But with interest rates in decline, the movement could possibly be entering an era of contraction with even fiercer competition for savings

In these circumstances, there may not be justification for so many society branches to operate cheek-by-jowl in the High Streets of provincial towns. Under such situations there could be some major societies merging for defensive reasons, namely to rationalise the branch network.

The greatest problem in-volved in any merger remains the human one of integrating two sets of staff with different salary structures and promo-tional prospects. Mergers in-volve the societies in a great deal of relocation and retrain-

At the meeting the BSMA's constitution was agreed. Its object is to "advance the interests of all building society members by pressing for any necessary changes in the law and building society rules."

Mr Punt said the members had agreed to "scrutinise management expenditure, throw some light on the back-Met warming

throw some light on the back-ground of directors and seek election to some building society boards." society boards."

Members of the BSMA are also calling for greater accountability. One alleged that the directors' fees of a society to which he belonged worked out at £600 per meeting attended. More generally there was concern that the figures available to the public were insufficient.

Balance

Mr Punt said: The only figures available to members don't detail in a satisfactory way the costs of societies." The BSA refuted this claim saying that "societies are obliged to publish annual returns which indicate a lot more than most companies."

The other major issue is the balance of rights between existing shareholders, new investors and borrowers. In the past when building societies were small local institutions, there was little need to consider the separate interests of savers and borrowers since over time these tended to

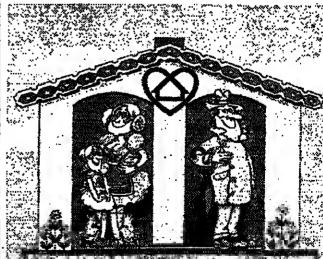

Now, however, investors and savers of one society do not necessarily borrow money from the same society. In addition, the increasingly competitive mature of the savings market bas forced societies to spend high sums on business develop-ment and marketing.

Although the BMSA has no fixed answer to this question of satisfying conflicting interests. it feels that the dilemma should be brought to the attention of boards, which should be seen to be reconciling the various

The Government appears to share this concern. In May, the Chancellor said: "At present it is the investors who in general have the vote. But it is the staff and the borrowers who are locked into the society in a way in which investing members generally are not. And changes should reflect this."

Here, everyone comes out smiling

Administration Centre 22-26 Jury Street, Warwick.

Guaranteed extra interest for up to 3 years.

With Anglia High Income Bonds you can currently earn 7.25% p.a. equivalent to 10.36% p.a. gross to a basic rate tax payer. That's guaranteed extra interest of 1-00% above the prevailing ordinary Share rate - for the full 3 years.

Increase your return

You can invest from as little as £500 up to £30,000 (£60,000 jointly). Interest is added half-yearly and when left in the account gives an even better return of 7-38% p.a. net equivalent to 10-54% p.a. gross.

Monthly Income

If however, you prefer your investment to give you a regular income, interest can be paid monthly on sums for £1,000 and over.

Only two months' notice

With Anglia you can withdraw your money at any time before the end of the term, just give two months' notice when, for this period, no interest will be earned on the amount to be withdrawn.

That's Anglia's angle on guaranteed extra interest. *Equivalent yield per annum to a basic rate tax payer.
